SafeSpot™

- Single patient use resuscitation/ventilation system designed specifically for infant patients
- Bag features ultra-thin 'spots' to provide an enhanced tactile feel for lung compliance and increased patient safety
- Integrated pressure manometer promotes proper delivery (<20 cm H₂O) to guard against over-pressurization of babies' fragile lungs; the tri-color fields alert to the risk level of delivered pressure
- Accurate pressure delivery helps reduce barotrauma or pneumothoraces
- Pop-off valve (40 cm H₂O and 25 cm H₂O available) enables clinicians to use the pop off level appropriate for a given patient population creating a greater margin of safety for the baby
- Optional Vent Mask in various sizes available
- Select from a variety of components to assemble a custom resuscitation bag to meet your unique patient needs

Yellow - Potentially dangerous pressure level

Red - Dangerous pressure level

POP-OFF VALVES

40 cm H₂O & 25 cm H₂O

Allows clinician to use an appropriate pop-off level

FILTERS

A bacterial/viral filter provides effective protection for the healthcare provider during expiration
