

# BATRIK DAYBRUSH™ CHANNEL BRUSHES

## REUSABLE

Our Reusable DayBrush™ Channel Brushes can be used for cleaning endoscopes for an entire day. In fact, it's been proven to effectively clean up to 10 scopes before the need to discard.\*

- Soft tip ensures easy manipulation within the channel with no risk of damage
- The back-end is sealed and softened to prevent fluid from getting trapped inside the tube. The softening process also prevents damage if the cleaning brush is used in reverse.
- Can be steam sterilized.
- Bristle volume is 20mm in length – nearly double most brushes on the market. A large brush provides more surface contact during the cleaning process.
- Significant per use savings when compared to other reusable or disposable channel cleaning brushes.

*(\*) Discard after cleaning 10 scopes or sooner if any brush degradation is noticed. After ten applications, the brush may have the appearance that it can continue to clean effectively, but we discourage prolonged use due to risk of cross contamination. Actual number of uses will vary based on handling and processing.*

### PRODUCT SELECTION

ITEM #	LENGTH	BRUSH LENGTH	BRUSH (Ø)	SHEATH (Ø)	BRUSH ENDS
<b>30-18050-T</b>	70" / 180 cm	0.79" / 20 mm	0.20" / 5 mm	0.07" / 1.75 mm	Single
<b>30-23050-T</b>	90" / 230 cm	0.79" / 20 mm	0.20" / 5 mm	0.07" / 1.75 mm	Single
<b>30-23050-2T</b>	90" / 230 cm	0.79" / 20 mm	0.20" / 5 mm	0.07" / 1.75 mm	Double
