

**BATRIK Tourniquets** are comfortable and easy to use on all patients, including; the elderly, undernourished, children and newborns.

- safeguards hospital staff and patients from latex allergens
- **new design:** Our material will feel like latex, but has a more comfortable texture for the patients and less stress on the skin
- available in different sizes
- compact sizes is convenient for most phlebotomy trays
- latex free

**Single Use Offers the Following Benefits :**

- most tourniquets are impossible to disinfect and re-usable units are often contaminated
- will reduce the risk of cross contamination (patient to patient or patient to healthcare provider)
- may help reduce the spread of nosocomial infections
- may improve your facility’s compliance with OSHA’s 1910-1030 (d)(1) “Blood-borne Pathogens Standard”
- 5-6% of the North American population have a latex allergy, particularly children with spina bifida

Facilitate single-use policy with our **25 units per roll**, which comes in a convenient dispenser box for easy access!

**TOURN™ + Tourniquets**
