ADVANCED SURGI-PHARM

COMPLETE PRODUCT CATALOGUE

SERVING CANADIAN HEALTHCARE WORKERS SINCE 1992

ADVANCED SURGI-PHARM INC.

Founded in 1992, we are the distribution arm of Surgmed™ in Canada, representing leading US, international and domestic manufacturers for a wide range of specialty products with unique benefits for applications in the operating room, women's health, labour & delivery, ICU, and sterile processing areas.Equipped with a direct sales team, we provide effective nationwide coverage as the Canadian distributor of Batrik, Vygon, Rocket Medical, Cooper Surgical, SunMed, and other industry leading products including a wide-ranging portfolio of top-rated PPE products.

ADVANCED
SURGI-PHARM

SURGMED GROUP

Proudly Canadian, **The Surgmed™ Group of Companies** began operations in 1992 as a single distribution company known as **Advanced Surgi-Pharm Inc**. The company quickly became known as an industry leader and specialty distributor of value-added surgical products in the Canadian hospital market. Five years later, **Surgmed expanded upon its success with the launch of Batrik Medical Manufacturing Inc.** in 1997 and the subsequent acquisition of **Imperial Surgical Ltd.** one year later in 1998.

Together, our three unique companies serve the Canadian and global healthcare markets with high quality and competitively priced products, all backed by world-class customer care.

ADVANCED SURGI-PHARM

Founded in 1992, Advanced Surgi-Pharm Inc. is the distribution arm of Surgmed™ in Canada, representing leading US, international and domestic manufacturers for a wide range of specialty products with unique benefits for applications in the Operating Room, Women's Health, Labor & Delivery, ICU, and Sterile Processing areas. Equipped with a direct sales team, ASP provides effective nationwide coverage as the Canadian distributor of Batrik, Vygon, Rocket Medical, Cooper Surgical, SunMed, and other industry leading products including a wide-ranging portfolio of top-rated PPE products.

BATRIK MEDICAL

Established in 1997 and sold in 85 countries globally, Batrik Medical Manufacturing Inc. specializes in the manufacturing of endoscopy accessories, enzymatic solutions, infection control, central sterilization, and surgical devices. Batrik's in-house controlled environment production facility adheres to strictly enforced quality and regulatory control systems. They are registered as a device manufacturing establishment with the United States FDA and are in full compliance with CE and Health Canada Regulations. All Batrik products are rigorously tested, liability insured, and meet/exceed high international quality standards.

IMPERIAL SURGICAL®

Established in 1935, Imperial Surgical Ltd. is one of Canada's oldest hospital capital equipment manufacturers, well-known for their stainless steel healthcare equipment for Sterile Processing, Operating Room, Examination and Treatment, Patient Handling, and Mortuary/ Pathology areas. Their growing portfolio of products also has applications in Infection Control & Prevention, an important area of focus for their future.

SUTURE CLAMP TAGS

Non-toxic, radiopaque, and latex free, our **Suture Clamp Tags** are designed to protect and safely hold sutures without any damage.

Additionally, its foam base, affixed to a sterile area with the clamps, allows for easy insertion.

- Packed in a convenient foam base with easy peel-off adhesive backing, even while wearing gloves
- Available in sterile and non-sterile
- Available in 2, 3, or 5 pairs
- Pre-counted

OUR "EASY PEEL CORNER" IS A FEATURE UNIQUE TO BATRIK

CLAMP JAW COVERS

Manufactured from medical grade silicone, our **Clamp Jaw Covers** reduce trauma to vessels requiring occlusion, particularly when a hemostatic clamp is utilized. The thread-like indents allow for gentle, constant and non-slip tension.

GOOD TO KNOW OUR CLAMP JAW COVERS CONVERT ALMOST ANY INSTRUMENT TO ATRAUMATIC

- Gamma sterilized
- Available in 3 colors and 3 widths to fit most clamp sizes
- Radiopaque and latex free

PRODUCT SELECTION

ITEM # STERILE	ITEM # NON-STERILE	DIMENSIONS	COLOR
12-1000	**912-1000**	0.1" X 5" / 0.25 cm X 12.7 cm	Red

12-1002	**912-1002**	0.3" X 5" / 0.76 cm X 12.7 cm	Blue
STERILE PACKAGING: 2 clamps per sterile pouch - 10 pouches per box			
NON-STERILE PACKAGING: 20 clamps per bag (also available 100 units / bag)			

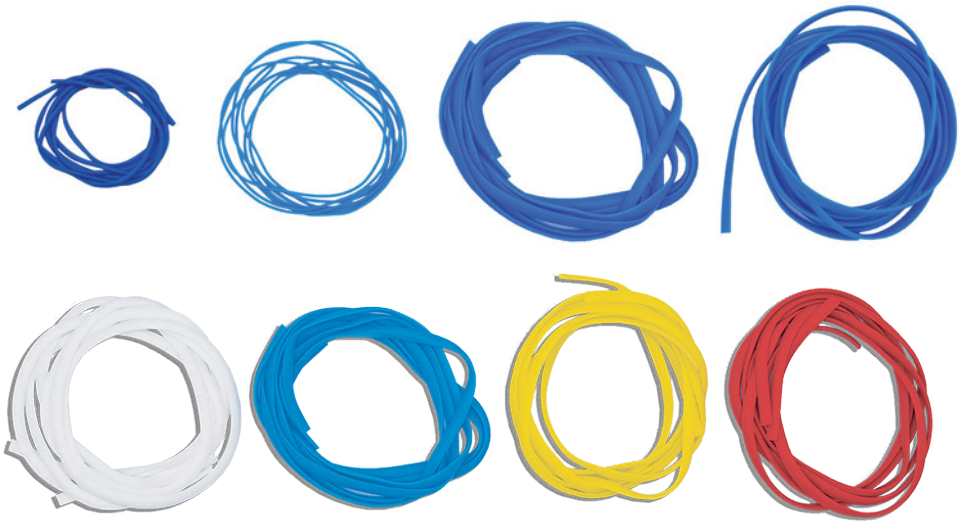

VASCULAR SILICONE TIES

Our **Vascular Silicone Ties** permit safe and smooth retraction, occlusion and identification of vessels during surgical procedures.

Unlike clamps and retractors which can pinch the vessels flat, or even crack them, the **BATRIK** elliptical shape allows for the gentle handling of arteries, veins, nerves, tendons, spermatic cords, ureters, or whenever delicate retraction / occlusion is required.

- Manufactured of medical grade silicone
- Do not twist on themselves when unpacked
- Easy to separate, eliminating the need for cardboard inserts
- Sterile, radiopaque, and latex free

AVAILABLE IN 4 SIZES AND 4 COLORS

PandaPatch™

Introducing PandaPatch™: Innovative Adhesive Eye Protection for Safer Patient Care

PandaPatch™ offers an effective alternative to traditional tape for protecting patients' eyes during surgery. These adhesive eye protectors are designed to reduce the risk of corneal injuries and ophthalmic complications for patients under general anesthesia.

With PandaPatch™, you ensure superior patient outcome by preventing avoidable eye damage associated with the use of standard surgical tape.

KEY FEATURES:

- **Ergonomic Design:** Contours comfortably around the eyes.
- **Post-Surgery Friendly:** Particularly effective for children, the elderly, and individuals with sensitive or delicate skin.
- **Latex-Free & Hypoallergenic Adhesive:** Made from medical-grade material, gentle on the skin and designed to minimize irritation.
- **Non-Adhesive Colored Tabs:** Allowing quick and hassle free application and removal, facilitating effortless monitoring of pupil dilation during surgery.

70-04ADU
Adult Sensitive Eye Protector

HERE'S WHY IT MATTERS:

- During prolonged surgery under general anesthesia, **up to 59%**[1] of patients may not fully close their eyes, risking corneal abrasions.
- **PandaPatch™** gentle adhesive eye protectors ensure eyelids remain safely and comfortably closed, minimizing the risks typically associated with the use of standard surgical tape.

PANDAPATCH™ RANGE:

Three adhesive eye protectors to accomodate different age groups and skin sensitivities. Providing optimal protection for every patient.

- **Adult Extra Sensitive Adhesive (Blue Tabs)**
- **Adult Adhesive (Red Tabs)**
- **Pediatric Adhesive (Red Tabs)**

SAFE-SOAK™ SPAC

Our **Safe-Soak™ SPAC** floor suction disk quickly removes fluid waste from the operating room floor through the application of suction.

- Highly durable: it won't be damaged if stepped on
- Easily maneuverable by foot around operating room floor
- Latex free, disposable, and non-sterile
- The bottom opening permits fluid collection through a highly absorbent material that comes into contact with its surface
- The hose is securely affixed on its side to reduce risk of catching equipment
- Its highly absorbent base material allows for quick fluid wicking and removal when suction is applied

BATRIK

SAFE-SOAK™ ABSORBENT FLOOR MATS

Our **Safe-Soak™ Absorbent Floor Mats** are designed to absorb a variety of fluids from the operating room floor quickly and efficiently, ensuring the floor beneath remains slip-free, safe, and dry during surgical procedures.

- Highly absorbent
- Facilitates quick and easy clean up
- Latex free, single-use, disposable, and non-sterile
- Conforms to uneven surfaces
- Skid-resistant backing (blue absorbent mat only)

BLUE CLOUD-GEL™ ANTI-FATIGUE MATS

Our **Blue Cloud-Gel™ Anti-Fatigue Mats** have been scientifically engineered for use in the O.R. using patented gel technology and premium foam to provide the ultimate comfort and support for surgeons, nurses, and technicians particularly when movement is restricted for prolonged durations.

- Proprietary 3/4" thickness **Blue Cloud-Gel™** foam technology will not "bottom-out" like conventional foam mats
- Conforms to and supports feet promoting efficient circulation, reducing physical discomfort and fatigue
- Promotes proper posture while diminishing back, knee, and foot discomfort
- Latex free, water resistant, and nonabsorbent
- Reusable, easy to clean, and Cart Washer compatible (contact us for more details)
- Excellent friction properties when damp or dry surgical booties are worn
- Completely sealed with an RF weld for excellent protection against moisture absorption
- US Standards: CALL 117 and NFPA 260 Compliant
- 1 Year Warranty

DID YOU KNOW: STUDIES HAVE DEMONSTRATED THAT ANTI-FATIGUE MATS IMPROVE PERFORMANCE, ENERGY, AND POST-OPERATIVE DISCOMFORT.

BLUE-CLOUD NIMBUS™ ANTI-FATIGUE MATS

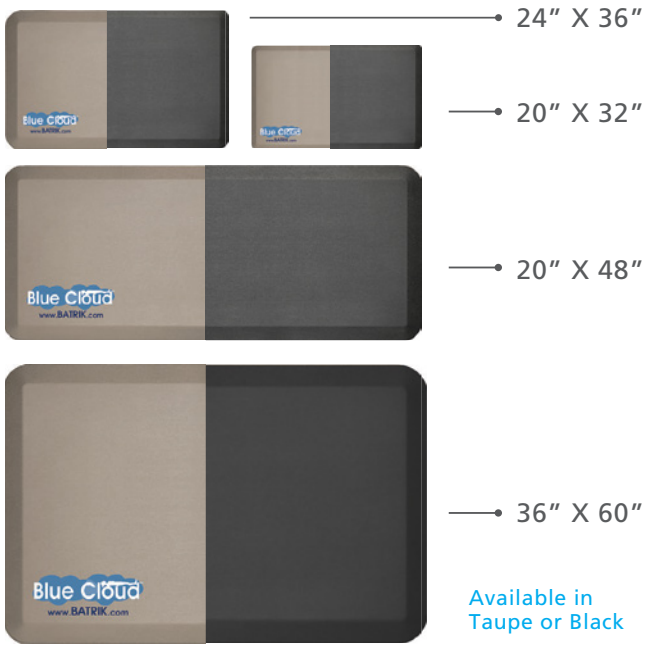

Our **Blue-Cloud Nimbus™ Anti-Fatigue Mats** are designed for general hospital use. Made with proprietary high-density "energy-return" polyurethane materials, they provide unmatched comfort, relief, and ergonomic support.

Our Energy-Return properties will help reduce leg, foot, lower back discomfort, and work-related injuries

- Longer lasting support as 3/4" thickness proprietary foam blend will not bottom out like most other foam based anti- fatigue mats
- Antimicrobial properties blended into the mat provides added protection
- Highly water resistant surface will not absorb water or dirt
- Lightweight and easy to clean
- Textured design on surface and high-traction base ensures greater safety. (US Standard NFSI 101-C)
- Beveled edging reduces tripping hazards and anti-slip backing enhances safety
- Durable design is ideal for commercial applications, yet still ergonomically and aesthetically pleasing for home or office environments
- Flammability/Burn resistant per CFR 16 Parts 1630/1631
- Made with eco-friendly materials, is non-toxic, and latex free
- 5 Year Warranty (non-industrial usage), 4 Year Warranty (industrial usage)

SafeStep™

THE NEXT GENERATION OF INFECTION PREVENTION STACKABLE STEP STOOLS

SafeStep™ Stackable Step Stools are uniquely designed and engineered for exceptional durability and stability.

Seamless, one-piece cast aluminum eliminates areas where fluids and contaminants can collect, while an antimicrobial coating adds another layer of protection; delivering the ultimate solution for infection prevention.

ENHANCED STABILITY

Side interlocking and stackable step stools create a stable multi-level platform while enabling compact storage and streamlined transport.

INFECTION PREVENTION-FOCUSED CONSTRUCTION

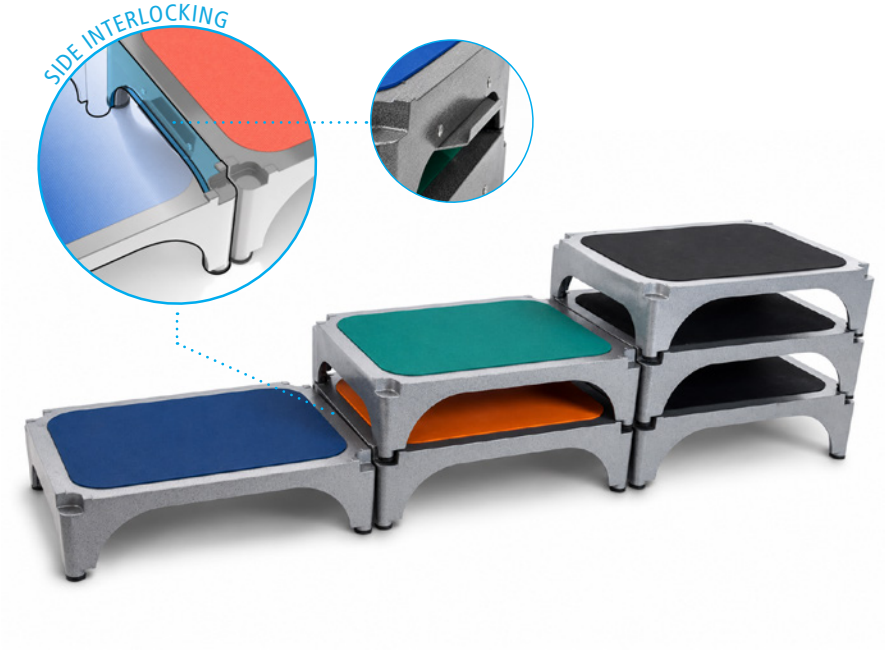

The **antimicrobial** coating prevents the growth, survival, and reproduction of harmful microorganisms; including bacteria, viruses, mold, and fungi on the surface of the treated material.

MR CONDITIONAL DESIGN

For use in MR environments where stable, elevated positioning is often needed.

LIFETIME WARRANTY

Built for confidence.
Engineered for life.
The SafeStep's rugged aluminum frame is backed by our Lifetime Structural Warranty.
Its strength is our promise.
Contact us for more details.

WHY CHOOSE **SAFESTEP™**?

- Ideal wherever a stable elevated platform is required.
- Designed for high-traffic surgical environments.
- Lightweight yet durable construction.
- Simplifies storage and transport.
- Long-term reusable solution.

PRODUCT FEATURES

- Available in multiple color options for departmental organization.
- Weight: 8.3 lbs (3.8 kg) for easy handling by healthcare staff.
- Weight Capacity: 350 lbs (159 kg) single unit, when stacked +300 lbs/136kg.
- Transport Cart available.

TOURNY™+ TOURNIQUETS

Our **Tourniquets** are comfortable and easy to use on all patients, including the elderly, undernourished, children, and newborns.

AVAILABLE COLORS

- Available in different sizes including compact sizes, which are convenient for phlebotomy trays
- Innovative latex free material has a more comfortable texture for patients, puts less stress on skin, and safeguards hospital staff and patients from latex allergens

SINGLE-USE BENEFITS

- Reduced risk of cross-contamination (patient to patient or patient to healthcare provider)
- Reduced risk of spread of nosocomial infections
- May improve your facility's compliance with OSHA's 1910-1030 (d)(1) "Blood-borne Pathogens Standard"

FOR YOUR CONVENIENCE:
25 UNITS PER ROLL
COME IN A DISPENSER BOX
FOR EASY ACCESS

Warm Gel®

Get relief where you need it when you need it

Features and Benefits

- Pliable WarmGel® conforms to any body part
- Easy to activate
- Soft non-woven fabric for patient comfort
- Consistent temperature
- Available in two convenient sizes

WarmGel® is a versatile and reliable source for instant heat

Many applications in:

- Maternity
- IV Therapy
- Labor & Delivery
- Rehabilitation

Temperature Range:

WarmGel® has been designed to achieve 112°F (44°C) when activated at room temperature of 75 °F (24 °C)

K-Wires, Steinmann Pins & Sterilization Racks

Sterilization Racks

Sterilization racks are designed for use during washing, sterilizing, storing/transporting, and dispensing K-wires, Steinmann Pins, or Twist Drills.
The racks are lightweight but made to withstand repeated use. They fold closed for sterilization and easily open to convert to a table top stand
for use in the O.R.
Dimensions are clearly marked on the rack to assist with quick identification.

ENDOSCOPY BO2™ BITE BLOCKS

WITH NASAL OXYGEN DELIVERY

Our **BO2™ Bite Blocks** significantly enhance patient safety by providing supplemental oxygenation during gastrointestinal endoscopy, preventing hypoxia in sedated patients, and ensuring superior patient comfort.

- Saves time and money by eliminating the need for separate nasal prongs and oxygen masks
- Designed to be free of sharp edges to ensure patient comfort and safety
- Available exclusively in Single-Use
- Optional retention strap is available to ensure a secure fit
- The Bite Blocks and optional retention straps are all latex free, lead free and DEHP free

ENDOSCOPY BITESTRONG™ BITE BLOCKS

Our **Bitestrong™ Bite Blocks** provide a safe passage through the patient's mouth during TEE, protecting the patient's teeth and endoscope.

Our molding process ensures a smooth finish with no sharp edges (flashing) that can often irritate a patient's mouth. All Bite Blocks are individually wrapped in sealed, easy to open PE bags and are latex free, lead free, and DEHP free. Additional straps are available, if required

SINGLE USE
Available without dental retention

REUSABLE
- Designed for repeated usage and will withstand commonly practiced chemical and steam sterilization cycles (134°C / 275°F).
- Available with or without an adjustable retention strap

COUVRETTE™ VALVE COVERS

Our **Couvrette™ Valve Covers** eliminate the need for manual cleaning and reprocessing of reusable valves. Our single use Valve Covers effectively reduce cross contamination between patients and also reduce fluid leakage from the parts during procedures.

- Easily and securely fit to all valves
- Reduce the potential for errors
- Single-Use
- Non-Sterile
- Latex free

TIP: REUSABLE VALVE COVERS ARE NOTORIOUSLY DIFFICULT TO CLEAN

SAVE TIME AND REDUCE RISK WITH COUVRETTETM

DAYBRUSH™ CHANNEL BRUSHES

REUSABLE

Our Reusable **DAYBRUSH™ Channel Brushes** can be used for cleaning endoscopes for an entire day. In fact, it's been proven to effectively clean up to 10 scopes before the need to discard.*

- Soft tip ensures easy manipulation within the channel with no risk of damage
- The back-end is sealed and softened to prevent fluid from getting trapped inside the tube. The softening process also prevents damage if the cleaning brush is used in reverse.
- Can be steam sterilized.
- Bristle volume is 20 mm in length – nearly double most brushes on the market. A large brush provides more surface contact during the cleaning process.
- Significant per use savings when compared to other reusable or disposable channel cleaning brushes.

20 mm / 0.79"

(*)Discard after cleaning 10 scopes or sooner if any brush degradation is noticed. After ten applications, the brush may have the appearance that it can continue to clean effectively, but we discourage prolonged use due to risk of cross contamination. Actual number of uses will vary based on handling and processing.

OPTIONAL KIT ADD-ONS

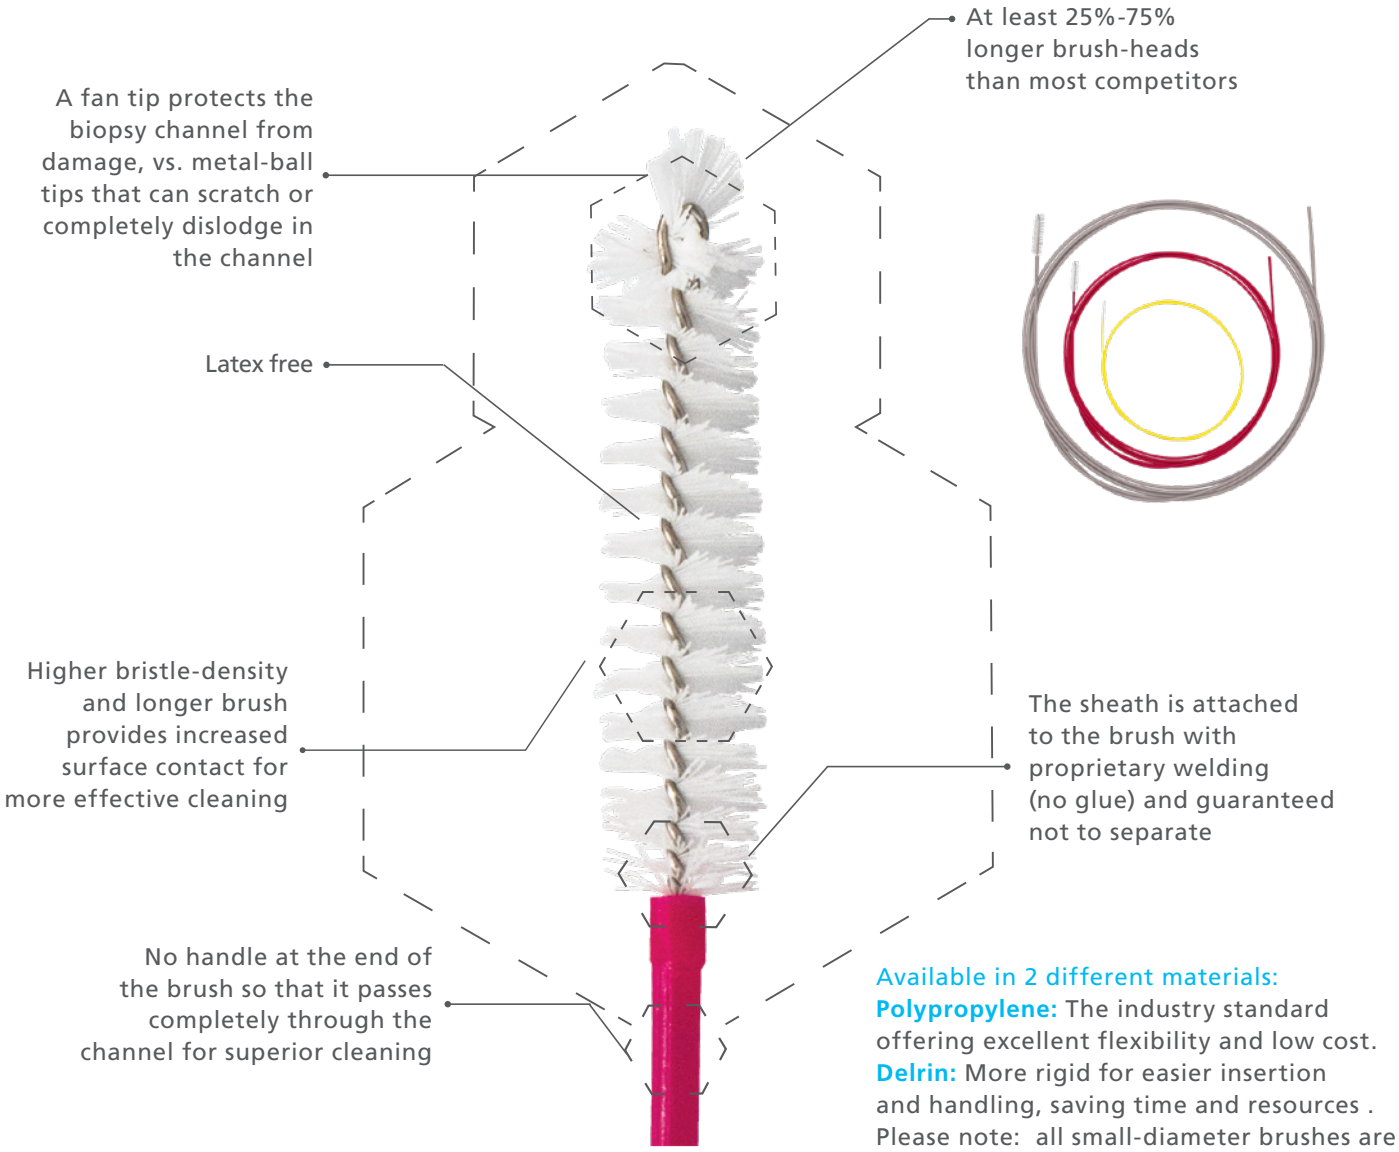

ADD THE SUFFIX:
"F" to receive a kit with our Flat Sponge. Applicable on certain models only, call for details. (Box of 40)
"K" to receive a kit with the single use Valve / Control Cleaning Brush 5/11 Double Brushes (item # 27-57787). Applicable on all models. (Box of 50)
"FK" to receive both the sponge and valve cleaning brushes. (Box of 40)

ARC™ CHANNEL BRUSHES

SINGLE - USE

Our brushes are available in a variety of lengths, materials, and styles to accommodate the widest range of endoscopic devices used in the healthcare industry today.

No matter what your requirements, you'll be able to find the brush that suits your specific needs. If you don't see the brush you require, simply call us. We have over 50 different brushes available and can custom fabricate to your precise specifications.

Available in 2 different materials:
Polypropylene: The industry standard offering excellent flexibility and low cost.
Delrin: More rigid for easier insertion and handling, saving time and resources .
Please note: all small-diameter brushes are offered exclusively with Delrin).

OPTIONAL KIT ADD-ONS

V-BRUSHES

EXTERNAL CLEANING BRUSHES

Our External Cleaning Brushes for endoscopes / optical instruments provide excellent cleaning capabilities. With their unique U-shape bristles and innovative design, our brushes are the ultimate tool for cleaning the exterior of your endoscopic instruments. Free from sharp or metallic ends that can scratch or cause damage to valuable equipment, both single-use and reusable models are latex free and feature ergonomic handles.

PRODUCT SELECTION

ARC™ WIRE STYLE BRUSHES

SINGLE-USE AND REUSABLE

You've got options with our **ARC™** Wire Brushes. Our single-use and reusable brushes are available in both flexible and rigid varieties and come in a multitude of sizes. **ARC™** Wire Brushes are guaranteed to last longer than twisted wire and preserve the integrity of your valuable instruments.

BRUSH SELECTION TIPS:

INSTRUMENT SPECIFICATIONS

What is the maximum length of the instrument(s) to be cleaned?
Add at least 2" (5 cm) to that length, so you have an adequate length to work with.

What is the inner diameter of the instrument?
Add at most 0.125" (3 mm) to determine the diameter of the bristle to ensure effective cleaning. The bristle diameter has to slightly exceed the inner tube diameter. Bristles that are too large will bend too much and not clean effectively.

BRUSH SELECTION

Simply find the section in our catalogue that best corresponds to the overall length and diameter of your instrument. As a rule, if your present brush is 8" (20.32 cm) in length and we only offer 10" (25.4 cm) length with your required diameter, that is entirely acceptable.

In many cases, our **ARC™** Wire Brushes will have more bristles on the brush. As an example, many 5 mm (0.19") diameter brushes are only 1" (2.5 cm) in length. At **BATRIK**, we strived to provide the greatest amount of bristles to ensure the most effective cleaning.

Too small
Bristles will not make sufficient contact and surfaces may go untouched.

Too large
Applies unnecessary pressure on bristles and may cause brush to get stuck in device.

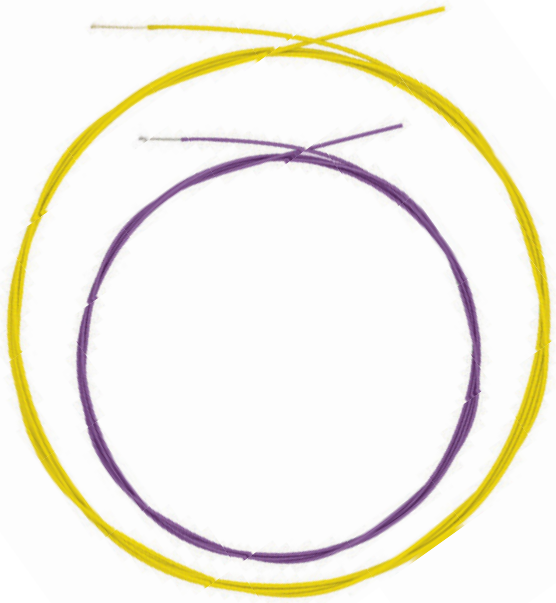

Just right
Bristles make sufficient contact with the instrument.

RIGID

FLEXIBLE

CUSTOMIZABLE WIRE BRUSHES

A unique aspect of single-use **ARC™** Wire Brushes is that they can be customized to any length:

- Up to 2000 mm for Wire Brushes on plastic semi-rigid sheaths with brushes from 5 to 20 mm in diameter.
- Flexible plastic sheaths with brushes from 2-5 mm in diameter.

BRIGHTBRUSH NEW!

THE RIGHT BRUSH FOR EVERY JOB

Tackle even the toughest cleaning jobs with ease! Our Color-Coded Twisted Wire Brushes are designed for precision, convenience, and superior performance—ensuring spotless results every time.

Color-Coded Bead
Each brush features a color-coded bead that indicates the bristle diameter and size, making it easy to select the right tool quickly and efficiently.

Hanging Loop
The brush includes a loop at the end for convenient hanging.

STAINLESS STEEL ARC™ MICRO BRUSHES

Our **Stainless Steel ARC™** Micro Brushes are some of the smallest brushes in the industry. They are designed to clean channels with an inner diameter ranging from 0.5 mm to 1.40 mm.

- Flexible stainless steel sheath will not bend like the regular metal twisted wire brushes
- Polyamide bristles prevents or slows bacterial growth between sterilizations
- Reusable*
- Available in two lengths

TIP: USING THE PULL-THROUGH TECHNIQUE IS HIGHLY RECOMMENDED WITH THESE BRUSHES. SIMPLY INSERT THE BLUNT, NON-BRUSH END FIRST.

PRODUCT SELECTION

ITEM #	TOTAL LENGTH	BRUSH SIZE (Ø)	BRUSH LENGTH	SHEATH (Ø)	PACKAGING
35-03015	12" / 30 cm	0.06" / 1.5 mm	0.6" / 15 mm	0.02" / 0.40 mm	6 / Tube
35-04515	18" / 45 cm	0.06" / 1.5 mm	0.6" / 15 mm	0.02" / 0.40 mm	6 / Tube

*Although all materials used in the fabrication of these brushes can be re-processed repeatedly, due to the delicate nature of these brushes re-use is conditional on their handling and application. Re-use it at the user's discretion.

INSTRUMENT CLEANING FLAT BRUSHES

Our Instrument Cleaning Flat Brushes are specifically designed for hospital use in the pre-clean and preparation of instruments.

- Long ergonomic handle permits ease-of-use
- Extra long length of brush head (60 [±5] mm in Single-Use and 75 [±5] mm in Reusable)
- Transparent brush fibers allow for quick verification of its cleanliness
- The plastic handle will not release any toxic components
- Available in 6 models (4 reusable/autoclavable and 2 single-use)

FLEXIBLE

This brush is designed for large instruments that require a more gentle cleaning application such as optics, plastics, or hard to reach spot.

EXTRA FLEXIBLE

The very long, flexible bristles eliminate any stress during sanitation, and makes this the ideal brush for fragile instruments as well as both pliable and rigid endoscopes. The length of the bristles assist in cleaning areas that would otherwise be difficult to reach, such as the accessory channel or tip deflection of pliable endoscopes.

RIGID

The rigidity of this brush, along with the length of the bristles and handle, improves and simplifies instrument cleaning.

EXTRA RIGID

Instrument safe polyamide fibers offer steel-like rigidity and allows deep cleaning of soiled instruments, particularly in grooved or uneven surfaces.

PRODUCT SELECTION

ITEM #	BRUSH TYPE	DESCRIPTION	COLOR	BRUSH LENGTH	BRUSH SIZE	PACKAGING
50-40917	Extra Rigid	Reusable Autoclavable Flat Brush	Blue	220 mm	75 mm x 20 mm x 10 mm	Bag of 3

Reusable models are also available in bags of 50. Add the suffix "- 50".

REUSABLE PRECISION BRUSH

INSTRUMENT CLEANING

Our Reusable Precision Instrument Cleaning Brush is the ideal brush for the quick removal of difficult debris. It cleans externally as well as deep into instrument jaws. Although the firm and durable bristles feel like stainless steel, there is absolutely no risk of instrument damage or personal injury.

- Bristles have an extra firm density and superior durability
- Polyamide (TYNEX®) bristles
- Steamable thermoplastic ergonomic handle
- Steam / chemical sterilizable
- Latex free

GOOD TO KNOW: ELIMINATES THE NEED FOR THE STAINLESS STEEL TOOTHBRUSH-STYLE BRUSH, WHICH CAN DAMAGE VALUABLE INSTRUMENTS!

TRIFECTA™ BRUSH

INSTRUMENT CLEANING

Introducing the **Trifecta™** Brush, a versatile 3-in-1 tool designed to meet all your instrument cleaning needs. This reusable instrument brush is available in two styles: one with all-nylon bristles for gentle cleaning and another with nylon bristles on two sides and stainless steel bristles on the third, ideal for tackling tougher buildup and stubborn cleaning tasks. This innovative design ensures effective, thorough maintenance for a wide range of instruments.

TRIFECTA™ BRUSH - NYLON

1 NYLON BRISTLES
Gentle, transparent nylon bristles provide an effective yet safe cleaning solution. This side allows you to verify cleanliness easily, without risking damage to delicate surfaces. Ideal for a light, non-invasive clean.

2 PRECISION TIP
Reach those hard-to-clean spots with the precision tip. This small, firm-bristle tip is designed for tight, hard-to-reach areas, such as instrument jaws and box joints. It ensures a deep clean where it's most needed, without the risk of damage or injury to delicate parts.

3 FIRM NYLON BRISTLES
For tougher residues, the firm nylon side delivers the cleaning power you need. With bristles that feel similar to stainless steel but are safe for your instruments, this side easily handles stubborn dirt and buildup.

ACETABULAR REAMER BRUSH

Our double-ended cleaning brush is manufactured exclusively for cleaning acetabular bone reamers. The "Pig Tail" rounded style circular head brush is designed to effectively clean inside the reamer, while the rigid straight brush on the reverse side is used for cleaning individual cutting holes. Special fusion of the brush heads to the hand piece along with its high quality antimicrobial medical grade bristles ensures a durable, reusable, and highly effective cleaning tool.

REUSABLE ORTHOPEDIC RASPS CLEANING BRUSH

Our Reusable Orthopedic Rasps Cleaning Brush is used to clean orthopedic rasps and other similar instruments used in orthopedic surgery.

- Long lasting and can withstand many sterilization cycles
- Ergonomic steamable thermoplastic handle
- Antibacterial polyamide bristles
- Reusable
- Latex free

ANTIBACTERIAL
The bristles are made of polyamide fibers which prevent or slow bacterial growth between two cleanings or brush sterilizations.

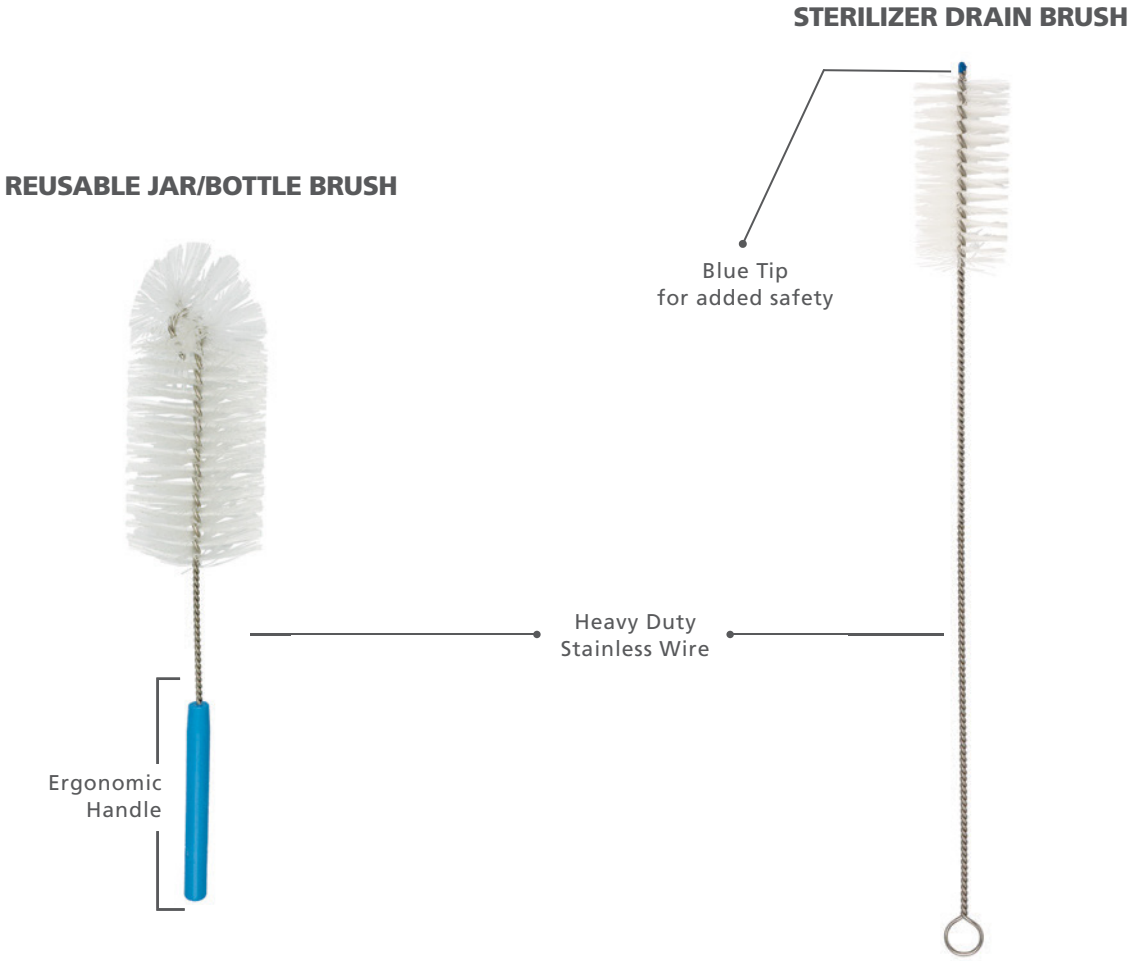

PRODUCT SELECTION

ITEM #	TOTAL LENGTH	HANDLE LENGTH	BRUSH SIZE	PACKAGING
50-RASP	9” / 23 cm	5.5” / 14 cm	0.78” x 2.7” x 3.5” 2 cm x 7 cm x 9 cm	Bag of 3

BOTTLE & DRAIN CLEANING BRUSHES

Designed specifically for hospital applications, our Reusable Instrument Cleaning Brushes feature long and flexible bristles to maximize the effectiveness of large-surface cleaning.

- High quality polyamide clear bristles
- Easy to identify debris
- Autoclavable
- Latex free

PRODUCT SELECTION

BLUE DELRIN PLASTIC

ITEM #	DESCRIPTION	HANDLE LENGTH	BRUSH LENGTH	BRUSH (Ø)	TOTAL LENGTH	PACKAGING
50-10295	Reusable Jar / Bottle Brush	120 mm ± 2 mm	120 mm ± 5 mm	70 mm ± 2 mm	13.19" / 355 mm	Bag of 3

SILICONE PIN MAT

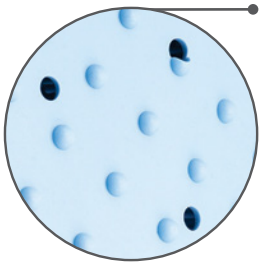

Our **Silicone Pin Mat** cushions, protects, and organizes delicate surgical instruments for sterilization. The elevated nubs provide greater air-flow ventilation and drying, significantly reducing residual moisture collection.

- Reusable
- Autoclavable
- Latex free

FRONT SIDE
Pins keep instruments securely in place

BACK SIDE
Numerous holes and elevated nubs provide superior venting and reduce water collection

GOOD TO KNOW:

CUSTOM SIZES ARE AVAILABLE UPON REQUEST

TAG-IT™ | NOTES

WHEN SIMPLY BROKEN DOESN'T CUT IT—**TAG IT, TELL IT, OWN IT!**

Tag-It™ Notes offer the freedom to **identify and document instructions for instruments, trays, and carts** before and after **sterilization. Tag-It™** Notes are **tear-resistant, withstand extreme chemicals, high temperature** and ensures **reliable communication.**

WHY YOU'LL LOVE THEM:

- **Tag-It™** Notes gives you the **freedom** to clearly document important information **without the clutter.**
- Robust and easy-to-use **tie wraps** designed to **securely attach** to instruments (134˚C & chemical tested).
- Includes a **fast-drying, heat-resistant permanent marker** for writing your important notes.
- Choose from other **customizable cards** for personalized needs or **pre-made cards** for fast, convenient use.
- When you need more than a "repair" or "sharpen" seal to identify an issue. Instead, **Tag it, Tell it, Own it.**

WATERPROOF
The synthetic paper withstands spills and liquid exposure without any damage.

ECO-FRIENDLY
Made from sustainable materials.

HEAT RESISTANT
Can resist high temperatures of up to 273.2˚F (134˚C). Compatible with Gas Plasma Sterilization (STERAD®100 NX Sterilization).

DURABLE & TEAR-PROOF
Handles rigorous cleaning, tough conditions, and resists tearing.

PRODUCT SELECTION

ITEM #	COLOR		SIZE	PACKAGING
TI-NOTE-R0	Yellow	NOTES	3" x 5" / 8 cm x 13cm	100 / PKG

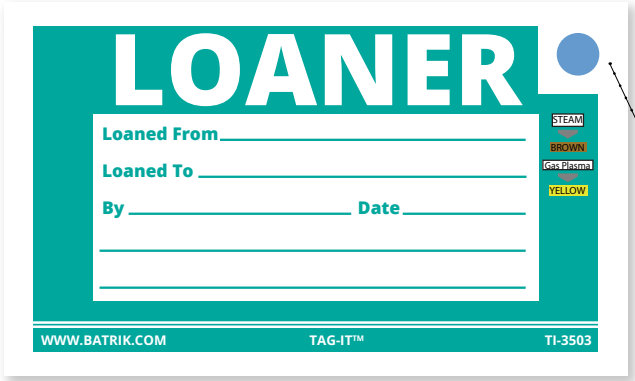

All Tag-It™ are single-use. PACKAGING: 1 pack of 100 tags, 1 permanent marker, and 100 ties.

TAG-IT™

Tag-It™ Cards are an effortless way to add information with either pre-printed or blank formats. These **durable** tags streamline your work ow, **withstand tough conditions**, and feature **(optional) indicator dots** for quick veriycation. They help keep **instruments, trays,** and **carts** organized, ensuring efÿciency before and after sterilization/decontamination.

KEY PRODUCT FEATURES:

- **Special Permanent Marker:** The ink will not run or appear blurry after exposure to chemicals or high temperature (max. 260C/500°F) sterilization. *(Regular pens or markers can be used only if the tags are not going to be exposed to any sterilization/decontamination).*
- **Tie Wraps:** Assist in securing the tags to almost any instrument or container. *(Tie wraps have been tested for chemical and steam sterilization).*
- **Our Tag-It™:** Will not shrink, absorb water/chemicals, or lose its intended integrity after chemical or steam sterilization.

(Optional)
All Tags Available with Indicator Dots
Provides visual confirmation that the tag was processed.

TAG-IT™ | SCOPE

Batrik Scope Tags are **tear-resistant, double-sided** tags that will prove indispensable throughout the reprocessing journey. Our tags make it easy to **record important information**, including processing dates, with a user-friendly feature that allows you to select the month, day, and date. Crafted from **waterproof synthetic paper,** these tags feature a **self-looping design**, making it effortless to attach them to the scope without the need for additional fastening materials. Elevate your reprocessing protocols with Batrik!

KEY FEATURES

- The paper, tie wraps, and smudge-proof ink are designed to withstand high temperatures of up to 273.2°F (134°C) and are compatible with Gas plasma sterilization (STERRAD®100 NX Sterilization System).
- Tags include the month, day, and date selection on one side, making it convenient to mark the processing date accurately

COLOR-CODED AND CUSTOMIZABLE

- Available in seven colors
- The tags facilitate color coding for easy identification

SELF LOOPING

- The self-looping design allows for easy attachment to the scope
- Eliminating the need for additional fastening materials

SINGLE-USE AND LATEX FREE

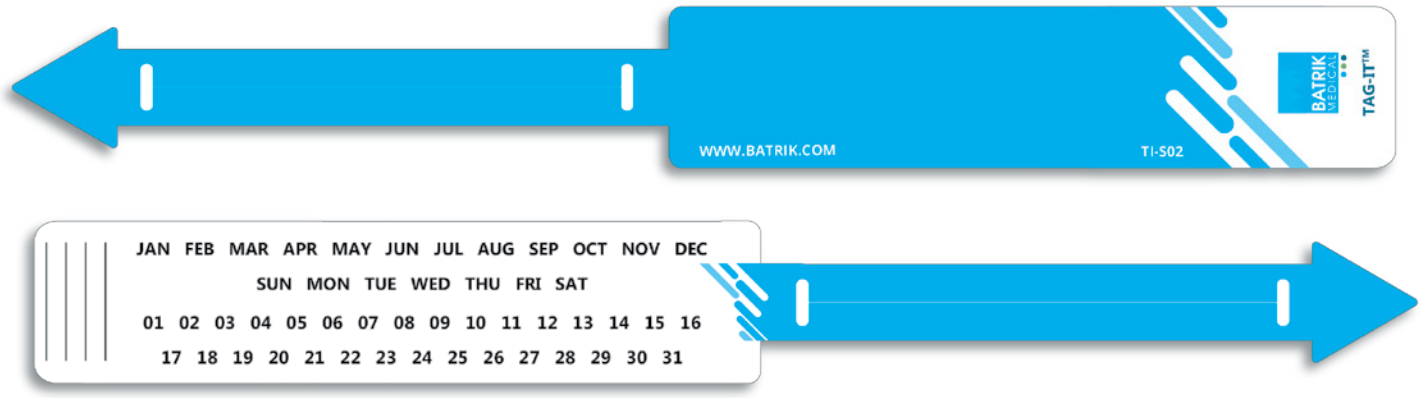

- Batrik Scope Tags are designed for single use and are latex-free
- Promoting hygiene and reducing the risk of cross-contamination

TAG-IT™ | SCOPE REPROCESSING

Batrik Scope Reprocessing Tags are durable and can withstand handling during reprocessing **without tearing,** ensuring that information remains intact. These tags are vital in recording important information such as **date to reprocess on, scope model and serial number, sterilizer type, meeting sterilizer parameter conditions, alcohol flush, and hang date**. These tags have been meticulously designed to elevate **operational efficiency** and contribute to the delivery of the highest standard of patient care.

TI-RST

TI-MPB

*Suitable for various information tagging purposes

LOGGING IMPORTANT INFORMATION

- Easy for staff to indicate when the scope was processed
- Key scope, technician, and cycle-related information easily reported and identified.

SMART DESIGN

- The self-looping design allows for easy attachment to the scope
- No requirement for extra fastening materials
- Secure fastening as the loop is tightened around the instrument
- Features an integrated barcode area

LILA'S INSTRUMENT STAIN REMOVER

Lila's special blend of naturally sourced powders provides outstanding removal of stubborn stains.

Convenient-to-use formula, you can achieve spotless results every time!

It can be used on surgical/dental instruments, autoclaves, ultrasonic cleaners, stainless steel countertops, trays, bowls and more.

Specifically designed for use on stainless steel, chrome, nickel, brass, copper, and silver.

LSR-8501

EASE TO USE AS 1,2,3...

1. Dampen a cloth or grab a Lila's Low Linting Dura-Towel and dab into the jar.
2. Gently rub the area that is stained.[1]
3. Rinse thoroughly for a flawless shine.[2]

A little Goes a long Way!

Even great to tackle stubborn stains on steel pots and pans in your kitchen with ease.

Lila's - If you have used Spectra-Scrub or Integra's instrument stain remover then you will love Lila's!

60-46003

17-DT1213C

LILA'S SCRUB PAD

- Say goodbye to extra stubborn stains with Lila's Scrub Pad without leaving any metal residue.
- Simply add a small amount of Lila's Stain Remover with one of our Scrub Pad's for very large areas.
- The gentle yet effective scrub is the perfect choice for Opthalmic Instruments.[1]

LILA'S LOW-LINTING DURA-TOWEL

- Lila's Dura-Towel has long lasting strength and has a minimal lint composition.
- These single-use towels are clean room certified and are specifically designed for instrument wiping.
- Its ideal dimensions and unique attributes guarantee optimal performance, setting it apart from ordinary paper towels.

PRODUCT SELECTION

1 : Although Lila's is completely safe, it is not recommended for use on ophthalmic instruments. Use Lila's Scrub Pad on its own.
2: The stain remover should not be mixed with bleach and is for external use only to remove instrument stains.

INSTRUMENT PROTECTORS

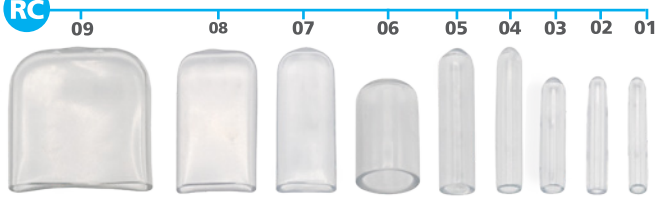

Our **Instrument Protectors** protect the tips and edges of instruments to prevent damage during handling and sterilization. Available in a wide array of color coded sizes for almost every application, including osteotome, retractor, double, and perforated.

- Steam and gas permeable
- Perforated protectors reduce vacuum seal and moisture build-up
- Validated for pre-vacuum sterilization*
- Multiple color-coded sizes
- Latex Free
- Non-Sterile

*Independent laboratory tested to validate pre-vacuum steam sterilization efficacy in a healthcare setting

LUBO CARE™

PROTECTIVE INSTRUMENT LUBRICANT

BATRIK CHEMISTRIES™

Protect and preserve your valuable surgical instruments.

Lubo Care™ lubricates and protects surgical instruments during reprocessing and before sterilization. Formulated with an **all-natural** corrosion inhibitor, it helps reduce friction, protect against corrosion, and maintain the smooth operation of hinged instruments. Its gentle, non-corrosive formula supports consistent reprocessing while helping extend instrument life.

Available in
Ready-to-Use Spray and
concentrated formats.

EXTENDS INSTRUMENT LIFE
Helps prolong the life of valuable surgical instruments by reducing wear during routine reprocessing.

RESTORES AND ENSURES INSTRUMENT ARTICULATION
Helps maintain smooth movement and function.

PREVENTS STAINING AND SPOTTING
Helps keep instruments in optimal condition.

CORROSION PROTECTION
Helps protect instruments against corrosion to preserve their performance and appearance.

GENTLE FORMULA
Designed to be gentle on surgical instruments for routine use, leaving no residue.

BACTERIOSTATIC PROPERTIES
Helps inhibit bacterial growth on treated surfaces.*

WHY CHOOSE lubo CARE™

DESIGNED FOR DAILY INSTRUMENT REPROCESSING WORKFLOWS

lubo CARE™ is designed for use in sterile processing departments, surgical centers, dental clinics, and healthcare environments where instrument protection and smooth functionality are essential.

APPLICATIONS

READY-TO-USE SPRAY OPTION
Non-oily, non-sticky, non-toxic, silicone free and non-aerosol.

COMPATIBLE WITH AUTOMATED REPROCESSING EQUIPMENT
(gallon/liter format)

S.T.I.C.S.

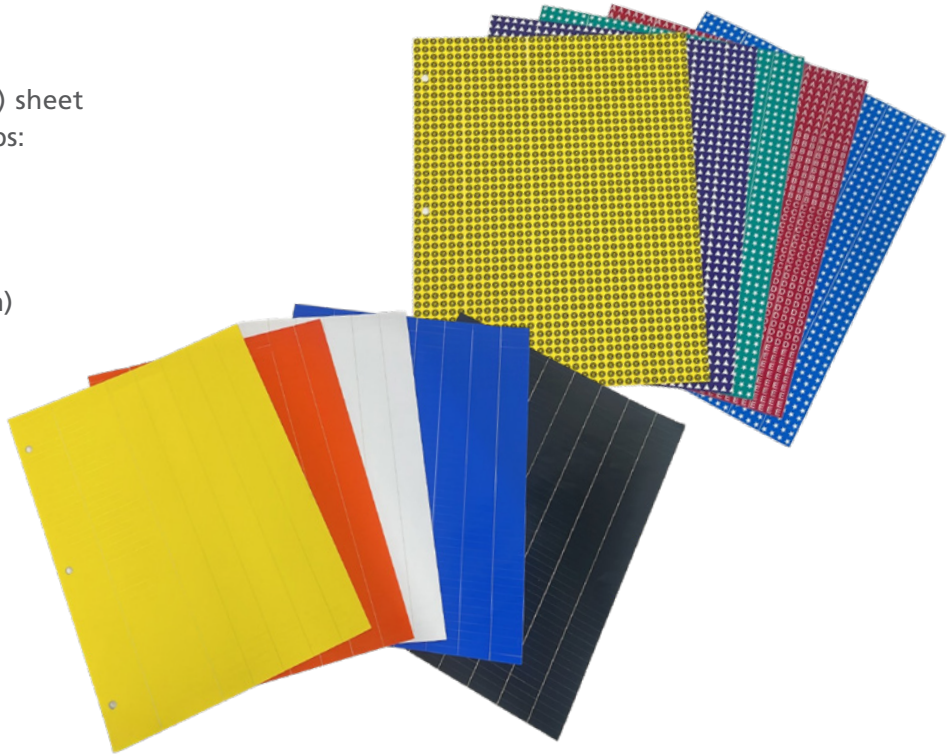

Our Simple Tracking Identification Color System, or S.T.I.C.S., is an easy to use, latex free, tool that allows you to quickly identify your instruments by department and/or procedure. The tape adheres securely and every tape sheet comes with a protective cover to ensure it lasts as long as you need.

Each 8.5" x 11" (216 mm x 279 mm) sheet contains the following adhesive strips:

- 1" (25.4 mm) x 220
- 1.5" (38.1 mm) x 44
- 2" (50.8 mm) x 44
- Total tape per sheet 374" (9500 mm)

ID TAPE

A simple solution for marking surgical instruments with the aid of color-coding, our ID Tape is durable and will not chip, flake, or peel. It can be used in autoclaves, withstanding repeated exposure to sterilization. Independent validation tests demonstrated the efficiency of sterilization of marked instruments, even underneath the BATRIK ID Tape.

TAPE-B-GONE™

ADHESIVE REMOVER BATRIK CHEMISTRIES™

Designed specifically for sterile processing departments, **Tape-B-Gone™** is a uniquely formulated, ready-to-use proprietary soy-derived, water soluble solution that removes tape, labels, and adhesive residue from medical equipment and surgical instruments.

SUPPORTS FASTER REPROCESSING

Simplifies adhesive removal while supporting efficient sterile processing workflows.

POWERFUL ADHESIVE REMOVAL

PROTECTS INSTRUMENT SURFACES

Neutral pH formula will not damage medical equipment and surgical instrument surfaces during adhesive removal.

LOW ODOR & SAFE FORMULA

Ready-to-use, non-flammable, non-combustible.

TRANSPORT COMPLIANT

Approved for land (DOT), sea (IMDG/IMO), and air (IATA) transport.

WHY REMOVE ADHESIVE RESIDUE?

Adhesive residue can contribute to instrument damage and reduced cleaning efficacy.

HOW TO REMOVE LABELS & TAPE

1. Spray On
2. Allow to soak for 3 minutes
3. Wipe Off
4. If label or residue remains, repeat

COMPATIBLE SURFACES

Safe for use on a variety of metals, glass, plastic, and rubber surfaces, including:

- Surgical instruments
- Trays and containers
- Tables and work surfaces
- Autoclaves
- Carts and bins

REMOVES:

- Surgical tape
- Labels
- Adhesive residue
- Glue
- Ink & marker residue
- Grease

PADLOCKS SECURITY TAGS

Our **Padlock Security Tags** for instrument containers and general hospital applications are specifically designed for the healthcare market. Our material selection, fabrication process, and engineering ensure consistent quality and high temperature compliance with the various steam sterilization temperatures in worldwide hospital applications.

Available with optional reactive ink indicator dots that provide visual sterility indication. Light blue dots turn brown/dark brown when steam sterilized.

AVAILABLE IN THREE FORMATS

700-SERIES **800-SERIES** **900-SERIES**

PRINTED & CUSTOM NUMBERED PADLOCKS

Available in 700, 800 & 900 SERIES

SCRUB PAD

Our **Scrub Pad** is ideal for pre-cleaning your surgical instruments without leaving any metal residue that often occurs when using steel wool or metal sponges. The abrasiveness is perfectly balanced to provide you with efficient cleaning without damaging your instruments. Its fine fibers allow the user to polish, clean, and debur all types of material surfaces.

- Abrasive Material: Aluminum Oxide
- Grit: 400
- Grade: Very Fine
- Style: Flexible
- Pad material: Non-Woven
- Color: Maroon
- Type: Hand Pad

ENZO CLEAN™ ENZYMATIC CLEANERS

MULTI-ENZYME FORMULA FOR INSTRUMENT CLEANING

BATRIK CHEMISTRIES™

enzoCLEAN™ is a concentrated, multi-enzyme detergent designed for effective cleaning of reusable surgical instruments. Powered by our proprietary **PrAmLi Power³ Enzymes™,** it delivers reliable performance throughout the instrument reprocessing cycle.

SAFE FORMULA
Features a pH-neutral and biodegradable formula

SUPPORTS EFFECTIVE CLEANING
Helps remove blood, proteins, fats and organic soils to improve instrument cleaning performance.

PROTECTS INSTRUMENTS
Designed for routine reprocessing while helping protect delicate surgical instruments.

REDUCES DETERGENT USAGE
Super Concentrate formula helps maximize solution yield and reduce cost per use.

FITS EXISTING WORKFLOWS
Compatible with manual, ultrasonic and automated cleaning processes for added flexibility.

GOOD TO KNOW:

- Super Concentrate is also available in 2.5 Gallon packaging based on a minimum order quantity. Contact us for details.
- Always follow your equipment manufacturer's recommended dilution ratio, water temperature and operating guidelines. Machines and settings vary.
- Follow your hospital's instrument reprocessing protocols when selecting and using cleaning detergents.

ENZO CLEAN™ NON-ENZYMATIC CLEANERS

ENZYME-FREE FORMULA FOR INSTRUMENT CLEANING

BATRIK CHEMISTRIES™

enzoCLEAN™ is a concentrated, non-enzymatic detergent designed for effective cleaning of reusable surgical instruments. It delivers reliable performance throughout the instrument reprocessing cycle.

SAFE FORMULA

Features a pH-neutral and biodegradable formula

RELIABLE ENZYME-FREE CLEANING

Helps remove blood, proteins, fats and organic soils while supporting facilities that prefer or require non-enzymatic cleaning protocols.

PROTECTS INSTRUMENTS

Designed for routine reprocessing while helping protect delicate surgical instruments.

REDUCES DETERGENT USAGE

Super Concentrate formula helps maximize solution yield and reduce cost per use.

FITS EXISTING WORKFLOWS

Compatible with manual, ultrasonic and automated cleaning processes for added flexibility.

ENZO FOAM™

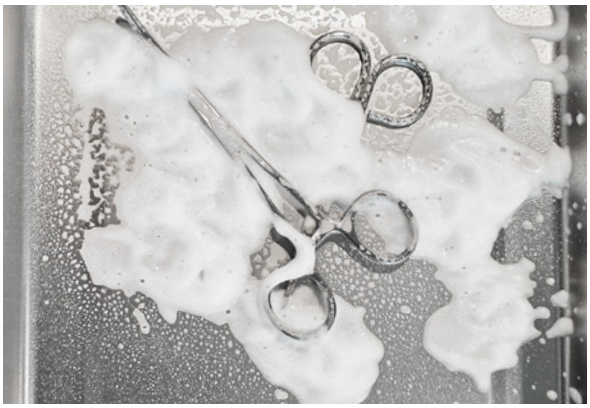

READY-TO-USE ENZYMATIC FOAMING SPRAY

BATRIK CHEMISTRIES™

ENZO FOAM™ is a ready-to-use, non-aerosol enzymatic foam designed for point-of-use pre-treatment of surgical instruments. Its thick, clinging foam helps keep instruments moist during transport while beginning the bioburden breakdown.

Powered by our proprietary **PrAmLi Power³ Enzymes™**, an advanced three-enzyme blend with surfactants engineered to break down blood, proteins, fats, and other organic soils for enhanced cleaning performance.

+25%
MORE PRODUCT THAN THE LEADING COMPETITOR

NEW LOOK

SUPPORTS MORE EFFECTIVE REPROCESSING

A neutral pH, non-caustic formulation designed to be gentle on delicate surgical instruments. It is non-aerosol, environmentally safe, and rinses easily.

HELPS PREVENT ADHESION OF BIOBURDEN

Thick, clinging foam coats and protects instruments by helping keep them moist.

PrAmLi Power³ Enzymes™

Combines three specialized enzymes with surfactants to rapidly break down a broad range of organic soils for enhanced cleaning performance.

READY TO USE

No mixing or dilution required. Simply spray, coat, and protect. Begins working in seconds.

WHY CHOOSE ENZO FOAM™?

Protect Instruments Between Use and Reprocessing

Organic soils begin drying within minutes after use. ENZO FOAM™ helps keep instruments moist during transport, supporting effective cleaning before manual or automated reprocessing.

HOW IT WORKS

1. Shake bottle before use.
2. Apply a generous layer of foam directly onto contaminated instruments.
3. Allow foam to remain on surfaces and keep instruments wet until decontamination begins.

IDEAL FOR

- Sterile Processing Departments
- Endoscopy Suites
- Operating Room
- Outpatient Surgery
- Dental Surgery Centers

COMING SOON!

360° Our **360 Spray** allows you to effectively spray no matter the angle of the bottle. Works right to the last drop.

F1RST WIPES

Our cleanroom wipes are designed to do the first wipe-down of an endoscope after a procedure. They are made from hydroentangled non-woven material composed of 45% polyester and 55% cellulose. These wipes are manufactured and packaged in a cleanroom environment.

- Can be used for a cleanroom environment of ISO Class 5 through 8
- Production process guarantees extremely low particle generation and chemical extractables
- Compatible with virtually any solvent or solution for cleaning and wiping (such as PrAmLi Power³ Enzymes™)
- Double-bag packaging
- Available in two versatile sizes

TRANSPORT BAGS FOR ENDOSCOPE AND MEDICAL INSTRUMENTS

Thoughtfully designed to eliminate touch-points during endoscope transport from point-of-care to the reprocessing area, and back, focused on safety of patients and medical staff.

- Made of recyclable LDPE material known to be quite flexible, highly resilient, and tough
- Latex and DEHP-free
- Excellent resistance to dilute and concentrated acids, alcohols,bases and esters*
- Good resistance to aldehydes, ketones, and vegetable-based oils*
- Can withstand high temperatures of up to 90 °C (194°F)
- Tamper-evident seal for added safety, also aids in keeping the instrument moist to avoid drying of bio-debris
- Clearly marked bags with color-coded visuals facilitates immediate identification of clean vs. used instruments
- Users can write important information directly on the bag in spaces marked with visual icons
- Available in two convenient sizes

GOOD TO KNOW USING Your First ™ SEALABLE TRANSPORT BAGS REDUCES USER ERROR, PREVENTS CROSS-CONTAMINATION, AND PROMOTES PATIENT AND MEDICAL STAFF SAFETY.

SAVEFACE™ DRAPED SHIELDS

SUPERIOR DECONTAMINATION PROTECTION

In the Central Sterile Supply Department (CSSD), personal safety is paramount. Our Draped Face Shield provides essential protection during high-risk instrument decontamination. **SAVEFACE™** Draped Face Shields drastically reduce harmful exposure to caustic chemicals as well as the risk of cross-contamination. Effective face protection is non-negotiable. Wear **SAVEFACE™** Draped Face Shield with confidence.

SF-240

SF-8240

ANSI/AAMI PB70 LEVEL 3 COMPLIANT DRAPE

Provides a high level of fluid penetration protection. Includes closing system to reduce risk of fluid contact from below the shield.

EXTRA-LONG 9”/23 CM WRAP-AROUND SHIELD

Ensures full coverage, reducing the risk of exposure from different angles.

ADAPTIVE COMFORT

The soft, self-shaping foam headpiece molds comfortably to your forehead, allowing for extended wear without discomfort.

OPTICAL CLARITY WITH ANTI-FOG AND ANTI-GLARE

UKAS PRODUCT CERTIFIED

WHY CHOOSE SAVEFACE™ DRAPED SHIELDS

BATRIK face shields are independently certified to comply with the PPE Category 2 standard, a mandatory requirement for many facilities.

SHOOZCOVERS™ | SOFT LINE™

Batrik ShoozCovers™ Soft Line™ is manufactured in Canada from high quality **35 g/m² polypropylene fabric and 100% latex free elastics** for performance and durability you can rely on. Our anti-skid tread reduces the risk of slipping and our smart design delivers easy on-and-off convenience and great fit.

MADE IN CANADA

NOW AVAILABLE IN BUBBLEGUM PINK

SHOOZ-REPELLENT™ TECHNOLOGY:

The **Soft Line™** integrates Shooz-Repellent™ technology which creates a protective barrier that repels fluids, delivering basic incidental fluid contact repellent. Shoe covers are not waterproof or water-resistant.

ANTI-SKID TREAD:

Our anti-skid tread reduces the risk of slipping with **triple ultrasonic welds** that increases tear strength and delivers easy on-and-off convenience.

OUR SOFT LINE™ IS PERFECT FOR:

- MEDICAL ESTABLISHMENTS
- PHARMACEUTICAL LABS
- GMP SITES
- ELECTRONIC MANUFACTURING

DISTRIBUTED BY:
ADVANCED SURGI-PHARM INC.
www.advancedsurgipharm.com
Tel.1-800-661-5432

LOLLY BLUE | SOFT LINE™

WHY YOU'LL LOVE THE SOFT LINE™:

- Both shoe covers are manufactured in Canada with top-quality 35 g/m² polypropylene fabric and 100% latex-free USA-made elastics[1].
- This line is particle count tested and complies with IEST-RP-CC003.4.
- Other colors available upon request.

AVAILABLE IN TWO VERSATILE SIZES

BUBBLE GUM PINK | SOFT LINE™

SUPPORT A CAUSE, WEAR PINK:

- A portion of our Bubble Gum Pink shoe cover sales will be donated to charity to help further breast cancer research. Join us in making a meaningful contribution by choosing Pink ShoozCovers™!

It is not waterproof nor water resistant.

ANTIMICROBIAL IV POLES WITH CUVERRO SHIELD™

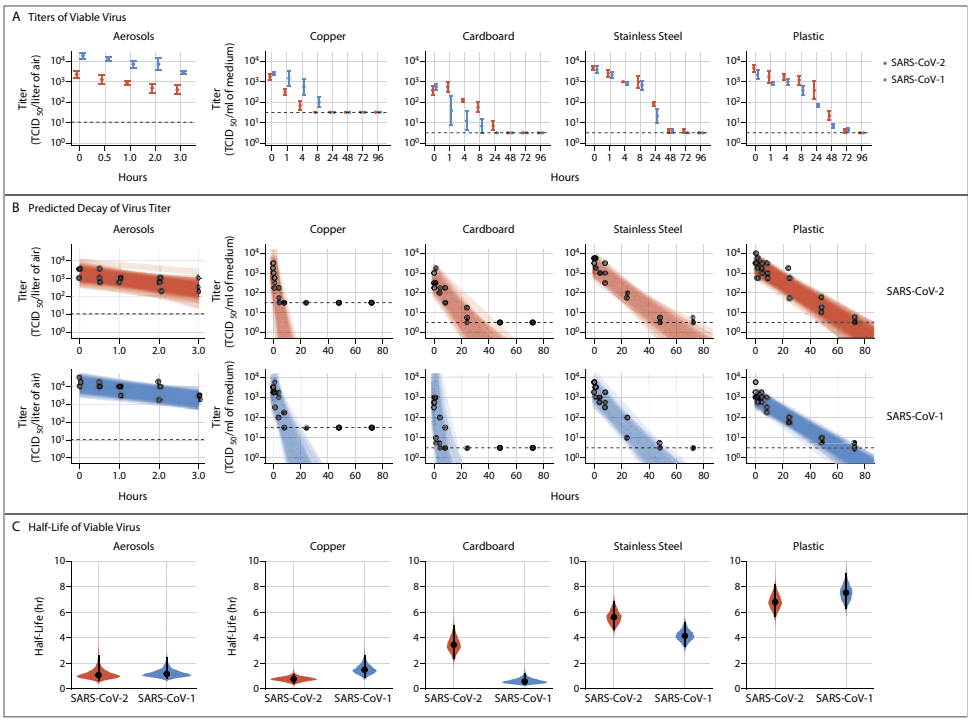

Frequently touched surfaces like IV poles have long been identified as reservoirs for the spread of pathogenic microbes.[1] These can easily contaminate the hands and equipment of healthcare professionals who in turn can transmit these pathogens to patients during routine care leading to Healthcare-associated infections.

Our **Antimicrobial IV Poles protected with CuVerro Shield™ by Aereus Technologies* offers you a solution to this problem.**

CuVerro Shield™ is a unique coating of naturally antimicrobial copper that is applied to our stainless steel poles, ram horns, and u-hooks to deliver outstanding protection to your highest touch zones.

The result? CuVerro® **kills more than 99.9% of bacteria**** within two hours and continues to kill 99% of bacteria** even after repeated contamination.

A US government funded study conducted by researchers at the US National Institutes of Health and the Centers for Disease Control and Protection found that the **HCoV-19 virus remained viable for up to 2 to 3 days on plastic and stainless steel surfaces versus up to 4 hours on copper.[2]**

Viability of SARS-CoV-1 and SARS-CoV-2 in Aerosols and on Various Surfaces. [2]

OR-36770-CUV

* CuVerro Shield™ by Aereus Technologies is a Health Canada Pest Management Regulatory Agency (PMRA) registered process.

**Laboratory testing shows that, when cleaned regularly, CuVerro surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant Staphylococcus aureus, Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, E.coli 0157:H7, and Vancomycin-Resistant Enterococcusfaecalis (VRE). The use of CuVerro® bactericidal copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination.

OR-36502-CUV	**CuVerro Shield™** STAINLESS STEEL U-HOOKS, AND ENDCAP Set of 4
OR-36504-CUV	**CuVerro Shield™** STAINLESS STEEL RAM HORNS (2), STAINLESS STEEL U-HOOK (2), AND ENDCAP Set of 4
V-50002-CUV	**CuVerro Shield™** STAINLESS STEEL URINARY DRAIN HOOK AND, COLLAR WITH KNOB Set of 1

CUSTOM HOOK DESIGNS AVAILABLE TO SUIT YOUR SPECIFIC NEEDS

HEAVY-DUTY RAM HORNS, U-HOOKS OR A COMBINATION OF BOTH AVAILABLE

POLES & HANDLES

ITEM #	DESCRIPTION
V-CUV-50003	**CuVerro Shield™** ROUND STEEL HANDLE
V-CUV-50006	**CuVerro Shield™** STAINLESS STEEL TRIANGULAR HANDLE
V-CUV-50007	**CuVerro Shield™** SEMI-ROUND STEEL HANDLE

THE LARGE PRONG KNOB FOR HEIGHT ADJUSTMENT IS EASY TO TURN EVEN WITH WET HANDS

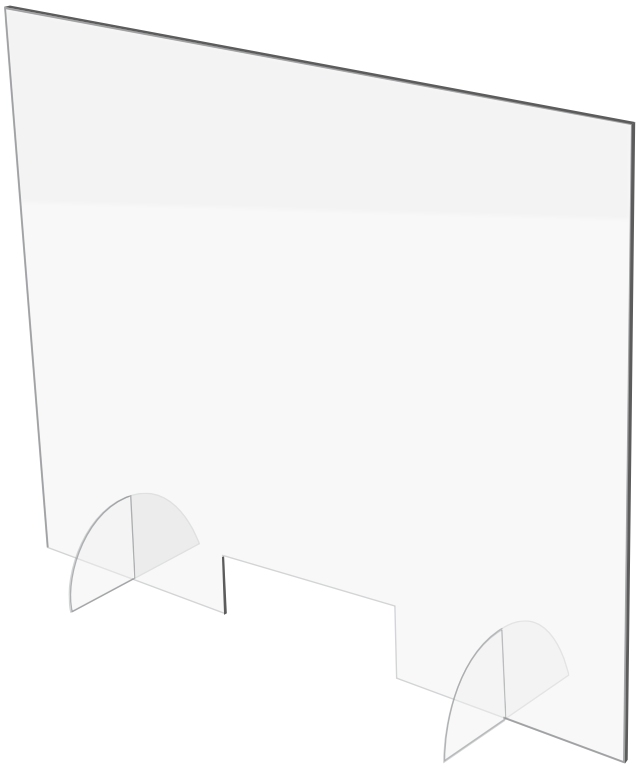

GOOD TO KNOW: In the unlikely event your CuVerro coated IV Pole should become deeply scratched, a study conducted by the University of Waterloo demonstrated that antimicrobial activity of the Aereus coating is maintained even when completely removed up to a width of between 3 and 5 mm, under the test conditions used in this study.[3]

[3] Tanvir S, Anderson WA. 2020. Antimicrobial Activity of "Deeply Scratched" Aereus-Coated Surfaces. Department of Medical Engineering. University of Waterloo. 2020.

PLEXIGLASS PROTECTION PANELS

Our Plexiglass Protection Panels are made of 100% acrylic clear plastic to safeguard face-to-face interaction. They are available in a variety of ready-made standard sizes plus we can create custom sizes/designs to accommodate your specific needs. Our simple and ergonomic design provides the necessary protection for your patients, customers, and community without an imposing presence.

FEATURES

- Multiple dimensions and opening sizes available
- 100% acrylic clear plastic
- Easy to install and move as needed
- Easy to disinfect

STAINLESS STEEL HANDS-FREE DOOR OPENER

The Imperial Surgical Ltd. Hands-Free Door Opener is a 100% stainless steel, foot operated door opener that works on any latch-less door.

Easy to install and easy to clean, the no-touch opener helps minimize the spread of germs by reducing the need to touch door handles where bacteria and viruses may live.

The hands-free door opener comes with an eye catching sticker to put on the door to encourage people to use it. We also provide the hardware so you have everything you need for installation.

dual-flow gastric

Feeding Tubes

The dual-flow gastric tubes are used to prevent the accumulation of gastric secretions and air, thus allowing decompression of the stomach by continuous aspiration without trauma to the gastric mucosa.

nutriSafe2®

A complete range dedicated to safe enteral nutrition. Designed to be fail-safe, the nutrisafe2® system incorporates a unique connection that locks securely so it won't slip apart and yet cannot be connected to a standard 6% tapered luer fitting.

Safe - The risk of misconnection errors is significantly reduced for patient safety.

Secure - Accidental disconnection is nearly impossible, ensuring precious nutrients are received.

Simple - It does not change the technique of the users and therefore does not require any special training.

nutrisafe2® Feeding tubes

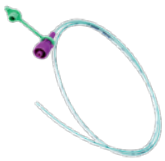

nutrisafe2® feeding tubes are available in a range of sizes, lengths and materials to suit patient needs. Numbered graduations every centimeter aid placement and monitoring, and the rounded tip provides atraumatic insertion.

PVC (DEHP-free): for use up to 5 days.

Polyurethane (PUR): for use up to 30 days.

Silicone: for use up to 30 days.

The nutrisafe2® connection allows the use of these tubes only with other nutrisafe2® devices..

nutrifit

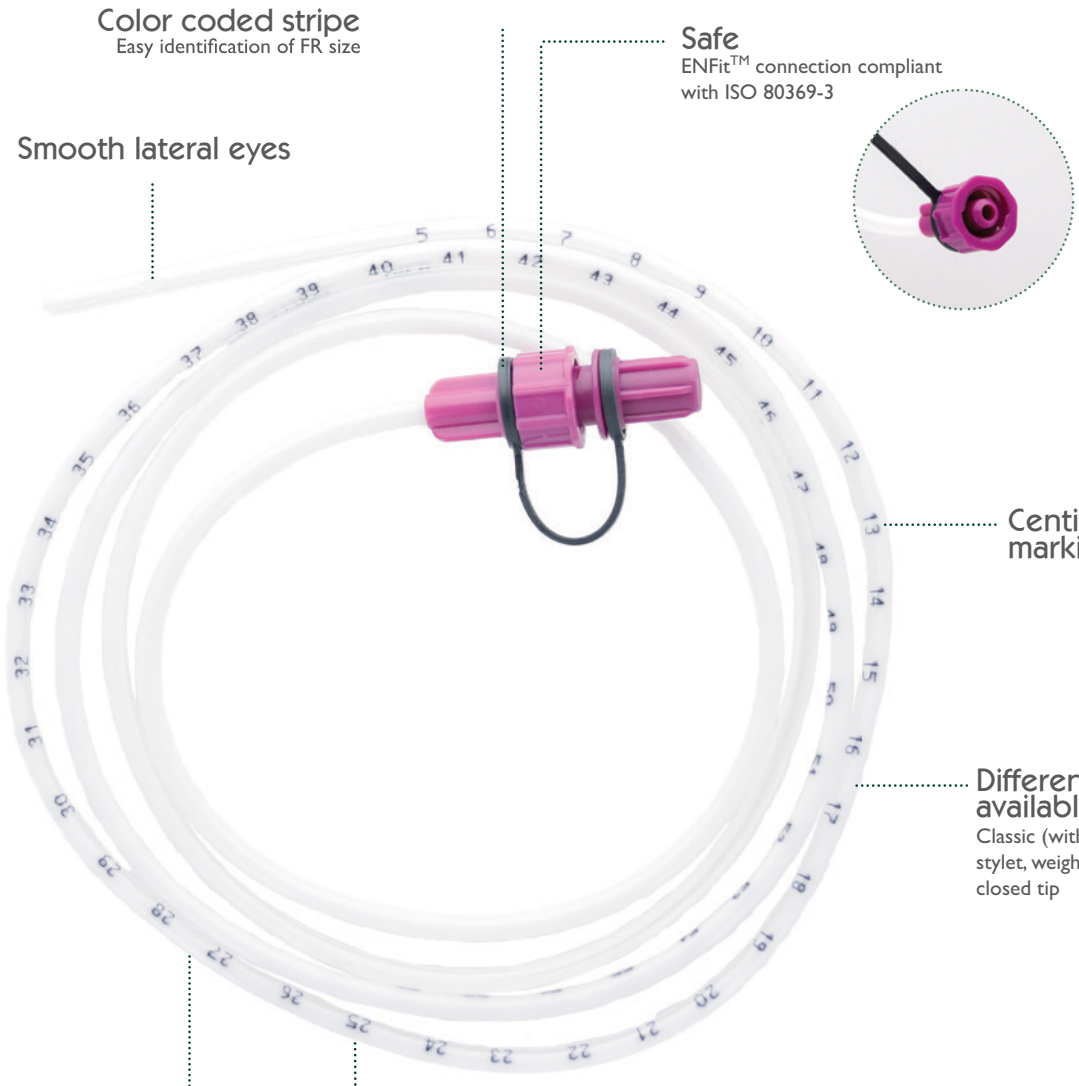

The perfect fit **for pediatrics and adults**

Enteral nutrition is recommended when oral food intake proves impossible or insufficient to meet the patient's nutritional needs. Enteral nutrition contributes to:

- ✓ Preserving normal physiology[1], digestion, and nutrient absorption
- ↘ Reducing:
  - Length of stay[2]
  - Infectious complications[3]
  - Costs[4]
- The reinforcement of the immune system[5]

PVC FEEDING TUBES

Adapted for children and adults, the PVC nutri**fit** feeding tubes are intended to be used for short-term enteral feeding (up to 5 days) and feature the following characteristics:

- Made of PVC
- Closed distal tip with 2 lateral eyes (4Fr to 12Fr) and 4 lateral eyes (14Fr to 21Fr)
- Small cap with color code to quickly identify the size of the tube
- Numerical markings every centimeter:
  - from 5cm to 35cm for codes 364, 361 & 363
  - from 5cm to 70cm for codes 366, 362
- Radiopaque
- Transparent to better visualize the administered solution.

ACCESSORIES
EXTENSION TUBES

STANDARD EXTENSION TUBES

These nutri**fit** extension tubes keep the feeding tube away from the syringe pump or from the feeding pump to improve the patient's comfort.

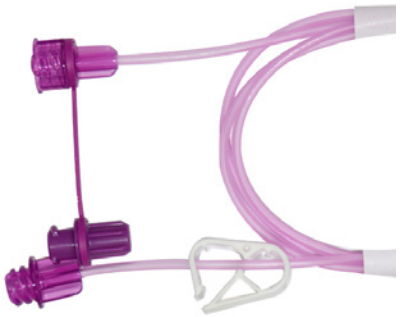

- Purple-coloured PVC extension tube
- Attached cap to close the tube and avoid contamination depending on the reference.

Code	Tube					Quantity
	Length cm	Ext. Ø mm	Int. Ø mm	Priming volume ml	Cap	Units/case
368.097	90	2.5	1.5	1.38	No	200 / case

VYGON

Premicath®

A 1Fr PICC line designed specially for newborns under 1kg

Infants born prematurely weighing under 1kg often need the nutritional and therapeutic support that can only be delivered into their tiny vessels via venous access. At just 1Fr, premi**cath**® has been specially designed for the smallest and most fragile babies to deliver optimum accuracy during placement as well as minimising trauma for patients.

Available with choice of introducers including splitting needle and micro**flash**®

Flushable styletted line

- For checking the line patency
- Stylet allows for clear visual confirmation and easier catheter advancing

Extension line

- Integrated extension with small fixation wings give better catheter stabilisation

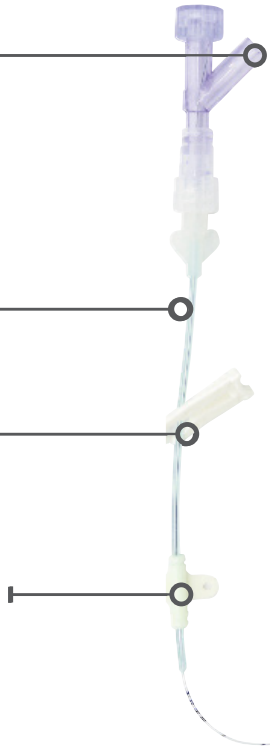

Small round clamp

- Small line clamp for line management

Fixation wings

- Designed to be used with Grip-lok™

X-ray opaque

- X-ray opaque for accurate tip location without additional contrast medium

Small 1Fr gauge

- Minimises vessel trauma and suits the veins of very low weight premature babies (<1kg)

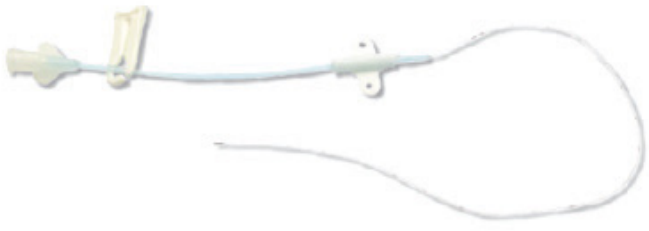

Black markings

- Markings every centimetre with bigger black marking at the tip for accurate catheter placement and confirmation of full catheter removal

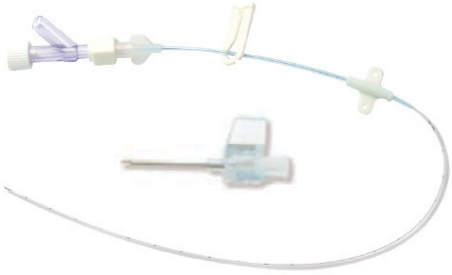

PUR material

- PUR material is firm during insertion but softens with body temperature, which minimises vessel trauma and enhances dwell time

microflash™

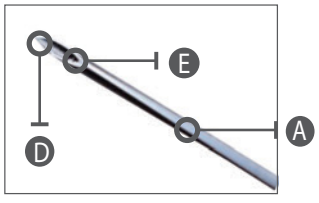

Peelable Introducer/Peelable Safety Introducer*

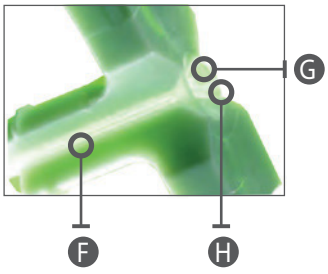

Peelable Introducer for the insertion of PICC & Midline catheters, with notched needle and clear cannula sheath for early detection of blood flashback

Product Code	Size	For catheter	Units/Case
7371.19	20 G	1 Fr / 2 Fr	10

- **A** Top hole needle shaft permits blood flashback between needle & cannula for immediate indication of vessel access
- **B** Short, light weight safety housing for balance and ease of handling
- **C** Curved hub for secure ergonomic fingertip placement
- **D** Tri-bevel needle tip for ease of skin penetration
- **E** Smooth needle to cannula transition reduces drag through the tissue
- **F** Transparent cannula permits immediate blood visualization upon vessel penetration
- **G** Funnel cannula opening to facilitate easy catheter entry
- **H** Radiopaque stripe on cannula for patient safety

*The microflash® Introducer is intended for use as a split cannula introducer used to puncture peripheral veins.

umbilical**catheters**

Single-lumen umbilical catheters

A single lumen umbilical catheter used for venous or arterial access.

Umbilical venous catheters are used for:

- Parenteral nutrition & fluid administration
- Drugs administration
- Venous blood sampling
- Transfusion of blood or blood products
- Exchange transfusion

Umbilical arterial catheters are used for:

- Arterial blood sampling
- Arterial pressure measurement
- Blood pH and blood gas analysis
- Fluids and drugs administration **Umbilical**

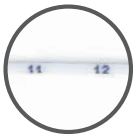

Three-way tap

- Colour-coded caps for venous / arterial identification

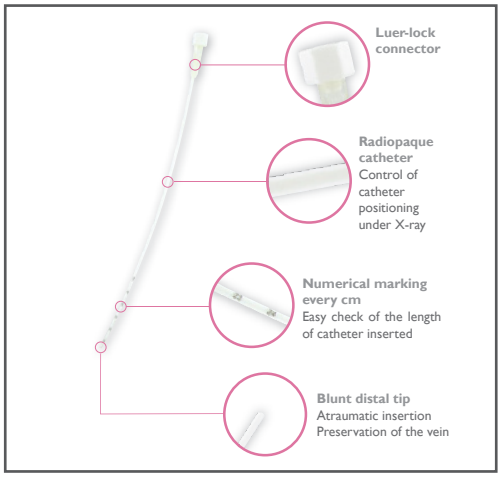

Luer-lock connector

- For efficient connection

Numerical markings every cm

- Make it easy to check the length of catheter inserted

umbilical placement pack

Our umbilical placement pack contains everything required to safely & efficiently place an umbilical catheter

The benefits of our umbilical packs

Cost saving
A complete pack costs less than buying the individual components.

Delivers better patient care
Pack enables Aseptic Non Touch Technique for catheter placement to minimise infections.
Also allows traceability of pack components used.

Reinforces best practice
Pack includes a heat sealed drape (to maximise the sterile barrier) and a safety hypodermic needle (to minimise the risk of accidental needlestick injuries).

Standardises procedures
Consistent clinical practice assured with identical pack contents.

More environmentally friendly
Less waste with a pack compared to multiple packaging of individual components.

Each pack contains

	18G hypodermic safety needle		20G hypodermic safety needle		Scalpel
	Drapes without adhesive		40x40cm fenestrated transparent drape with “Easy-peel”		Drape towels
	1x pair of suture scissors		10x swabs 10x10cm, 8-ply		10x swabs 5x5cm, 8-ply
	1x transparent gallipot 60mL		1x red gallipot 60mL		Outer wrap
	Instructions for use		Umbilical tape		Measuring guide
	Mosquito haemostat curved		Mosquito haemostat straight		Iris forceps full curved
	Iris forceps half curve		Iris forceps straight		Iris forceps straight with teeth
	Needle holder		Measuring tape		1mL syringe
	3mL syringe		5mL syringe		Vessel dilator probe
	3.0 silk suture with curved cutting needle		Tray 20x15x4cm		2x fixation strips

exchange transfusion tray

Set containing the accessories necessary to perform removal and replacement of a patient's blood.

Product Code	Contents	Units/Case
275.001	1x four-way stopcock equiped with 1 injection site (for injections of additional medication)	1
	1x extension tube for evacuation of the discarded blood	
	1x 5Fr exchange transfusion catheter (PVC - XRO) 37 cm long, with 2 sides holes and centimetric markings	
	1x 7Fr exchange transfusion catheter (PVC - XRO) 37 cm long, with 2 sides holes and centimetric markings	
	2x 20 ml Luer-lock syringes	
	1x 10 ml Luer-lock syringe	
	1x 16x0.5 mm (25G) Luer hypodermic needle	
	1x graduated plastic container (2000 ml)	
	1x transfusion set, 163 cm long, 18.8 ml dead volume	
	1x 15 cm ruler for venous pressure measurement	
	3x 50 x 50 mm gauze dressings	
	1x 50 x 60 cm fenestrated drape	
	1x air-venting needle	
	1x control sheet	

goldtrace

The Gold-plated Fetal Scalp Electrode

A message from the heart

Goldtrace® Fetal Spiral Electrode (FSE) is used when fetal heart rate monitoring during labor requires continuous and reliable internal registration. Goldtrace FSE is made of materials whose properties ensure the best-possible-quality signal for CTG.

Goldtrace FSE comes in a flexible protective guide tube that keeps the spiral tip inside the tube during application, protecting the user, mother and baby. The flexibility of the guide tube makes it possible to form according to desired anatomical curvature.

Specifications

- Gold-plated spiral electrode
- Single use only
- Includes disposable applicator
- Not made with natural rubber latex
- Sterile product

Materials

Spiral needle	316 Stainless Steel with 10-25µm Gold

neohelp™

A sterile heat loss prevention suit to deliver life-saving thermal care

Immediately after a premature baby is delivered by c-section, the priority is to place them in a warm and sterile environment. neohelp™ provides this essential protection so other essential Golden Hour care and treatment, including delayed cord clamping, can take place.[2,3]

Integrated adjustable hood

Decreases heat loss through radiation:

- More efficient than a stockinette cap allowing air to pass through the material
- The toggle allows you to adjust to the baby's head

Double layer of soft clear polyethylene

Decreases heat loss through convection and evaporation:

- Creates a warm and humid environment, mimicking the incubator effect
- The thin inner allows for excellent skin contact
- Creates a barrier against drafts
- Allows passage of radiant heat from an additional warming device (if used)[4]
- Transparent material allows vital observations[5]

Pre-shaped foam support

Decreases heat loss through conduction:

- Helps to maintain an open airway by raising the shoulders
- Stabilises the baby's position
- Provides thermal care during transportation
- Provides comfort

Central VELCRO® opening

Provides optimum seal to ensure heat conservation:

- Quick and easy to place around the baby
- Allows full access to the baby's body
- Designed for easy placement of monitoring equipment, IV, umbilical catheters and carrying out Golden Hour care

DISTRIBUTED BY:
ADVANCED SURGI-PHARM INC.
www.advancedsurgipharm.com
Tel.1-800-661-5432

Why is thermal care important?

Thermal care is vital for a preterm infant because they may have unbalanced skin-surface to weight ratio, very little or no capacity to generate heat (brown adipose tissue), inadequate stores of subcutaneous (insulating) fat and immature epidermal barrier. [5,6]

At this vital time, neohelp prevents heat loss through its double layer of soft, clear polyethylene, integrated adjustable hood and VELCRO® seal.

For every 1°C decrease:
Risk of sepsis increases **by 11%**
Risk of death increases **by 28%**[4]

In the first 10-20 minutes,
without any protection,
temperature can fall **by 2-4°C**[7]

Why is delayed cord clamping important?

Provided the baby can be kept warm and does not need immediate resuscitation, the Resuscitation Council UK (RCUK) recommends delayed cord clamping (DCC) for at least 60 seconds whilst breathing is established.[8]
Delayed cord clamping has been shown to reduce the relative risk of:

- Intraventricular haemorrhage by 41% (RR 0.59, 95% CI 0.41 to 0.85)[9]
- Necrotising enterocolitis by 38% (RR 0.62, 95% CI 0.43 to 0.90)[9]

In addition, this procedure increases circulation of blood volume after birth and an improvement in cardiovascular stability, reducing the need for a blood transfusion.

Warm Gel®

Infant Heel Warmer

Uniform heat to reduce heel sticks

WarmGel® Infant Heel Warmer is a gel-filled, disposable heel warmer designed to provide gentle heat to increase blood flow and enhance infant blood sample collection.

WarmGel® Technology

Effective

- Conforms to infant's shape, keeping warmth where needed
- Even heat distribution increases blood flow

Safe

- Non-toxic food-grade gel won't harm infant's skin or eyes
- Single-patient use minimizes risk of infection

Reliable

- Reaches maximum temperature in less than 60 seconds, maintains optimal 104° F for 10 minutes [1]
- Trigger disc minimizes auto-activation during shipment

WarmGel® Versus Liquid

- Conforms to infant's shape
- Provides even heat distribution
- Resists migration, keeping warmth where needed
- Competitively priced compared to liquid-filled products

Item #	Description
24401	Liquid Heel Warmer (100/Box)

TransWarmer®

Transport Mattress

Consistent, Safe Warming for Newborns

The TransWarmer® Infant Transport Mattress provides safe and reliable heat for up to two hours when cold stress is a concern. This thermostable, nontoxic gel mattress nests the infant in soothing warmth, while minimizing vibration during transport. Based on a 24 °C/75 °F start temperature, the mattress reaches a peak temperature of 40 °C/104 °F in less than 60 seconds - quickly improving the infant's admission temperature and reducing the risk of hypothermia.

Features and Benefits

- Comfortable, gel-filled mattress cradles baby in therapeutic warmth
- Gently conforms to the patient's shape for better nesting
- Minimizes the risk of hypothermia in cesarean deliveries
- Better heat distribution increases blood flow
- Disposable heat pack minimizes risk of cross contamination and infection
- Patented disc mechanism is easy to activate
- TransWarmer is nontoxic, latex- and PVC-free
- Use in labour and delivery, NICU, nursery, OR, ER, and transport units
- 10" wide x 16" tall

surfcath™

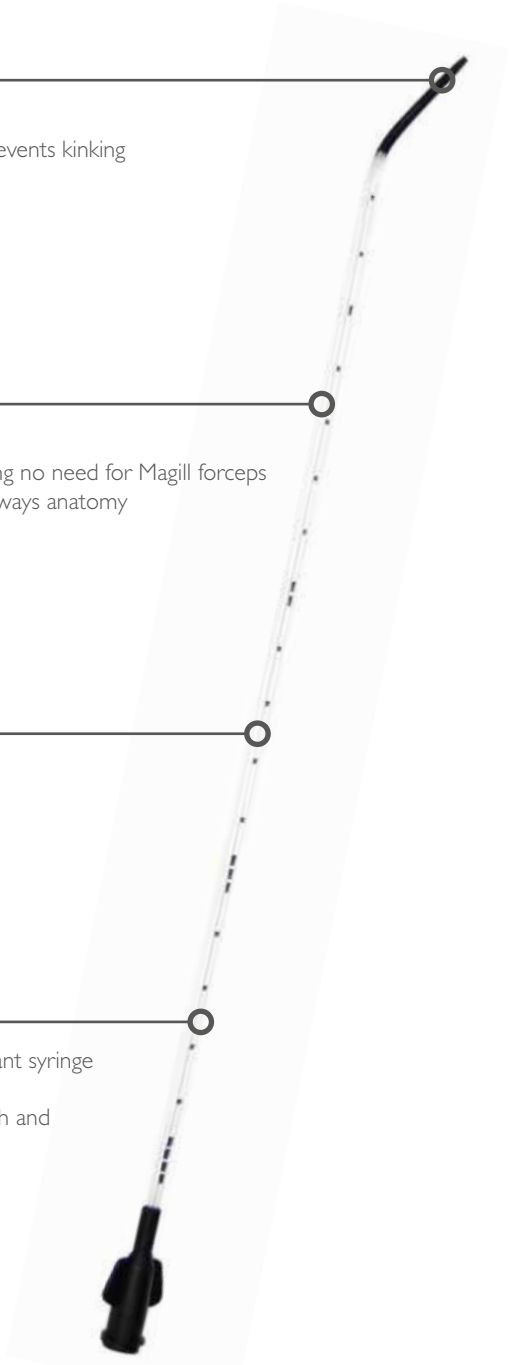

A catheter for surfactant administration using the LISA method

For babies needing treatment for respiratory distress syndrome (RDS), our new surfcath™ uses the LISA (Less Invasive Surfactant Administration) method to place the catheter. It was specifically designed to improve manoeuvrability during placement whilst also eliminating the need for the commonly used Magill forceps.

2cm soft distal black tip

- 2cm mark shows when surfcath™ is in place
- Soft tip minimises risk of tracheal lesions and prevents kinking
- Pre-curved to follow the airways anatomy

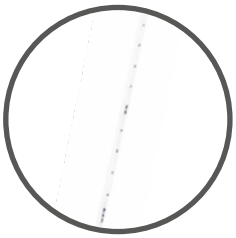

Transparent bendable thermoplastic material

- Transparent material allows visual check on the delivery of surfactant
- Thermosensitive material allows you to curve surfcath™ prior to use meaning no need for Magill forceps
- Semi-rigid material also allows high manoeuvrability, helping to follow the airways anatomy

Less invasive 6Fr gauge

- No obstruction of the airways allowing spontaneous breathing
- Low dead space (0,2 mL)

20cm length with cm markings

- Longer length eases manipulation of the surfactant syringe away from the patients head
- Centimetre markings indicate the inserted length and check that surfcath™ stays in place

Treating respiratory distress syndrome (RDS)

RDS is the most common lung disease in premature infants and is a pulmonary disorder resulting from a surfactant deficiency. In Europe RDS is observed for about 90% of babies born at 24 weeks and for 80% babies born at 28 weeks of gestation.[10]

International guidelines recommend

- Preterm infants should be managed without mechanical ventilation where possible
- CPAP (Continuous positive airway pressure) with early rescue surfactant is considered optimal management for babies with RDS
- LISA is the preferred mode of surfactant administration for spontaneously breathing babies on CPAP, provided that clinicians are experienced with this technique. [10]

endotracheal tubes

Single and double lumen tubes in PVC (DEHP-free) for emergency oral or nasal intubation and routine anesthesia. Double lumen tubes have secondary lumen for surfactant administration or airway monitoring.

- Radiopaque
- 15mm adapter
- Markings every half centimeter

Single lumen tubes are also available as a soft tube designed to minimize tracheal damage during long term intubation.

mucus extractors

Mucaid allows for quick and safe suctioning and sampling of the upper respiratory tract in the newborn using mechanical / wall suction. This avoids the dangers of self-contamination inherent in oral suctioning (De Lee method).

Included in the range are Mucaid with a secure threaded cap for safe transportation of sample for testing and Mucaid with a filter to prevent any mucus or amniotic fluid from passing through into the line.

Meconium aspirators allows for suctioning below the vocal cords to clear meconium from the lungs and airways.

- Finger tip control
- Endotracheal tube and endotracheal tube hub
- Rounded, soft tip
- Centimeters every half centimeter

nasal ventilation

Single ventilation tube

Single silicone nasal tubes designed to reduce the stress related to ventilation and to improve the comfort of premature babies and newborns.

- Open tip
- 15mm adapter

Single ventilation tube

Double tube in silicone for nasal neonatal ventilation

Length of tube on 2 branches: 6 cm, except code 2596.30: 7 cm.

Open and rounded distal tips and centimetric markings.

The proximal end has an ISO standard 15 mm adaptor. This tube is specially designed to avoid tracheal intubation which is very traumatic, and to improve the comfort of premature babies and neonates.

4 sizes are available: Ext. Ø 2.7 mm - 3.4 mm - 4.0 mm - 5.0 mm

Manual Resuscitator / Ventilator

SAFE SPOT

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE

Ventlab

SafeSpot™
SS3200-Series
Shown with integrated pressure manometer, pop-off valve, inflatable mask and inflatable O_2 reservoir

SafeSpot™

- Single patient use resuscitation/ventilation system designed specifically for infant patients
- Bag features ultra-thin 'spots' to provide an enhanced tactile feel for lung compliance and increased patient safety
- Integrated pressure manometer promotes proper delivery (<20 cm H_2O) to guard against over-pressurization of babies' fragile lungs; the tri-color fields alert to the risk level of delivered pressure
- Accurate pressure delivery helps reduce barotrauma or pneumothoraces
- Pop-off valve (40 cm H_2O and 25 cm H_2O available) enables clinicians to use the pop off level appropriate for a given patient population creating a greater margin of safety for the baby
- Optional Vent Mask in various sizes available
- Select from a variety of components to assemble a custom resuscitation bag to meet your unique patient needs

CUSTOMIZE YOUR MANUAL RESUSCITATOR

Choose from the following components to create a custom resuscitation/ventilation bag to best meet your needs:

SAFETY COMPONENTS

INTEGRATED PRESSURE MANOMETER

Ventlab's innovative color-coded dial clearly denotes pressure delivery:
Green -Target pressure level <20 cm H_2O
Yellow - Potentially dangerous pressure level
Red - Dangerous pressure level

POP-OFF VALVES

40 cm H_2O & 25 cm H_2O
Allows clinician to use an appropriate pop-off level

FILTERS

A bacterial/viral filter provides effective protection for the healthcare provider during expiration

CO_2 INDICATOR

Choose from STAT-Check II or MaxCap for effective assessment of CO_2 exchange

PEEP VALVES

Adjustable PEEP valves;
5-20 cm/H_2O

SafeSpotTM, SS3200-Series
Shown with integrated pressure manometer, pop-off valve, inflatable mask and corrugated tubing

SafeSpot™ bags come standard with an inflatable Vent Mask

OXYGEN RESERVOIRS

INFLATABLE O_2 BAG

Closed system oxygen reservoir delivers higher FDO_2 and provides visual indication of proper airflow

CORRUGATED TUBING

For use with secondary oxygen supply; available in 24" and 48" lengths

CONVENIENCE COMPONENTS

FACE MASKS

Inflatable and non-inflatable face masks available

FLEX NECK

Removable, flexible joint allows corrugated tubing
to be joined with the patient valve; also reduces the torque on ET tube

INCA®
Infant Nasal CPAP Assembly

INCA® Infant Nasal CPAP Assembly is the most respected Continuous Positive Airway Pressure (CPAP) device among clinicians. INCA affords all the benefits of CPAP/Bubble CPAP for newborns in your care.

Features enhanced precision fit for neonates:

- Five anatomically proportional nasal cannula sizes for neonates
- Clear, extra-soft tubing provides custom shaping and maximal stability
- Chin strap is available to help prevent air leakage around the mouth
- Available in Complete and Replacement Sets

INCA COMPLETE SET

Consists of a nasal cannula, two lengths of Stay-Flex tubing, two tubing adapters, one in-line ''T'' pressure adapter, a knit cap with hook/loop strap, two foam blocks and a hook/loop chin strap. One INCA Sizing Gauge is included in every box of five sets.

Item #	Description
44-2707	Set with 7.5 Fr Cannula (5/Box)
44-2709	Set with 9 Fr Cannula (5/Box)
44-2710	Set with 10.5 Fr Cannula (5/Box)
44-2712	Set with 12 Fr Cannula (5/Box)
44-2715	Set with 15 Fr Cannula (5/Box)

INCA REPLACEMENT SET

Includes the nasal cannula, two lengths of Stay-Flex tubing, two tubing adapters and one in-line pressure ''T'' adapter.

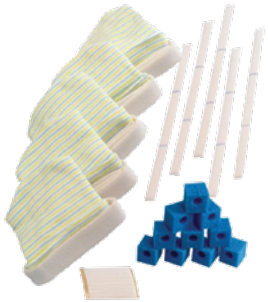

Item #	Description
44-0707	Set with 7.5 Fr Cannula (5/Box)
44-0709	Set with 9 Fr Cannula (5/Box)
44-0710	Set with 10.5 Fr Cannula (5/Box)
44-0712	Set with 12 Fr Cannula (5/Box)
44-0715	Set with 15 Fr Cannula (5/Box)

INCA ACCESSORY PACK

Includes five knit caps with hook/loop strap, five chin straps with ten hook fasteners (not attached) and ten foam blocks.

1 Pack = 5 Hats and 10 Foam Blocks

Item #	Description
44-2001	X-Small Pack (5 XS Caps, 10 Foam Blocks)
44-2002	Small Pack (5 S Caps, 10 Foam Blocks)
44-2003	Medium Pack (5 M Caps, 10 Foam Blocks)
44-2004	Large Pack (5 L Caps, 10 Foam Blocks)

INCA NASAL SIZING GAUGE

For appropriate nasal prong fitting, use the INCA Sizing Gauge. Wipe gauge with sterile 70 percent isopropyl alcohol prior to each use. Hold the gauge up to the nasal area to determine appropriate cannula size.

Item #	Description
025-001	INCA Nasal Sizing Gauge (1/Pack)

NEO-fit™

Neonatal Endotracheal Tube Grip

CA CE

Facilitates Endotracheal Tube Management

The NEO-fit provides quick, secure endotracheal tube stabilization. Designed to firmly grip a Neonatal endotracheal tube, NEO-fit utilizes metal clips to mechanically grip the soft material of the tube. The device is positioned on baby's face using a hydrocolloid adhesive that is hypoallergenic and Hook / Loop strap that allows for rapid release and readjustment of the tube. MRI Conditional.

Item #	Description
42-2540	NEO-Fit Neonatal Endotracheal Tube Grip Set (20/Box) Each Set includes: (1) plastic tube grip, with hook/ loop strap, (2) foam foot pads, (2) foam "lollipop" tapes. Non-sterile.

NEO-prep™

Skin Barrier

CE

A must-have product for your CPAP patients. Protect their tender tissues during this critical therapy. Neo-prep Skin Barriers are precut and non-sterile.

Item #	Description
44-8000	Precut Hypoallergenic Skin Barrier, non-sterile, small (10/Box)
44-8001	Precut Hypoallergenic Skin Barrier, non-sterile, large (10/Box)

Os Finder™

Cervical Os and Canal Dilator

The Os Finder naturally seeks and gently opens the cervical Os. Made of an extremely smooth and malleable Teflon-like material, this instrument is ideal for use in intracervical dilation or uterine sounding, or for intrauterine procedures.

DEVICE DESCRIPTION

The sterile, single use Os Finder™ naturally seeks and gently opens the cervical Os. It is made of extremely smooth and malleable teflon-like material. The dilator is 21.5 cm long with a taper from 2 to 4 mm. CAUTION: Federal restricts this device to sale by or on the order of physician.

CONTRAINDICATIONS

This instrument should not be used under any of the following conditions:

- Pregnancy or suspicion of pregnancy
- Acute or active inflammation of the cervix, endometrium, fallopian tube, ovary or peritoneum
- In the case of cervicitis, endometritus, tubo-ovarian inflammatory disease or pelvic inflammatory disease
- Invasive cancer that is visible on examination

PRECAUTIONS

Do not use the Os Finder if the package or instrument are damaged.

INDICATIONS FOR USE

This instrument is ideal for use in intracervical dilation, uterine sounding, or for intrauterine procedures.

DIRECTIONS FOR USE

The Os Finder is used to find the external Os by simply pushing the narrow end gently against the cervix until it finds its way. Further insertion of the flexible tip will follow the natural path of the canal until it reaches and goes through the internal Os. Dispose of in accordance with all applicable Federal, State and local Medical/Hazardous waste practices.

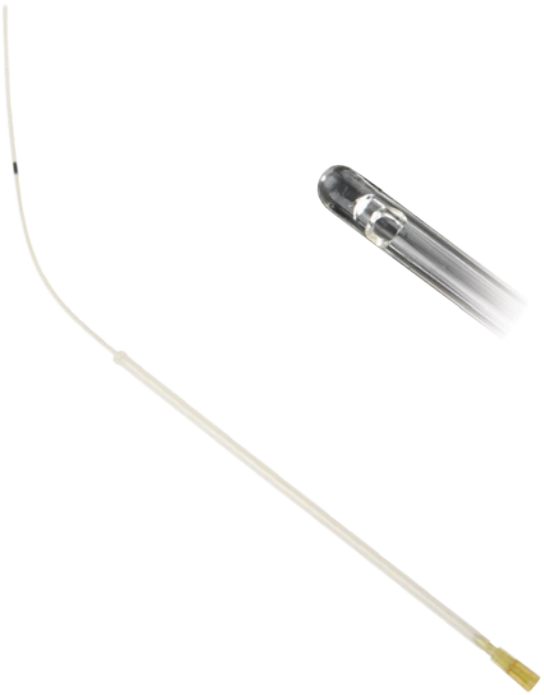

Item #	Description
1176	Os Finder (50/Box)

CE

Tampa Infusion Catheter

For sonohysterography - the simple, cost-effective choice for ultrasound examination of the uterus.

- Unique introducer sheath (33 cm long) facilitates insertion into cervical Os with minimal trauma
- 7 cm marker provides optimal placement of catheter tip in uterus
- Balloonless configuration is ideal for postmenopausal patients with stenotic cervical canals, as well as for many nulliparous patients
- Small catheter size allows easy placement next to ultrasonagraphy probe

Item #	Description
61-2005	Tampa Catheter (20/Box) 5 French, clear, flexible catheter with introducer sheath, 33 cm long, sterile

CE

H/S Catheters

For Enhanced Visualization of Uterine Pathology

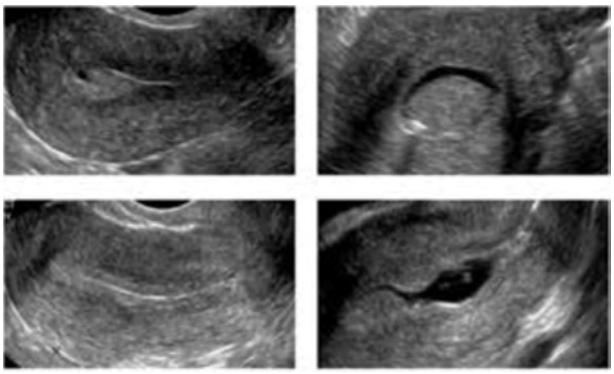

H/S CATHETER SET

These easy-to-use devices provide enhanced visualization. Designed for use in sonohysterography and hysterosalpingography, the catheter can be used with oil- or saline-based media depending on the procedure requirements.

Features and Benefits

- Available with integrated stylet for easy insertion
- Unique placement sheath eliminates the need for a tenaculum
- Comes in both 5 and 7 French
- Ideal for office use
- Latex-Free construction

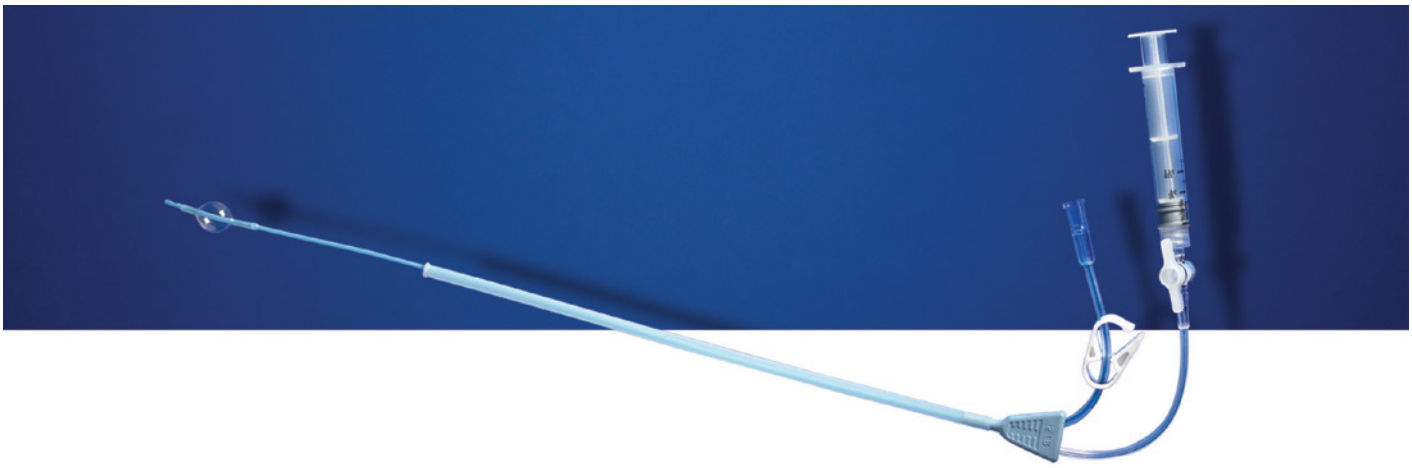

Pre-Saline Infusion Post-Saline Infusion

Item #	Description
61-5005	H/S Catheter, Kraton, 5 Fr (10/Box)
61-5007	H/S Catheter, Kraton, 7 Fr (10/Box)

61-3007	H/S Catheter with integrated Stylet 7FR (10/Box)

H/S Elliptosphere™ Catheter Set and Tray

The Safe and Simple Answer for Both Sonohysterography and Hysterosalpingography

The patented Elliptosphere H/S catheter offers several advantages over the traditional balloon catheters including the ability to gradually inflate the balloon for placement in any size cervical canal, the ability to see the entire lower uterine segment during an SIS procedure, and greater patient comfort.

The Elliptosphere balloon contour and variable size permit secure placement in the cervical canal or uterine cavity for optimal visualization. The balloon's unique design prevents retrograde leakage of distension media, which facilitates peak uterine distention. A small catheter size enables placement next to ultrasound probe for minimal patient discomfort. The H/S Elliptosphere Catheter can be used with oil- or saline-based medium. Available in two versions – with and without an integrated stylet – the H/S Elliptosphere features latex-free construction.

Item #	Description
61-4005	H/S Elliptosphere Catheter, 5 Fr (10/Box)
61-4005S	H/S Elliptosphere Catheter Set with Integrated Stylet (10/Box)

Comfort Belly Bands

Abdominal Fetal Monitoring Band

A lighter, cooler abdominal fetal monitoring band, Belly Bands will be appreciated by your patients as they hold vital tocos and transducers firmly in place. Belly Bands are available in a wide range of widths to comfortably cover any patient abdomen.

Features and Benefits

- Breathable material helps wick away moisture from the mother's skin
- Lighter and cooler to ensure patient comfort
- Flexible precut lengths cover the belly and secure transducer placement
- Available in 30-foot rolls or individually wrapped packages of precut 14" lengths
- Choose from 10-inch to 18-inch widths
- Economical, easy-to-use product

Item #	Description
13010	10" Width Belly Bands on Roll (10" x 10 yds) (1 Roll)
13014	14" Width Belly Bands on Roll (14" x 10 yds) (1 Roll)
13015	14" Width Belly Bands - Precut (14" x 14") (25/Box)

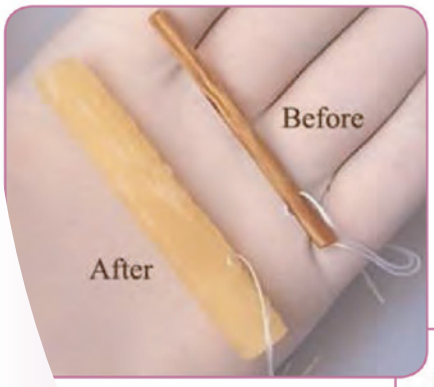

CA CE

LAMINARIA

MedGyn's Laminaria is all-natural cervical disposable and sterile dilator made from a sea-grown plant containing no synthetic materials. Laminaria provides gentle, gradual dilation.

Features & Benefits

MedGyn's disposable and sterile Laminaria is all-natural cervical dilator made from a sea-grown plant containing no synthetic materials. Safely used for over a century, Laminaria provides gentle, gradual dilation. Once inserted into cervical canal, Laminaria absorbs liquid, swelling several times its initial dried diameter, gently dilating the cervix.

McMahon Laminaria Inserter

MedGyn Laminaria Inserter

Indication for use:

Laminaria should be considered whenever cervical dilation and/or softening of the cervix is desired. Some examples are: cervical stenosis, related to dysmenorrhea, considered a possible cause of infertility, resulting from cauterization or conization, placement and removal of intrauterine devices, induction of labor, radium placement, curettage and drainage of uterine cavity, endometrial biopsy, and suction cannula aspiration.

Standard, approx. length 60mm

021003 Laminaria 3mm Small

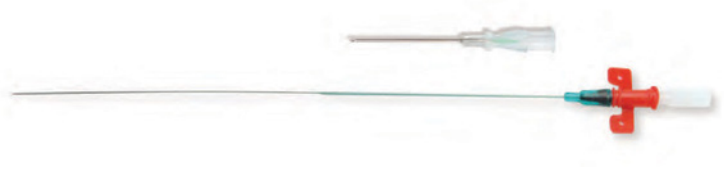

leadercath

Arterial LeaderCath (PE)

Although it can be inserted in a variety of arteries, the most common sites for the placement of this catheter are the radial and the femoral artery.
The Seldinger technique makes arterial puncture easier particularly in hypotensive patients with a weak peripheral pulse and when arteries are atherosclerosed or narrow.

The product is supplied in a rigid blister pack containing:

- 1 introducer needle
- 1 straight guidewire
- 1 transparent and radiopaque catheter in polyethylene with winged hub

Product Code	Catheter						Puncture Needle				Guidewire		Unit/Box

lectrospiral®

Coiled extension tube

Lectro**spiral**® is a flexible coiled extension tube that provides patients with freedom of movement.

Flexible

- Coiled tubing expands and contracts providing patients with greater freedom of movement than straight extension lines.
- Ideal to use with pediatric, home care and oncology patients.

Safe

- Polyethylene material allows for compatibility with commonly infused drugs and reduces adsorption, absorption or permeation that may occur with PVC.
- Extension tubing minimizes potential of trauma at IV site.

Rapid Infusion

INFU-SURG® PRESSURE INFUSION BAG

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE

Ethox

Three-way stopcock ensures precise control of pressure while the large oval bulb allows for quick bladder inflation, all with ONE hand

Solution bag hook enables easy bag changing without having to remove the Infu-Surg from the IV pole; keeps fluid bag in proper position while in use

360° view of the color-coded gauge facilitates accurate pressure monitoring while the safety pressure relief valve prevents over-inflation

- Ideal for intravenous and intra-arterial infusion treatment including A-line pressure monitoring
- Pressure relief valve prevents over inflation (330 mm Hg pressure relief)
- Large, oval shaped bulb allows for quick and easy inflation of bladder
- Single-handed inflation and deflation design makes it easy to use and requires minimal training
- Dedicated fluid bag hook enables efficient loading and unloading of the system without having to remove the infusion bag from the IV pole
- Reinforced hanging loop allows for quick and easy hanging on IV pole
- Color-coded gauge makes for accurate pressure monitoring (150-300 mm Hg)
- Three-way stopcock ensures precise control of pressure
- Piston-style gauge allows for 360° visibility

Rapid Infusion

INFU-SURG® CLARITY PRESSURE INFUSION BAG

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE

Ethox

Clear panel enables full visibility of solution bag to monitor fluid level and easily scan patient barcode

- Transparent panel for clear visibility of solution bag
- Ideal for intravenous and intra-arterial infusion treatment including A-line pressure monitoring
- Dedicated hook enables quick change of solution bag while providing proper fluid bag positioning in pocket
- Pressure relief valve prevents over-inflation (330 mm Hg)
- Color-coded gauge provides accurate pressure monitoring (150-300 mm Hg)
- Single-handed inflation and deflation with oval-shaped bulb makes it easy to use and requires minimal training
- Welded panel and hook construction are more durable than sewn designs to withstand repeated use
- Reinforced hanging loop allows for quick and easy hanging on IV pole
- Three-way stopcock ensures precise control of pressure
- Piston-style gauge allows for 360° visibility

Three-way stopcock ensures precise control of pressure while the large oval bulb allows for quick bladder inflation, all with ONE hand

Solution bag hook enables easy bag changing without having to remove the Infu-Surg from the IV pole; keeps fluid bag in proper position while in use

360° view of the color-coded gauge facilitates accurate pressure monitoring while the safety pressure relief valve prevents over-inflation

ASEPT® Catheter and Insertion Kits

The ASEPT® Pleural and Peritoneal Drainage Systems are designed for long-term, intermittent drainage of symptomatic, recurrent fluid accumulation.

1. ASEPT® Catheter
2. ASEPT® Drainage Line
3. 5-in-1 Drain Line Adapter
4. Chloraprep® 10.5mL Vial
5. Synthetic Suture, 2-0 Straight and Synthetic Suture, 3-0 Curved
6. 16G x 1.0" (25.4mm) Needle
7. 25G x 1.0" (25.4mm) Needle
8. 22G x 1.5" (38.1mm) Needle
9. Tegaderm® Self Adhesive Dressing
10. Gauze Pads, 4"x4"
11. Foam Catheter Pad
12. Introducer Needle
13. Tearaway Introducer
14. 8F (2.67mm) Dilator
15. 12F (4.0mm) Dilator
16. 10mL Syringe
17. J-Tip Guidewire
18. Tunneler
19. Forceps
20. Safety Scalpel
21. Fenestrated Drape

The primary component of the ASEPT® Drainage system is the catheter, which has an aseptic, self-sealing valve attached that provides a secure and reliable connection. The valve can be connected to an ASEPT® vacuum drainage bottle, drainage bag, or a stand-alone drainage line to connect to other fluid collection equipment.

Features:

- Secure connection
- Cap-less and Aseptic design
- Needle-free and swabable
- Easy to replace
- Self-sealing

ASEPT® Catheter Portfolio

Long-Term Intermittent Drainage Solution

The pfm ASEPT™ Catheter System is designed to provide controlled, long-term, intermittent drainage for patients with pleural effusions and malignant ascites — supporting symptom relief in hospital or outpatient settings.

Here are a few key features of the PFM Catheter 15Fr

- Designed for long-term, intermittent drainage of pleural effusions (M7001-CAN) and malignant ascites (M7008-CAN).
- Aseptic, needle-free, swab-able valve helps maintain a secure and hygienic catheter connection.
- Carefully engineered to allow periodic access to the pleural or peritoneal cavity for symptom relief.
- Included in the kit with most items generally required for catheter implantation, streamlining the procedure.
- Works with compatible drainage lines, bottles, or bags for flexible clinical or outpatient use.

Single Catheter Platform for Pleural & Peritoneal Use

Designed for procedural efficiency and flexible patient management.

15Fr Silicone Catheter

Smooth, flexible design for patient comfort and reliable, long-term placement.

M7001-CAN - 66 cm

Designed for pleural effusions.

M7008-CAN - 71 cm

Designed for malignant ascites

Aseptic Needle-Free Swabable Valve

Helps maintain a secure, hygienic connection and reduces infection risk.

Engineered for Intermittent Drainage

Allows periodic access to the pleural or peritoneal cavity for symptom relief.

Complete Implantation Kit

Includes most items generally required for safe and efficient catheter placement.

ASEPT® Roadmap

Integrated Pathway for Long-Term Intermittent Drainage

1 Patient Consultation & Catheter Placement

Patients are scheduled and seen by their surgeon for ASEPT® catheter insertion either Pleural (M7001-CAN) or Peritoneal (M7008-CAN). Patients equipped with an IPC catheter require ongoing drainage as directed by their healthcare provider.

2 pfm Universal Valve Replacement

Many patients have IPC catheters with brand-specific valves that are only compatible with certain bottles. This creates challenges during urgent or emergency drainage situations.

pfm offers a universal Luer-Lok valve that can be replaced bedside, allowing compatibility with any Luer-Lok connection (including wall suction), and most importantly, enabling use with pfm drainage bottles for immediate relief.

3 Clinical Drainage - Jet-Vac

Following insertion, patients may require periodic drainage in clinic. pfm Jet-Vac vacuum bottles are available in 600 mL, 1000 mL, and 1500 mL volumes. Options include attached drain lines, valve-only configurations, and sampling ports for patients requiring additional testing.

4 ASEPT® Patient Homecare

For patients draining at home, pfm offers ready-to-use, patient-friendly drainage kits. These include personal-use bottles and all necessary dressing materials in a convenient carrying case.

This solution is ideal for both individual patient use and home healthcare teams conducting home visits.

Designed for long-term, intermittent drainage of symptomatic fluid accumulation.

JET-VAC Drainage Bottles

Breakdown

- Available in three sizes:
  - 600 mL
  - 1,000 mL
  - 1,500 mL
- Available in two configurations:
  - Drain line featuring sampling port for easy access to contents of bottle via luer-lock syringe:
    - Connection is made at catheter level
    - Drain line cannot be removed or changed
  - Luer-lock valve:
    - Connection is made at bottle level
    - Fluid samples can also be drawn with luer-lock syringe connected directly to valve
    - Internal Sterility

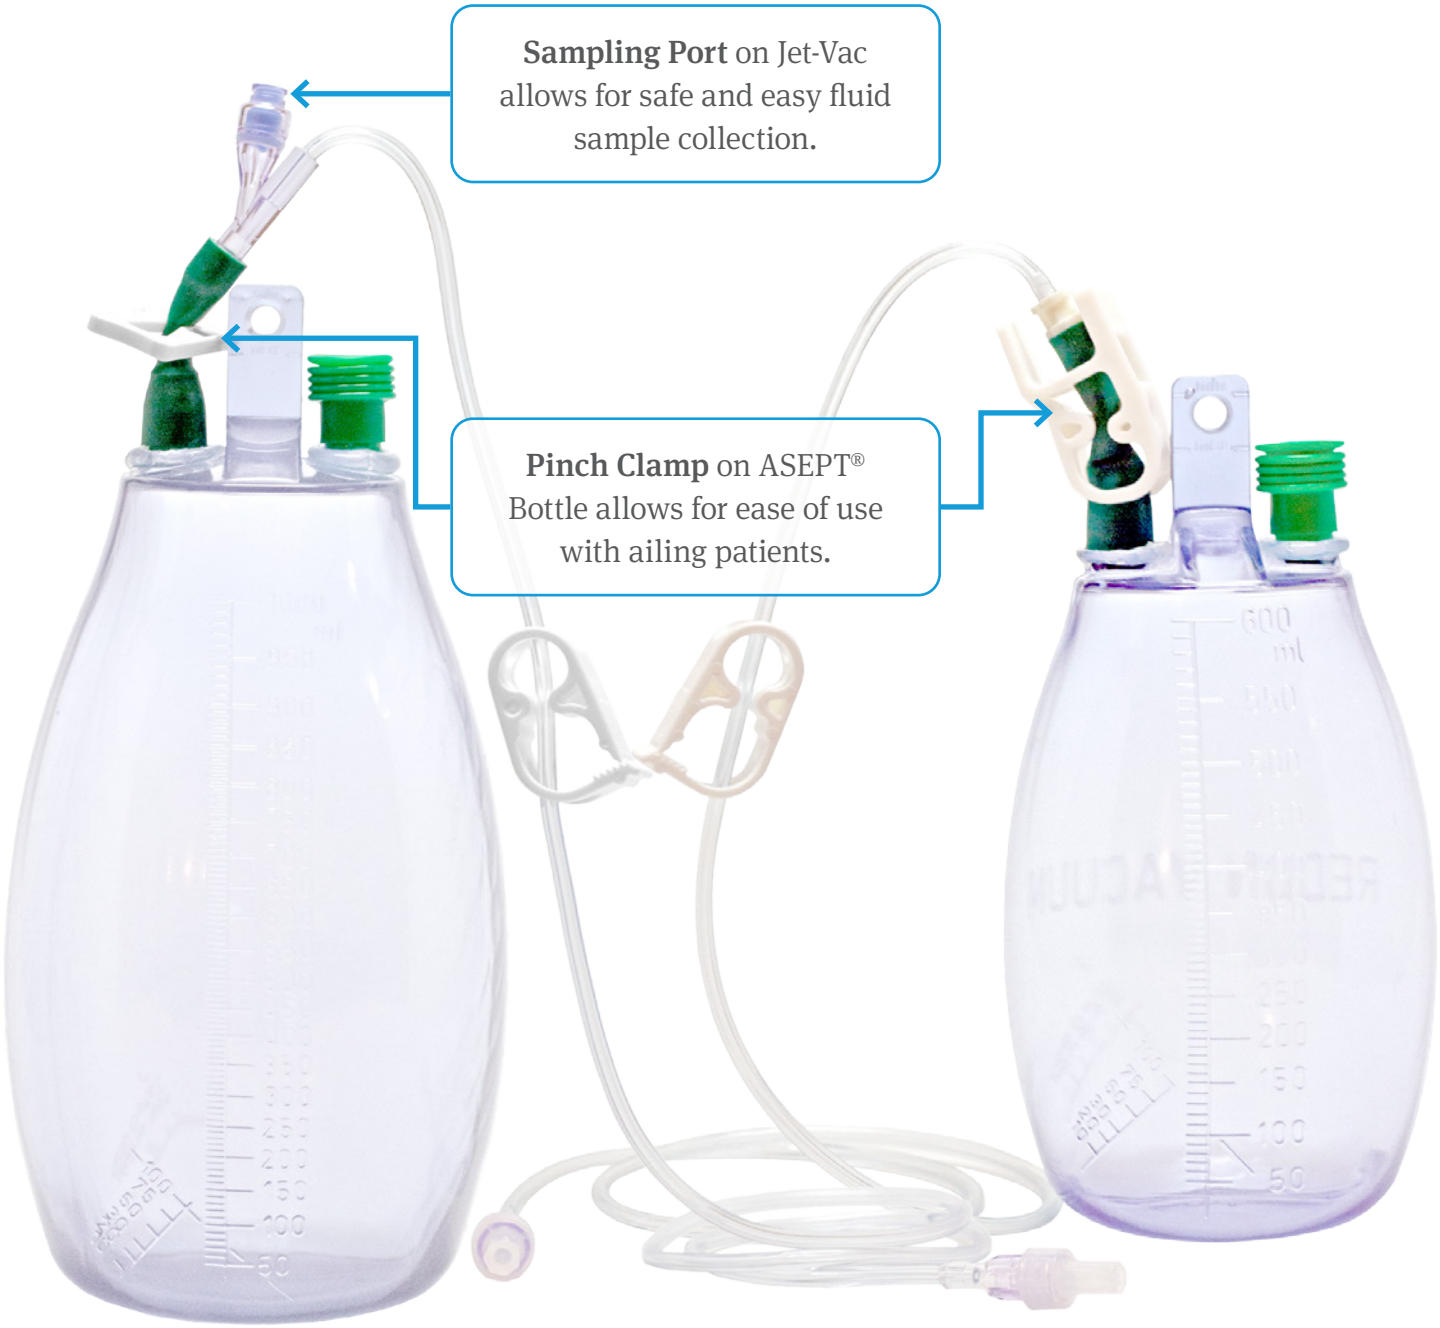

ASEPT®

Breakdown

- Available in two sizes:
  - 600 mL
  - 1,000 mL
- Only available with drain line can be used to regulate flow, should patient feel any discomfort during drainage procedure.

Differences between ASEPT® and Jet-Vac Drainage Systems

JET-VAC®

Jet-Vac Centesis Catheters, Jet-Vac Procedure Trays and Jet-Vac Bottles provide a complete drainage system for physicians, nurses, and hospitals. The Jet-Vac drainage bottle is a disposable vacuum device used to aspirate, remove, or sample body fluids.

Jet-Vac Centesis Catheters

Large circular side holes designed to increase fluid drainage

Tapered catheter tip

- Provides a smooth transition
- Helps minimize patient discomfort

HDPE material

- Reduces catheter collapsing
- Promotes a smooth catheter insertion

Clear needle hub with cathet er lock

- Increases fluid visibility
- Ergonomic design provides a secure grip
- Prevents needle/catheter separation

Plastic vent plug

- Allows for air to exit
- Provides added safety for physician

Echogenic needle

- Ensures needle visibility during ultrasound placement

Bronchitrac® "L" Set

There is no need to twist the catheter or patient's body. Simply advance the Bronchitrac® "L'' through a properly placed endotracheal or tracheostomy tube. The dual-plane, patented curvature of the catheter ensures consistent entry into the left main-stem bronchus.

The time savings and reduced patient trauma provided by the Bronchitrac® "L'' make it the obvious choice when suctioning the left-bronchial airway.

- Ideal for suctioning of post-cardiac surgical, neuro and critical care patients
- Can be used for deep-lobe suctioning
- Completely latex-free

Item #	Description
41-7814	21" long, 14 Fr Bronchial Suction Catheter, Slide-cover Connector and (2) Vinyl Gloves, Sterile (20/Box)

TRAKE-fit™ Collar Set

Tracheostomy Tube Holder For Maximum Patient Comfort

- Available in single- or double-collar sets
- Installs in seconds, remains secure
- Maximum comfort with cotton-lined neckband
- No adhesive, no narrow tape
- Completely adjustable
- Narrow tabs available for pediatric and small adult use
- Third-party reimbursable

Item #	Description
43-1850	Double Collar Set (25/Box) Each Set includes: (2) neckbands, (2) wide hook/loop tabs
43-1851	Single Collar Set (25/Box) Each Set includes: (1) neckband, (2) wide hook/loop tabs
43-1862	Double Collar/Narrow Tab Set (25/Box) Each Set includes: (2) neckbands, (2) narrow hook/loop tabs

CA CE

COMFIT™ Endotracheal Tube Holder

The Tapeless Way to Secure an Endotracheal Tube

COMFIT™ is a reliable, tapeless solution used to secure endotracheal tubes and better manage patient airways. Physicians appreciate COMFIT'S compliance with Advanced Cardiac Life Support (ACLS) Guidelines that recommend endotracheal tube stabilization devices as a substitute for tape. For patients, COMFIT™ provides a comfortable fit without the skin irritation that tape can cause.

Features and Benefits

- Significantly decreases the incidence of self-extubation [1]
- Wide cotton-lined neckband minimizes skin irritation, providing maximum patient comfort
- No tape on the tube or the patient
- Completely adjustable
- Minimal plastic loop around the endotracheal tube allows access to the oral cavity
- A low-cost device that requires infrequent changing
- Latex-free product
- Complies with American Heart Association's ACLS Guidelines recommending the use of commercially available endotracheal tube holders instead of tape
- Plastic double securing loop, ½- x 19-inch neckband

1 McAndrew J, RR. Reduction of self extubation using Comfit™ tracheal tube holder. Respiratory Care. November 1994: 39 (11).

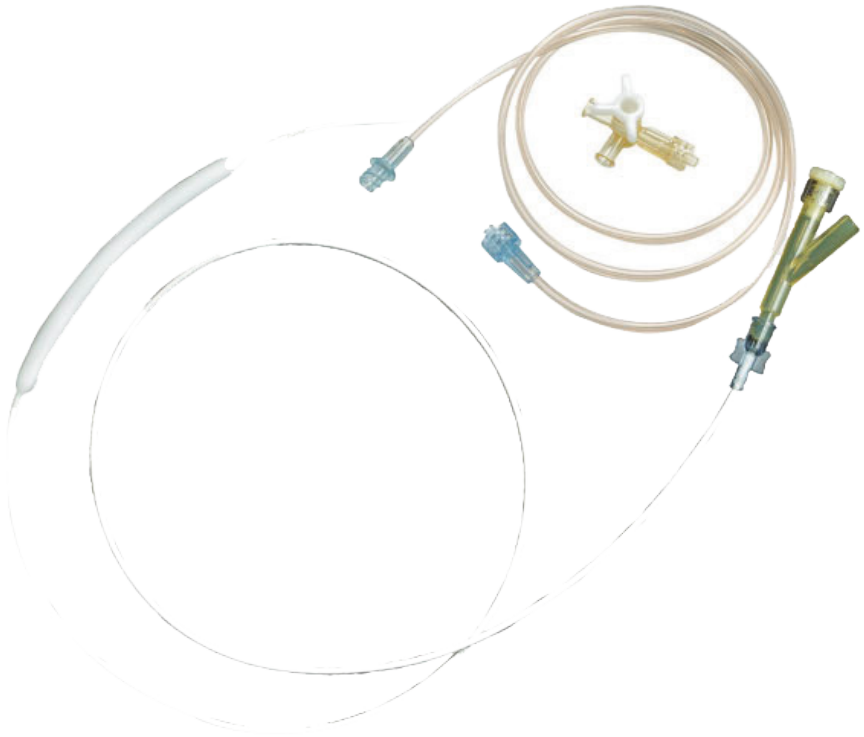

Item #	Description
42-1820	Tapeless Endotracheal Tube Holder (25/Box) Each set includes: (1) plastic tube grip, with hook/ loop strap, foam foot pads, (2) foam "lollipop" tapes

CA CE

Esophageal Balloon Catheter Set

For Intrathoracic Pressure Monitoring

- Ease of Insertion - The catheter comes with a new, easy-to-remove PTFE-coated stylet to aid the insertion procedure
- Comfort - The 5 French catheter is soft and pliable, offering maximum patient comfort over extended time periods
- Ease of Positioning - The new proximal Y-connector allows for precise balloon positioning with the stylet in place
- Depth Markings - The catheter is radio opaque with numerical depth markings to facilitate positioning
- Ease of Connection - The catheter has a standard female Luer connector
- Several Applications - Ideal for monitoring ventilator and sleep apnea patients and calculating lung compliance

Item #	Description
47-9005	5 Fr Catheter, latex-free Balloon, Stylet, 36" Pressure Monitoring Extension, 3-way Stopcock (5/Box)

Irrijet®

Splatter-Gard™

Simple, one-hand, thumb-controlled pressure provides an appropriately forceful stream (8 psi) directly to the desired area (or a gentler stream if needed). The soft flexible tip has an inside diameter equivalent to an 18-19 gauge needle.

- Splatter-Gard™ prevents contamination from body secretions – new concave design provides maximum splash-back protection
- Soft, flexible plastic tip eliminates needle-stick for user, minimizes trauma to patient
- Irrigant is delivered with force equivalent up to 8 psi
- Latex-free
- Sterile

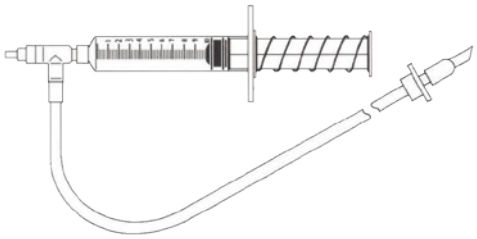

Item #	Description
55-0004	Irrijet GP (5/Box)
55-0504	Multi-Use Irrijet (5/Box)
55-2004	Single-Use Irrijet Z (5/Box)

CA CE

Irrijet GP

55-0004

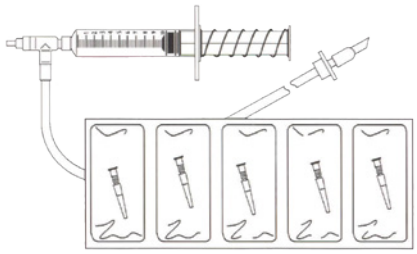

Spring-loaded syringe connected to a double check-valve, through a side arm and 6-ft. length of tubing to a spike for entry into a bag of irrigating solution. Double check-valve prevents retrograde flow. Alternate movement of the syringe plunger delivers irrigating solution as needed. Syringe Capacity: 12cc.

Multi-Use Irrijet

55-0504

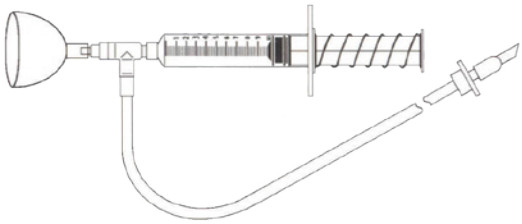

Same basic assembly as 55-0004, plus one package of five individually sealed jet tips.

Single-Use Irrijet Z

55-2004

Same basic assembly as 55-0004, plus one Zerowet Splashshield®.

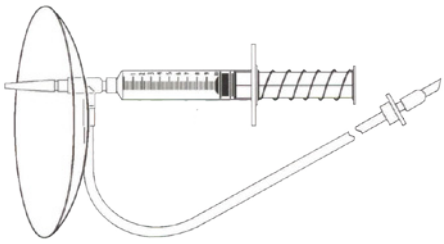

Single-Use Irrijet

55-2104

Same basic assembly as 55-0004, plus includes permanent flexible plastic jet tip and Splatter-Gard™.

55-2134

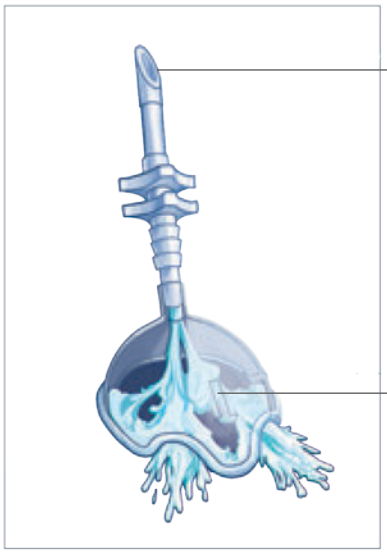

Same basic assembly as 55-2104, but with 35 cc capacity syringe.

COMBIPORT® + COMBIGUARD II™

LATEX FREE | | STERILE | SINGLE PATIENT USE | DISPOSABLE

Ethox

The Combiguard II™ attaches to a syringe (or Combiport) to assist in wound cleansing

Fluid flows through angled port, directed away from cleansed area and toward the outlet ports

Working together, a saline bag uses a Combiport® attached to a Combiguard II™ to effectively cleanse the wound without splash-back on the caregiver

COMBIPORT®
Wound Irrigation Device

COMBIGUARD II™
Irrigation Splash Guard

COMBIPORT® WOUND IRRIGATION DEVICE

- Attaches to a standard saline bag to administer a high volume of fluid in a short period of time
- Irrigation helps remove foreign bodies, reduce pathogen numbers and moisten wound tissue
- Patented spike attaches to standard 500 mL or 1000 mL saline bag
- For use only with Combiguard Irrigation Splash Guard (not sold separately)
- Removable cap for easy stop/start during cleansing
- Easy to assemble and use

COMBIGUARD II™ IRRIGATION SPLASH GUARD

- Egg-shaped cup covers wound site to prevent irrigation splash-back, helping to protect clinician
- Dual outlet ports enable contaminated fluids to safely escape
- Fluid delivery inlet delivers a stream equivalent to an 18 g needle
- Angled delivery inlet directs fluid away from cleansed area toward outlet ports
- Rounded edges provide a smooth surface against the skin
- Fits on 30-40 cc luer-tipped syringe
- Can be combined with Combiport Wound Irrigation Device

SMOOTH MOVER

PRODUCT DESCRIPTION

An economical ultra-smooth polyethylene patented board especially designed to furnish expert patient transference with minimal trauma to the patient. The Smooth Mover is capable of safely moving extremely large patients with minimal staffing requirements. It is radiotranslucent; it can be left in place during x-ray procedures. Is lightweight yet durable. Perfect for daily patient moving needs: EMS or hospital, nursing home or clinic applications. Easy on …easy off. Yes, even one person can move a large patient!

Optional Accessory:

Pull Straps… loops straps slip through hand-holes enabling easy board pick-up on hard surfaces tables (x-ray, etc.) and minimize reach required when transferring patients from bed to stretcher to table during routine moving.

PRODUCT ORDERING INFORMATION

Hospital Shifter Model SM3

Is widely used for patient shifting, bed to stretcher to table, etc..
Dimensions: 3/16” x 22” x 72”
Weight: 9 lbs.

Ambulance Patient Shifter Model SM40

Is used as an aid in moving patients from vehicle to stretcher or backboard.
Dimensions: 3/16” x 18” x 48”
Weight: 5½ lbs.

ADJUSTABLE PATIENT POSITIONING DEVICES

Patented, inflatable, adjustable OR Comfort™ Patient Positioning Devices provide patient stability and comfort, as well as optimal surgical positioning. Devices can be adjusted throughout a procedure without having to manually lift or move the patient.

SHOULDER-FLOAT™ ADJUSTABLE AXILLARY SUPPORT DEVICE

- Relieves patient's shoulder discomfort during surgical procedures in the lateral decubitus position. Minimizes pressure on shoulder and head to help reduce post surgical pain.
- Useful during total hip replacement, thoracotomy, shoulder arthroscopy and kidney surgery. It can benefit mildly sedated patients undergoing epidural anesthesia and patients undergoing lengthy procedures.

Shoulder-Float Device				
PART #	PACKAGING DESCRIPTION		PART #	PACKAGING DESCRIPTION
SF05	5 per BX		SF10	10 per BX

PELVIC-TILT™ ADJUSTABLE DISPLACEMENT DEVICE

- Designed to lift a patient's hip between 20-40 degrees during surgical procedures. Includes a non-inflatable flap to place underneath the patient to prevent a lateral shifting of the device.
- Useful in obstetrics to avoid compression of the vena cava and/or aorta during cesarean sections and deliveries in the supine position. Practical during kidney surgery and surgery on the side of the leg or ankle.

Pelvic-Tilt Device				
PART #	PACKAGING DESCRIPTION		PART #	PACKAGING DESCRIPTION
PT05	5 per BX		PT10	10 per BX

DELGADO™ INFLATABLE POST

- Slides over the stabilizer post of the operating room table to provide an adjustable "pillow" between the post and the patient.
- Maximizes the stability of the patient and distributes the pressure, minimizing the likelihood of tissue damage or discomfort after surgery.

Delgado™ Inflatable Post
