

COMPLETE PRODUCT CATALOGUE

SERVING CANADIAN HEALTHCARE WORKERS SINCE 1992

ADVANCED SURGI-PHARM INC.

Founded in 1992, we are the distribution arm of Surgmed™ in Canada, representing leading US, international and domestic manufacturers for a wide range of specialty products with unique benefits for applications in the operating room, women's health, labour & delivery, ICU, and sterile processing areas. Equipped with a direct sales team, we provide effective nationwide coverage as the Canadian distributor of Batrik, Vygon, Rocket Medical, Cooper Surgical, SunMed, and other industry leading products including a wide-ranging portfolio of top-rated PPE products.

SURGMED

GROUP

Proudly Canadian, **The Surgmed™ Group of Companies** began operations in 1992 as a single distribution company known as **Advanced Surgi-Pharm Inc.** The company quickly became known as an industry leader and specialty distributor of value-added surgical products in the Canadian hospital market. Five years later, **Surgmed expanded upon its success with the launch of Batrik Medical Manufacturing Inc.** in 1997 and the subsequent acquisition of **Imperial Surgical Ltd.** one year later in 1998.

Together, our three unique companies serve the Canadian and global healthcare markets with high quality and competitively priced products, all backed by world-class customer care.

Founded in 1992, Advanced Surgi-Pharm Inc. is the distribution arm of Surgmed™ in Canada, representing leading US, international and domestic manufacturers for a wide range of specialty products with unique benefits for applications in the Operating Room, Women's Health, Labor & Delivery, ICU, and Sterile Processing areas. Equipped with a direct sales team, ASP provides effective nationwide coverage as the Canadian distributor of Batrik, Vygon, Rocket Medical, Cooper Surgical, SunMed, and other industry leading products including a wide-ranging portfolio of top-rated PPE products.

Established in 1997 and sold in 85 countries globally, Batrik Medical Manufacturing Inc. specializes in the manufacturing of endoscopy accessories, enzymatic solutions, infection control, central sterilization, and surgical devices. Batrik's in-house controlled environment production facility adheres to strictly enforced quality and regulatory control systems. They are registered as a device manufacturing establishment with the United States FDA and are in full compliance with CE and Health Canada Regulations. All Batrik products are rigorously tested, liability insured, and meet/exceed high international quality standards.

Established in 1935, Imperial Surgical Ltd. is one of Canada's oldest hospital capital equipment manufacturers, well-known for their stainless steel healthcare equipment for Sterile Processing, Operating Room, Examination and Treatment, Patient Handling, and Mortuary/ Pathology areas. Their growing portfolio of products also has applications in Infection Control & Prevention, an important area of focus for their future.

CLAMP JAW COVERS

Manufactured from medical grade silicone, our Clamp Jaw Covers reduce trauma to vessels requiring occlusion, particularly when a hemostatic clamp is utilized. The thread-like indents allow for gentle, constant and non-slip tension.

GOOD TO KNOW: OUR CLAMP JAW COVERS CONVERT ALMOST ANY INSTRUMENT TO ATRAUMATIC

- Gamma sterilized

- Available in 3 colors and 3 widths to fit most clamp sizes

- Radiopaque and latex free

VASCULAR SILICONE TIES

Our Vascular Silicone Ties permit safe and smooth retraction, occlusion and identification of vessels during surgical procedures.

Unlike clamps and retractors which can pinch the vessels flat, or even crack them, the BATRIK elliptical shape allows for the gentle handling of arteries, veins, nerves, tendons, spermatic cords, ureters, or whenever delicate retraction / occlusion is required.

- Manufactured of medical grade silicone
- Do not twist on themselves when unpacked
- Easy to separate, eliminating the need for cardboard inserts
- Sterile, radiopaque, and latex free

AVAILABLE IN 4
SIZES AND 4 COLORS

NEW!

Introducing PandaPatch™: Innovative Adhesive Eye Protection for Safer Patient Care

PandaPatch™ offers an effective alternative to traditional tape for protecting patients' eyes during surgery. These adhesive eye protectors are designed to reduce the risk of corneal injuries and ophthalmic complications for patients under general anesthesia.

With PandaPatch™, you ensure superior patient outcome by preventing avoidable eye damage associated with the use of standard surgical tape.

KEY FEATURES:

- **Ergonomic Design:** Contours comfortably around the eyes.
- **Post-Surgery Friendly:** Particularly effective for children, the elderly, and individuals with sensitive or delicate skin.
- **Latex-Free & Hypoallergenic Adhesive:** Made from medical-grade material, gentle on the skin and designed to minimize irritation.
- **Non-Adhesive Colored Tabs:** Allowing quick and hassle free application and removal, facilitating effortless monitoring of pupil dilation during surgery.

70-04ADU
Adult Sensitive Eye Protector

HERE'S WHY IT MATTERS:

- During prolonged surgery under general anesthesia, **up to 59%¹** of patients may not fully close their eyes, risking corneal abrasions.
- PandaPatch™ gentle adhesive eye protectors ensure eyelids remain safely and comfortably closed, minimizing the risks typically associated with the use of standard surgical tape.

SAFE-SOAK™ SPAC

Our Safe-Soak™ SPAC floor suction disk quickly removes fluid waste from the operating room floor through the application of suction.

- Highly durable: it won't be damaged if stepped on
- Easily maneuverable by foot around operating room floor
- Latex free, disposable, and non-sterile
- The bottom opening permits fluid collection through a highly absorbent material that comes into contact with its surface
- The hose is securely affixed on its side to reduce risk of catching equipment
- Its highly absorbent base material allows for quick fluid wicking and removal when suction is applied

BATRIK SAFE-SOAK™ ABSORBENT FLOOR MATS

Our Safe-Soak™ Absorbent Floor Mats are designed to absorb a variety of fluids from the operating room floor quickly and efficiently, ensuring the floor beneath remains slip-free, safe, and dry during surgical procedures.

- Highly absorbent
- Facilitates quick and easy clean up
- Latex free, single-use, disposable, and non-sterile
- Conforms to uneven surfaces
- Skid-resistant backing (blue absorbent mat only)

BLUE CLOUD-GEL™ ANTI-FATIGUE MATS

Our Blue Cloud-Gel™ Anti-Fatigue Mats have been scientifically engineered for use in the O.R. using patented gel technology and premium foam to provide the ultimate comfort and support for surgeons, nurses, and technicians particularly when movement is restricted for prolonged durations.

- Proprietary 3/4" Blue Cloud-Gel™ foam technology will not "bottom-out" like conventional foam mats
- Conforms to and supports feet promoting efficient circulation, reducing physical discomfort and fatigue
- Promotes proper posture while diminishing back, knee, and foot discomfort
- Latex free, water resistant, and nonabsorbent
- Reusable, easy to clean, and Cart Washer compatible (contact us for more details)
- Excellent friction properties when damp or dry surgical booties are worn
- Completely sealed with an RF weld for excellent protection against moisture absorption
- US Standards: CALL 117 and NFPA 260 Compliant
- 1 Year Warranty

DID YOU KNOW? STUDIES HAVE
DEMONSTRATED THAT ANTI-FATIGUE
MATS IMPROVE PERFORMANCE,
ENERGY, AND POST-OPERATIVE
DISCOMFORT.

BLUE-CLOUD NIMBUS™ ANTI-FATIGUE MATS

Our Blue-Cloud Nimbus™ Anti-Fatigue Mats are designed for general hospital use. Made with proprietary high-density "energy-return" polyurethane materials, they provide unmatched comfort, relief, and ergonomic support.

- Our Energy-Return properties will help reduce leg, foot, lower back discomfort, and work-related injuries
- Longer lasting support as 3/4" proprietary foam blend will not bottom out like most other foam based anti-fatigue mats
- Antimicrobial properties blended into the mat provides added protection
- Highly water resistant surface will not absorb water or dirt
- Lightweight and easy to clean
- Textured design on surface and high-traction base ensures greater safety. (US Standard NFSI 101-C)
- Beveled edging reduces tripping hazards and anti-slip backing enhances safety
- Durable design is ideal for commercial applications, yet still ergonomically and aesthetically pleasing for home or office environments
- Flammability/Burn resistant per CFR 16 Parts 1630/1631
- Made with eco-friendly materials, is non-toxic, and latex free
- 5 Year Warranty (non-industrial usage), 4 Year Warranty (industrial usage)

Warm Gel®

Get relief where you need it when you need it

Features and Benefits

- Pliable WarmGel® conforms to any body part
- Easy to activate
- Soft non-woven fabric for patient comfort
- Consistent temperature
- Available in two convenient sizes

WarmGel® is a versatile and reliable source for instant heat

Many applications in:

- Maternity
- IV Therapy
- Labor & Delivery
- Rehabilitation

Temperature Range:

WarmGel® has been designed to achieve 112°F (44°C) when activated at room temperature of 75°F (24°C)

K-Wires, Steinmann Pins & Sterilization Racks

Sterilization Racks

Sterilization racks are designed for use during washing, sterilizing, storing/transporting, and dispensing K-wires, Steinmann Pins, or Twist Drills.

The racks are lightweight but made to withstand repeated use. They fold closed for sterilization and easily open to convert to a table top stand for use in the O.R.

Dimensions are clearly marked on the rack to assist with quick identification.

K-Wire and Pin Rack

Number	Details	Dimensions	Quantity / Package
SU98.5409-RO	Anodized aluminium, holds 9" K-wires and pins. Holds 6 of each of the following diameters: 0.028" (0.7 mm) 0.045" (1.1 mm) 0.062" (1.6 mm) 0.093" (2.4 mm) 0.125" (3.2 mm) 0.156" (4.0 mm) 0.035" (0.9 mm) 0.054" (1.4 mm) 0.078" (2.0 mm) 0.109" (2.8 mm) 0.140" (3.5 mm) 0.177" (4.5 mm)	12.5" x 5.25" x 1.5" (32 x 13 x 3.8)	1

ENDOSCOPY BO2™ BITE BLOCKS

WITH NASAL OXYGEN DELIVERY

Our BO2™ Bite Blocks significantly enhance patient safety by providing supplemental oxygenation during gastrointestinal endoscopy, preventing hypoxia in sedated patients, and ensuring superior patient comfort.

- Saves time and money by eliminating the need for separate nasal prongs and oxygen masks
- Designed to be free of sharp edges to ensure patient comfort and safety
- Available exclusively in Single-Use
- Optional retention strap is available to ensure a secure fit
- The Bite Blocks and optional retention straps are all latex free, lead free and DEHP free

PRODUCT SELECTION

ITEM #	TYPE	DESCRIPTION	PACKAGING	CASE DIMENSIONS
BO2	Single-Use	18mm / 54FR, includes strap	100 / Box	10" x 10" x 10"
BO2-N	Single-Use	18mm / 54FR, without strap	100 / Box	10" x 10" x 10"

ENDOSCOPY BITESTRONG™ BITE BLOCKS

ADULT & PEDIATRIC BITE BLOCKS

Our Bitestrong™ Bite Blocks provide a safe passage through the patient's mouth during TEE, protecting the patient's teeth and endoscope.

Our molding process ensures a smooth finish with no sharp edges (flashing) that can often irritate a patient's mouth. All Bite Blocks are individually wrapped in sealed, easy to open PE bags and are latex free, lead free, and DEHP free. Additional straps are available, if required.

SINGLE USE

- Available without dental retention

REUSABLE

- Designed for repeated usage and will withstand commonly practiced chemical and steam sterilization cycles (134°C / 275°F).
- Available with or without an adjustable retention strap

DAYBRUSH™ CHANNEL BRUSHES

REUSABLE

Our Reusable DayBrush™ Channel Brushes can be used for cleaning endoscopes for an entire day. In fact, it's been proven to effectively clean up to 10 scopes before the need to discard.*

- Soft tip ensures easy manipulation within the channel with no risk of damage
- The back-end is sealed and softened to prevent fluid from getting trapped inside the tube. The softening process also prevents damage if the cleaning brush is used in reverse.
- Can be steam sterilized.
- Bristle volume is 20mm in length – nearly double most brushes on the market. A large brush provides more surface contact during the cleaning process.
- Significant per use savings when compared to other reusable or disposable channel cleaning brushes.

(* Discard after cleaning 10 scopes or sooner if any brush degradation is noticed. After ten applications, the brush may have the appearance that it can continue to clean effectively, but we discourage prolonged use due to risk of cross contamination. Actual number of uses will vary based on handling and processing.)

V-BRUSHES

EXTERNAL CLEANING BRUSHES

Our External Cleaning Brushes for endoscopes / optical instruments provide excellent cleaning capabilities. With their unique U-shape bristles and innovative design, our brushes are the ultimate tool for cleaning the exterior of your endoscopic instruments. Free from sharp or metallic ends that can scratch or cause damage to valuable equipment, both single-use and reusable models are latex free and feature ergonomic handles.

PRODUCT SELECTION

ARC™ WIRE STYLE BRUSHES

SINGLE-USE AND REUSABLE

You've got options with our ARC™ Wire Brushes. Our single-use and reusable brushes are available in both flexible and rigid varieties and come in a multitude of sizes. ARC™ Wire Brushes are guaranteed to last longer than twisted wire and preserve the integrity of your valuable instruments.

BRUSH SELECTION TIPS:

INSTRUMENT SPECIFICATIONS

What is the maximum length of the instrument(s) to be cleaned?

Add at least 2" (5cm) to that length, so you have an adequate length to work with.

What is the inner diameter of the instrument?

Add at most 0.125" (3mm) to determine the diameter of the bristle to ensure effective cleaning. The bristle diameter has to slightly exceed the inner tube diameter. Bristles that are too large will bend too much and not clean effectively.

BRUSH SELECTION

Simply find the section in our catalogue that best corresponds to the overall length and diameter of your instrument. As a rule, if your present brush is 8" (20.32cm) in length and we only offer 10" (25.4cm) length with your required diameter, that is entirely acceptable.

In many cases, our ARC™ Wire Brushes will have more bristles on the brush. As an example, many 5mm (0.19") diameter brushes are only 1" (2.5cm) in length. At Batrik, we strived to provide the greatest amount of bristles to ensure the most effective cleaning.

RIGID

FLEXIBLE

CUSTOMIZABLE WIRE BRUSHES

A unique aspect of single-use ARC™ Wire Brushes is that they can be customized to any length:

- Up to 2000mm for Wire Brushes on plastic semi-rigid sheaths with brushes from 5 to 20mm in diameter.
- Flexible plastic sheaths with brushes from 2-5mm in diameter.

BRIGHTBRUSH

THE RIGHT BRUSH FOR EVERY JOB

Tackle even the toughest cleaning jobs with ease! Our Color-Coded Twisted Wire Brushes are designed for precision, convenience, and superior performance—ensuring spotless results every time.

Color-Coded Bead

Each brush features a color-coded bead that indicates the bristle diameter and size, making it easy to select the right tool quickly and efficiently.

Hanging Loop

The brush includes a loop at the end for convenient hanging.

STAINLESS STEEL ARC™ MICRO BRUSHES

Our Stainless Steel ARC™ Micro Brushes are some of the smallest brushes in the industry. They are designed to clean channels with an inner diameter ranging from 0.5 mm to 1.40 mm.

- Flexible stainless steel sheath will not bend like the regular metal twisted wire brushes
- Polyamide bristles prevents or slows bacterial growth between sterilizations
- Reusable*
- Available in two lengths

TIP: USING THE PULL-THROUGH
TECHNIQUE IS HIGHLY
RECOMMENDED WITH THESE
BRUSHES. SIMPLY INSERT THE
BLUNT, NON-BRUSH END FIRST.

PRODUCT SELECTION

ITEM #	TOTAL LENGTH	BRUSH SIZE (Ø)	BRUSH LENGTH	SHEATH (Ø)	PACKAGING
35-03015	12" / 30 cm	0.06" / 1.5 mm	0.6" / 15 mm	0.02" / 0.40 mm	6 / Tube

INSTRUMENT CLEANING FLAT BRUSHES

Our Instrument Cleaning Flat Brushes are specifically designed for hospital use in the pre-clean and preparation of instruments.

- Long ergonomic handle permits ease-of-use
- Extra long length of brush head (60 [± 5] mm in Single-Use and 75 [± 5] mm in Reusable)
- Transparent brush fibers allow for quick verification of its cleanliness
- The plastic handle will not release any toxic components
- Available in 6 models (4 reusable/autoclavable and 2 single-use)

FLEXIBLE

This brush is designed for large instruments that require a more gentle cleaning application such as optics, plastics, or hard to reach spot.

50-40919

50-40921

EXTRA FLEXIBLE

The very long, flexible bristles eliminate any stress during sanitation, and makes this the ideal brush for fragile instruments as well as both pliable and rigid endoscopes. The length of the bristles assist in cleaning areas that would otherwise be difficult to reach, such as the accessory channel or tip deflection of pliable endoscopes.

50-40920

RIGID

The rigidity of this brush, along with the length of the bristles and handle, improves and simplifies instrument cleaning.

50-40918

50-40922

EXTRA RIGID

Instrument safe polyamide fibers offer steel-like rigidity and allows deep cleaning of soiled instruments, particularly in grooved or uneven surfaces.

50-40917

REUSABLE PRECISION BRUSH

INSTRUMENT CLEANING

Our Reusable Precision Instrument Cleaning Brush is the ideal brush for the quick removal of difficult debris. It cleans externally as well as deep into instrument jaws. Although the firm and durable bristles feel like stainless steel, there is absolutely no risk of instrument damage or personal injury.

- Bristles have an extra firm density and superior durability
- Polyamide (TYNEX®) bristles
- Steamable thermoplastic ergonomic handle
- Steam / chemical sterilizable
- Latex free

 **GOOD TO KNOW:** ELIMINATES THE NEED FOR THE STAINLESS STEEL TOOTHBRUSH-STYLE BRUSH, WHICH CAN DAMAGE VALUABLE INSTRUMENTS!

TRIFECTA™ BRUSH

INSTRUMENT CLEANING

Introducing the Trifecta™ Brush, a versatile 3-in-1 tool designed to meet all your instrument cleaning needs. This reusable instrument brush is available in two styles: one with **all-nylon** bristles for gentle cleaning and another with nylon bristles on two sides and **stainless steel bristles** on the third, ideal for tackling tougher buildup and stubborn cleaning tasks. This innovative design ensures effective, thorough maintenance for a wide range of instruments.

TRIFECTA™ BRUSH - NYLON

1 NYLON BRISTLES

Gentle, transparent nylon bristles provide an effective yet safe cleaning solution. This side allows you to verify cleanliness easily, without risking damage to delicate surfaces. Ideal for a light, non-invasive clean.

2 PRECISION TIP

Reach those hard-to-clean spots with the precision tip. This small, firm-bristle tip is designed for tight, hard-to-reach areas, such as instrument jaws and box joints. It ensures a deep clean where it's most needed, without the risk of damage or injury to delicate parts.

3 FIRM NYLON BRISTLES

For tougher residues, the firm nylon side delivers the cleaning power you need. With bristles that feel similar to stainless steel but are safe for your instruments, this side easily handles stubborn dirt and buildup.

TRIFECTA™ BRUSH - NYLON & STAINLESS STEEL

ACETABULAR REAMER BRUSH

Our double-ended cleaning brush is manufactured exclusively for cleaning acetabular bone reamers. The "Pig Tail" rounded style circular head brush is designed to effectively clean inside the reamer, while the rigid straight brush on the reverse side is used for cleaning individual cutting holes. Special fusion of the brush heads to the hand piece along with its high quality antimicrobial medical grade bristles ensures a durable, reusable, and highly effective cleaning tool.

SILICONE PIN MAT

Our Silicone Pin Mat cushions, protects, and organizes delicate surgical instruments for sterilization. The elevated nubs provide greater air-flow ventilation and drying, significantly reducing residual moisture collection.

- Reusable
- Autoclavable
- Latex free

FRONT SIDE
Pins keep instruments securely in place

BACK SIDE
Numerous holes and elevated nubs provide superior venting and reduce water collection

TAG-IT™ | NOTES

WHEN SIMPLY BROKEN DOESN'T CUT IT—TAG IT, TELL IT, OWN IT!

Tag-It™ Notes offer the freedom to **identify** and **document** instructions for instruments, trays, and carts before and after **sterilization**. Tag-It™ Notes are **tear-resistant**, withstand **extreme chemicals**, **high temperature** and ensures **reliable communication**.

WHY YOU'LL LOVE THEM:

- Tag-It™ Notes gives you the **freedom** to clearly document important information **without the clutter**.
- Robust and easy-to-use **tie wraps** designed to **securely attach** to instruments (134°C & chemical tested).
- Includes a **fast-drying, heat-resistant permanent marker** for writing your important notes.
- Choose from other **customizable cards** for personalized needs or **pre-made cards** for fast, convenient use.
- When you need more than a "repair" or "sharpen" seal to identify an issue . Instead, **Tag it, Tell it, Own it**.

WATERPROOF

The synthetic paper withstands spills and liquid exposure without any damage.

ECO-FRIENDLY

Made from sustainable materials.

HEAT RESISTANT

Can resist high temperatures of up to 273.2°F (134°C). Compatible with Gas Plasma Sterilization (STERAD®100 NX Sterilization).

DURABLE & TEAR-PROOF

Handles rigorous cleaning, tough conditions, and resists tearing.

PRODUCT SELECTION

ITEM #	COLOR	SIZE	PACKAGING
TI-NOTE-RO	Yellow	NOTES	3" x 5" / 8 cm x 13cm 100 / PKG

All Tag-It™ are single-use. PACKAGING: 1 pack of 100 tags, 1 permanent marker, and 100 ties.

Tag-It™ Cards are an effortless way to add information with either pre-printed or blank formats. These **durable** tags streamline your workflow, **withstand tough conditions**, and feature **(optional) indicator dots** for quick verification. They help keep instruments, trays, and carts organized, ensuring efficiency before and after sterilization/decontamination.

KEY PRODUCT FEATURES:

- Special Permanent Marker:** The ink will not run or appear blurry after exposure to chemicals or high temperature (max. 260°C/500°F) sterilization. (*Regular pens or markers can be used only if the tags are not going to be exposed to any sterilization/decontamination*).
- Tie Wraps:** Assist in securing the tags to almost any instrument or container. (*Tie wraps have been tested for chemical and steam sterilization*).
- Our Tag-It™:** Will not shrink, absorb water/chemicals, or lose its intended integrity after chemical or steam sterilization.

**(Optional)

TAG-IT™ | SCOPE

Batrik Scope Tags are tear-resistant, double-sided tags that will prove indispensable throughout the reprocessing journey. Our tags make it easy to **record important information**, including processing dates, with a user-friendly feature that allows you to select the month, day, and date. Crafted from **waterproof synthetic paper**, these tags feature a **self-looping design**, making it effortless to attach them to the scope without the need for additional fastening materials. Elevate your reprocessing protocols with Batrik!

KEY FEATURES

- The paper, tie wraps, and smudge-proof ink are designed to withstand high temperatures of up to 273.2°F (134°C) and are compatible with Gas plasma sterilization (STERRAD®100 NX Sterilization System).
- Tags include the month, day, and date selection on one side, making it convenient to mark the processing date accurately

COLOR-CODED AND CUSTOMIZABLE

- Available in seven colors
- The tags facilitate color coding for easy identification

SELF LOOPING

- The self-looping design allows for easy attachment to the scope
- Eliminating the need for additional fastening materials

SINGLE-USE AND LATEX FREE

- Batrik Scope Tags are designed for single use and are latex-free
- Promoting hygiene and reducing the risk of cross-contamination

TAG-IT™ | SCOPE REPROCESSING

Batrik Scope Reprocessing Tags are durable and can withstand handling during reprocessing **without tearing**, ensuring that information remains intact. These tags are vital in recording important information such as **date to reprocess on, scope model and serial number, sterilizer type, meeting sterilizer parameter conditions, alcohol flush, and hang date**. These tags have been meticulously designed to elevate **operational efficiency** and contribute to the delivery of the highest standard of patient care.

LILA'S INSTRUMENT STAIN REMOVER

Lila's special blend of naturally sourced powders provides outstanding removal of stubborn stains.

Convenient-to-use formula, you can achieve spotless results every time!

It can be used on surgical/dental instruments, autoclaves, ultrasonic cleaners, stainless steel countertops, trays, bowls and more.

Specifically designed for use on stainless steel, chrome, nickel, brass, copper, and silver.

LSR-8501

60-46003

LILA'S SCRUB PAD

- Say goodbye to extra stubborn stains with Lila's Scrub Pad without leaving any metal residue.
- Simply add a small amount of Lila's Stain Remover with one of our Scrub Pad's for very large areas.
- The gentle yet effective scrub is the perfect choice for Ophthalmic Instruments.¹

PRODUCT SELECTION

ITEM #	DESCRIPTION	DIMENSIONS	PACKAGING
LSR-8501	LILA'S INSTRUMENT STAIN REMOVER 3 oz (85g) plastic jar with a convenient screw-on lid	Ø 2.8" / 70 mm	1 Jar / Bag
LSR-8512	LILA'S INSTRUMENT STAIN REMOVER 3 oz (85g) plastic jar with a convenient screw-on lid	Ø 2.8" / 70 mm	12 Jars / Box
17-DT1213C	LILA'S LOW LINTING DURA-TOWEL 1080 towels	12" x 13" / 31 cm x 33 cm Folded: 3" x 3.25" / 7.5 cm x 8.25 cm	90 / Bag 12 Bags / Box
60-46003	LILA'S SCRUB PAD	4" x 6" / 10 cm x 15 cm	3 / Bag
LSR-BUNDLE	LILA'S STAIN REMOVER + LILA'S DURA-TOWEL 3 oz (85g) plastic jar + 90 towels	Ø 2.8" / 70 MM 12" x 13" / 31 cm x 33 cm	1 Jar / Bag 90 / Bag

1 : Although Lila's is completely safe, it is not recommended for use on ophthalmic instruments. Use Lila's Scrub Pad on its own.

2: The stain remover should not be mixed with bleach and is for external use only to remove instrument stains.

EASE TO USE AS 1,2,3...

1. Dampen a cloth or grab a Lila's Low Linting Dura-Towel and dab into the jar.
2. Gently rub the area that is stained.¹
3. Rinse thoroughly for a flawless shine.²

A little Goes a long Way!

Even great to tackle stubborn stains on steel pots and pans in your kitchen with ease.

Lila's - If you have used Spectra-Scrub or Integra's instrument stain remover then you will love Lila's!

17-DT1213C

LILA'S LOW-LINTING DURA-TOWEL

- Lila's Dura-Towel has long lasting strength and has a minimal lint composition.
- These single-use towels are clean room certified and are specifically designed for instrument wiping.
- Its ideal dimensions and unique attributes guarantee optimal performance, setting it apart from ordinary paper towels.

S.T.I.C.S.

Our Simple Tracking Identification Color System, or S.T.I.C.S., is an easy to use, latex free, tool that allows you to quickly identify your instruments by department and/or procedure. The tape adheres securely and every tape sheet comes with a protective cover to ensure it lasts as long as you need.

Each 8.5" x 11" (216 mm x 279 mm) sheet contains the following adhesive strips:

- 1" (25.4 mm) x 220
- 1.5" (38.1 mm) x 44

BATRIK

ID TAPE

AVAILABLE WIDTHS

Width
0.125"/318 mm

Width
0.25"/635 mm

A simple solution for marking surgical instruments with the aid of color-coding, our ID Tape is durable and will not chip, flake, or peel. It can be used in autoclaves, withstanding repeated exposure to sterilization. Independent validation tests demonstrated the efficiency of sterilization of marked instruments, even underneath the BATRIK ID Tape.

Quickly identifies instruments by department or procedure

Easy to apply

Withstands repeated exposure to sterilization

Has more per tape roll (300" / 7620 mm)

Available in 7 colors and 2 widths

Conveniently packaged in a clear box

Non-Sterile

TAPE-B-GONE™ TAPE REMOVER

Tape-B-Gone™ is a uniquely formulated and ready-to-use proprietary formula that easily removes adhesives from medical equipment and instruments. Unlike many other brands, Tape-B-Gone™ does not contain highly dangerous or caustic chemicals, is not flammable or combustible, and is safe for use on metal, glass, plastic, and rubber without any special equipment or ventilation.

SCRUB PAD

Our Scrub Pad is ideal for pre-cleaning your surgical instruments without leaving any metal residue that often occurs when using steel wool or metal sponges. The abrasiveness is perfectly balanced to provide you with efficient cleaning without damaging your instruments. Its fine fibers allow the user to polish, clean, and debur all types of material surfaces.

- Abrasive Material: Aluminum Oxide
- Grit: 400
- Grade: Very Fine
- Style: Flexible
- Pad material: Non-Woven
- Color: Maroon
- Type: Hand Pad

Your First ™

ENZYMATIC & NON-ENZYMATIC CLEANERS

Our Enzymatic and Non-Enzymatic Cleaners are specially formulated to remove organic material from medical equipment and instrumentation.

Our **Enzymatic Cleaner** formats are formulated with PrAmLi Power3 Enzymes™, our proprietary unique blend of enzymes, and a surfactant to efficiently remove all proteins, blood, fatty tissue, and more. They also remove stains from surgical scrubs, linens, and medical clothing.

Our **Non-Enzymatic Cleaner** formats are formulated with a free-rinsing, neutral pH detergent blend for effective cleaning.

Both formats are powerful solutions that break down all bioburden for effective surface and instrument pre-cleaning*

FIRST WIPES

Our cleanroom wipes are designed to do the first wipe-down of an endoscope after a procedure. They are made from hydroentangled non-woven material composed of 45% polyester and 55% cellulose. These wipes are manufactured and packaged in a cleanroom environment.

- Can be used for a cleanroom environment of ISO Class 5 through 8
- Production process guarantees extremely low particle generation and chemical extractables
- Compatible with virtually any solvent or solution for cleaning and wiping (such as **PrAmLi Power³ EnzymesTM**)
- Double-bag packaging
- Available in two versatile sizes

PRODUCT SELECTION

ITEM #	DESCRIPTION	DIMENSIONS	PACKAGING	CASE DIMENSIONS

DRY SPONGES

Our sponges are specifically fabricated for use with all medical instrumentation. Unlike most competitor sponges, our sponges are white to better evidence the effectiveness of the cleaning process. Dark colored sponges easily hide contaminants, but with our white sponges you can visually evaluate the pre-clean efficacy.

OUR WHITE SPONGES MAY APPEAR SLIGHTLY YELLOWED. THIS IS ONLY DUE TO UV EXPOSURE, IS NOT A REFLECTION OF ITS AGE.

TRANSPORT BAGS FOR ENDOSCOPE AND MEDICAL INSTRUMENTS

Thoughtfully designed to eliminate touch-points during endoscope transport from point-of-care to the reprocessing area, and back, focused on safety of patients and medical staff.

- Made of recyclable LDPE material known to be quite flexible, highly resilient, and tough
- Latex and DEHP-free
- Excellent resistance to dilute and concentrated acids, alcohols, bases and esters*
- Good resistance to aldehydes, ketones, and vegetable-based oils*
- Can withstand high temperatures of up to 90 °C (194°F)
- Tamper-evident seal for added safety, also aids in keeping the instrument moist to avoid drying of bio-debris
- Clearly marked bags with color-coded visuals facilitates immediate identification of clean vs. used instruments
- Users can write important information directly on the bag in spaces marked with visual icons
- Available in two convenient sizes

GOOD TO KNOW: USING **Your First** ™ SEALABLE TRANSPORT BAGS REDUCES USER ERROR, PREVENTS CROSS-CONTAMINATION, AND PROMOTES PATIENT AND MEDICAL STAFF SAFETY.

SAVEFACE™ DRAPED SHIELDS

REDUCE PERSONAL INJURY SUPERIOR INSTRUMENT DECONTAMINATION PROTECTION

SAVEFACE DRAPED-FACE SHIELD

In the Sterile Processing Department (SPD)/Central Sterile Supply Department (CSSD), personal safety is paramount.

PATENT PENDING

Our Draped Face Shield provides essential protection during high-risk instrument decontamination.

EFFECTIVE PROTECTION IS NON-NEGOTIABLE

SAVEFACE Draped dynamically reduces harmful exposure to caustic chemicals as well as the risk of cross-contamination. Effective face protection is non-negotiable.

PPE CATEGORY 2 CERTIFIED

SAVEFACE DRAPED is tested to protect. Wear it with confidence.

SAVEFACE: KEY FEATURES

ANSI/AAMI PB70 LEVEL 3 COMPLIANT DRAPE:

- Provides a high level of fluid penetration protection.
- Tuck into clothing or pinch together.

EXTRA-LONG 9"/23CM WRAP-AROUND SHIELD:

- Ensures full coverage, reducing the risk of exposure from different angles.

COMFORTABLE:

- The soft, self-shaping foam headpiece molds comfortably to your forehead, allowing for extended wear without discomfort.

OPTICAL CLARITY WITH ANTI-FOG AND ANTI-GLARE

DON'T MISS THE OPPORTUNITY TO EXPLORE OUR BROADER RANGE OF PROTECTIVE SHIELDS.

Visit our website www.surgmed.com or consult our detailed literature to find the shield that best fits your needs.

VERY IMPORTANT

IS YOUR PRESENT FACE SHIELD CATEGORY 2 CERTIFIED?

Batrik face shields are independently certified to comply with the PPE Category 2 standard. Many facilities are now requesting compliance to this standard.

SHOOZCOVERS™ | SOFT LINE™

Batrik ShoozCovers™ Soft Line™ is manufactured in Canada from high quality **35 g/m² polypropylene fabric and 100% latex free elastics** for performance and durability you can rely on. Our anti-skid tread reduces the risk of slipping and our smart design delivers easy on-and-off convenience and great fit.

MADE IN CANADA

NOW AVAILABLE IN
BUBBLEGUM PINK

SHOOZ-REPELLENT™ TECHNOLOGY:

The **Soft Line™** integrates Shooz-Repellent™ technology which creates a protective barrier that repels fluids, delivering basic incidental fluid contact repellent. Shoe covers are not waterproof or water-resistant.

ANTI-SKID THREAD:

Our anti-skid tread reduces the risk of slipping with **triple ultrasonic welds** that increases tear strength and delivers easy on-and-off convenience.

SHOOZCOVERS™ | COATED LINE™

STAY DRY:

Our **Batrik ShoozCovers™ Coated Line™** is made from a **~55 g/m²** blend of **polypropylene and polyethylene**, providing high-quality water resistance.¹ Ideal for environments where maximum protection against fluids is required.

MADE IN CANADA

TRIPLE WELDED TECHNOLOGY:

These shoe covers are reinforced with triple ultrasonic welds, a technique that joins materials together without the need for adhesives or stitching. This technique increases tear strength and reduces linting, for long-lasting, resilient covers.

OUR COATED LINE™ IS PERFECT FOR:

MEDICAL
ESTABLISHMENTS

PHARMACEUTICAL

It is not waterproof nor water resistant.

ANTIMICROBIAL IV POLES WITH CUVERRO SHIELD™

Frequently touched surfaces like IV poles have long been identified as reservoirs for the spread of pathogenic microbes.¹ These can easily contaminate the hands and equipment of healthcare professionals who in turn can transmit these pathogens to patients during routine care leading to Healthcare-associated infections.

Our Antimicrobial IV Poles protected with CuVerro Shield™ by Aereus Technologies* offers you a solution to this problem.

CuVerro Shield™ is a unique coating of naturally antimicrobial copper that is applied to our stainless steel poles, ram horns, and u-hooks to deliver outstanding protection to your highest touch zones.

The result? CuVerro® kills more than 99.9% of bacteria** within two hours and continues to kill 99% of bacteria** even after repeated contamination.

A US government funded study conducted by researchers at the US National Institutes of Health and the Centers for Disease Control and Protection found that the HCoV-19 virus remained viable for up to 2 to 3 days on plastic and stainless steel surfaces versus up to 4 hours on copper.²

Viability of SARS-CoV-1 and SARS-CoV-2 in Aerosols and on Various Surfaces.²

*CuVerro Shield™ by Aereus Technologies is a Health Canada Pest Management Regulatory Agency (PMRA) registered process.

**Laboratory testing shows that, when cleaned regularly, CuVerro surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant *Staphylococcus aureus*, *Staphylococcus aureus*, *Enterobacter aerogenes*, *Pseudomonas aeruginosa*, *E.coli* 0157:H7, and Vancomycin-Resistant *Enterococcus faecalis* (VRE). The use of CuVerro® bactericidal copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination.

¹Oie S, Hosokawa I, Kamiya A. 2002. Contamination of room door handles by methicillin sensitive/methicillin-resistant *Staphylococcus aureus*. *J. Hosp. Infect.* 2002;51:140-143.

²Doremalean NV, Bushmaker T, Morris DH, et al. Aerosol and surface stability of HCoV-19 (SARS-CoV-2) compared to SARS-CoV-1. *N Engl J Med* 2020.

STAINLESS STEEL HANDS-FREE DOOR OPENER

The Imperial Surgical Ltd. Hands-Free Door Opener is a 100% stainless steel, foot operated door opener that works on any latch-less door.

Easy to install and easy to clean, the no-touch opener helps minimize the spread of germs by reducing the need to touch door handles where bacteria and viruses may live.

The hands-free door opener comes with an eye catching sticker to put on the door to encourage people to use it. We also provide the hardware so you have everything you need for installation.

nutriSafe2®

A complete range dedicated to safe enteral nutrition. Designed to be fail-safe, the nutrisafe2® system incorporates a unique connection that locks securely so it won't slip apart and yet cannot be connected to a standard 6% tapered luer fitting.

Safe - The risk of misconnection errors is significantly reduced for patient safety.

Secure - Accidental disconnection is nearly impossible, ensuring precious nutrients are received.

Simple - It does not change the technique of the users and therefore does not require any special training.

nutriSafe2® Feeding tubes

nutriSafe2® feeding tubes are available in a range of sizes, lengths and materials to suit patient needs. Numbered graduations every centimeter aid placement and monitoring, and the rounded tip provides atraumatic insertion.

PVC (DEHP-free): for use up to 5 days.

Polyurethane (PUR): for use up to 30 days.

Silicone: for use up to 30 days.

The nutriSafe2® connection allows the use of these tubes only with other nutriSafe2® devices..

Premicath®

A 1Fr PICC line designed specially for newborns under 1kg

Infants born prematurely weighing under 1kg often need the nutritional and therapeutic support that can only be delivered into their tiny vessels via venous access. At just 1Fr, premicath® has been specially designed for the smallest and most fragile babies to deliver optimum accuracy during placement as well as minimizing trauma for patients.

Available with choice of introducers including splitting needle and microflash®

microflashTM

Peelable Introducer/Peelable Safety Introducer*

Peelable Introducer for the insertion of PICC & Midline catheters, with notched needle and clear cannula sheath for early detection of blood flashback

- A** Top hole needle shaft permits blood flashback between needle & cannula for immediate indication of vessel access
- B** Short, light weight safety housing for balance and ease of handling
- C** Curved hub for secure ergonomic fingertip placement
- D** Tri-bevel needle tip for ease of skin penetration
- E** Smooth needle to cannula transition reduces drag through the tissue
- F** Transparent cannula permits immediate blood visualization upon vessel penetration
- G** Funnel cannula opening to facilitate easy catheter entry
- H** Radiopaque stripe on cannula for patient safety

Product Code	Size	For catheter	Units/Case
7371.19	20 G	1 Fr / 2 Fr	10

*The microflash® Introducer is intended for use as a split cannula introducer used to puncture peripheral veins.

GripLok

Catheter Securement Device

Our Vygon Grip-Lok® is especially efficient with Vygon Neonatal Catheters. It is hypoallergenic and latex free, which means low risk of irritation and allergic reaction. Its zinc oxide adhesive allows for gentle, yet efficient skin fixation. The catheter fixation is secure to prevent migration and its suture-less fixation increases ease of use.

- Hypoallergenic
- Zinc Oxide Adhesive
- Specially designed hub insert
- Suture-less fixation
- Sterile
- Latex free

umbilical catheters

Single-lumen umbilical catheters

A single lumen umbilical catheter used for venous or arterial access.

Umbilical venous catheters are used for:

- Parenteral nutrition & fluid administration
- Drugs administration
- Venous blood sampling
- Transfusion of blood or blood products
- Exchange transfusion

Umbilical arterial catheters are used for:

- Arterial blood sampling
- Arterial pressure measurement
- Blood pH and blood gas analysis
- Fluids and drugs administration

Numerical markings every cm

- Make it easy to check the length of catheter inserted

Three-way tap

- Colour-coded caps for venous / arterial identification

Luer-lock connector

- For efficient connection

neohelp™

A sterile heat loss prevention suit to deliver life-saving thermal care

Immediately after a premature baby is delivered by c-section, the priority is to place them in a warm and sterile environment. neohelp™ provides this essential protection so other essential Golden Hour care and treatment, including delayed cord clamping, can take place.^(1,2)

Integrated adjustable hood

Decreases heat loss through radiation:

- More efficient than a stockinette cap allowing air to pass through the material
- The toggle allows you to adjust to the baby's head

Double layer of soft clear polyethylene

Decreases heat loss through convection and evaporation:

- Creates a warm and humid environment, mimicking the incubator effect
- The thin inner allows for excellent skin contact
- Creates a barrier against drafts
- Allows passage of radiant heat from an additional warming device (if used)⁽³⁾
- Transparent material allows vital observations⁽⁴⁾

Pre-shaped foam support

Decreases heat loss through conduction:

- Helps to maintain an open airway by raising the shoulders
- Stabilises the baby's position
- Provides thermal care during transportation
- Provides comfort

Central VELCRO® opening

Provides optimum seal to ensure heat conservation:

- Quick and easy to place around the baby
- Allows full access to the baby's body
- Designed for easy placement of monitoring equipment, IV, umbilical catheters and carrying out Golden Hour care

How to use neohelp™

1. Unfold neohelp™ completely.
2. Place it on the resuscitation table, under the heat lamp (if applicable).
3. Fully open the Velcro and the hood to facilitate the baby's reception.

4. Do not dry the baby at birth.
5. Place the baby immediately after birth in neohelp™.
6. Align the shoulders at the upper edges of the foam.
7. Close the Velcro tightly along its entire length.

8. Adjust the hood to the head of the baby.
- Do not cover the airways due to the risk of suffocation.
9. Other heating appliances (e.g. heating) will need to be adjusted accordingly due to risk of hyperthermia.

10. The baby should be kept wrapped until temperature stabilization.
11. Temperature of the baby should be monitored continuously or consecutively (ideally every 5 minutes).
12. Do not use more than 24 hours.

Why is thermal care important?

Thermal care is vital for a preterm infant because they may have unbalanced skin-surface to weight ratio, very little or no capacity to generate heat (brown adipose tissue), inadequate stores of subcutaneous (insulating) fat and immature epidermal barrier.^(4,5)

At this vital time, neohelp™ prevents heat loss through its double layer of soft, clear polyethylene, integrated adjustable hood and VELCRO® seal.

For every 1°C decrease:

Risk of sepsis increases by 11%
Risk of death increases by 28%⁽³⁾

In the first 10-20 minutes,

without any protection,
temperature can fall by 2-4°C⁽⁶⁾

Why is delayed cord clamping important?

Provided the baby can be kept warm and does not need immediate resuscitation, the Resuscitation Council UK (RCUK) recommends delayed cord clamping (DCC) for at least 60 seconds whilst breathing is established.⁽⁷⁾

Delayed cord clamping has been shown to reduce the relative risk of:

- Intraventricular haemorrhage by 41% (RR 0.59, 95% CI 0.41 to 0.85)⁽⁸⁾
- Necrotising enterocolitis by 38% (RR 0.62, 95% CI 0.43 to 0.90)⁽⁸⁾

In addition, this procedure increases circulation of blood volume after birth and an improvement in cardiovascular stability, reducing the need for a blood transfusion.

Neonatal hypothermia: a worldwide issue

Hypothermia is an **important factor** in **morbidity** and **mortality** of all birthweights and gestational ages, and **particularly for vulnerable preterm infants⁽⁹⁾**.

Incidence of hypothermia on admission in the NICU from the delivery room is⁽¹⁰⁾:

- ≥ 56% for infants < 750g
- ≥ 25% for infants ≤ 2500g

Consequences of neonatal hypothermia

Consequences of neonatal hypothermia^(9,4)

Respiratory distress

Metabolic acidosis

Hypoxia

For every 1°C decrease⁽⁴⁾:

- sepsis increases by 11%
- risk of death increases by 28%

Coagulation defects

Hypoglycemia

Intraventricular hemorrhage

Infection / Septicaemia

Brain damage

Death

Neonatal heat loss prevention suit

neohelp™ is a sterile suit to swaddle the baby immediately after birth (before resuscitation).

- Polyethylene
- Occlusive
- Transparent

neohelp™ prevents heat loss due to convection, conduction, radiation and evaporation.

Product Code	Baby weight	Description	Dimensions	Units/Box
37.09.14	< 1 kg	neohelp™ Small	L. 38 cm x W. 30 cm	10
37.09.15	1 – 2.5 kg	neohelp™ Medium	L. 44 cm x W. 38 cm	10
37.09.16	> 2.5 kg	neohelp™ Large	L. 50 cm x W. 38 cm	10

International recommendations

“The transparency of bags makes it easier for caregivers to observe and manage the infant with minimal disruption of the wrap.”⁽⁴⁾

“The transport incubator used to limit heat loss can be cumbersome and difficult to obtain. It may be «replaced» by a stockinette cap and a transparent polyethylene bag wrapping whilst the baby is still wet. This greatly reduces the risk of hypothermia.”⁽¹¹⁾

“Meta-analysis of [...] studies found that plastic wraps (polyurethane or polyethylene bag) were statistically significantly more effective than routine care in reducing heat losses in infants aged < 28 weeks’ of gestation. Stockinette caps were not effective in reducing heat loss in infants”.⁽¹²⁾

Warm Gel®

Infant Heel Warmer

Uniform heat to reduce heel sticks

WarmGel® Infant Heel Warmer is a gel-filled, disposable heel warmer designed to provide gentle heat to increase blood flow and enhance infant blood sample collection.

WarmGel® Technology

Effective

- Conforms to infant's shape, keeping warmth where needed
- Even heat distribution increases blood flow

Safe

- Non-toxic food-grade gel won't harm infant's skin or eyes
- Single-patient use minimizes risk of infection

Reliable

- Reaches maximum temperature in less than 60 seconds, maintains optimal 104° F for 10 minutes ¹
- Trigger disc minimizes auto-activation during shipment

WarmGel® Versus Liquid

- Conforms to infant's shape
- Provides even heat distribution
- Resists migration, keeping warmth where needed
- Competitively priced compared to liquid-filled products

Item #	Description
24401	Liquid Heel Warmer (100/Box)
20418	WarmGel® Infant Heel Warmer (100/Box)

¹"Neonatal Thermoregulation: Guidelines for Practice," National Association of Neonatal Nurses, 1997.

TransWarmer®

Transport Mattress

Consistent, Safe Warming for Newborns

The TransWarmer® Infant Transport Mattress provides safe and reliable heat for up to two hours when cold stress is a concern. This thermostable, nontoxic gel mattress nests the infant in soothing warmth, while minimizing vibration during transport. Based on a 24 °C/75 °F start temperature, the mattress reaches a peak temperature of 40 °C/104 °F in less than 60 seconds - quickly improving the infant's admission temperature and reducing the risk of hypothermia.

Features and Benefits

- Comfortable, gel-filled mattress cradles baby in therapeutic warmth
- Gently conforms to the patient's shape for better nesting
- Minimizes the risk of hypothermia in cesarean deliveries
- Better heat distribution increases blood flow
- Disposable heat pack minimizes risk of cross contamination and infection
- Patented disc mechanism is easy to activate
- TransWarmer is nontoxic, latex- and PVC-free
- Use in labour and delivery, NICU, nursery, OR, ER, and transport units
- 10" wide x 16" tall

surfTMcath

Respiratory Distress Syndrome (RDS)

RDS is a pulmonary disorder resulting from a surfactant deficiency which commonly occurs in infants whose lungs have not yet fully developed.

In Europe, RDS is observed for about 90% of babies born at 24 weeks of gestation and for 80% of babies born at 28 weeks of gestation.¹

International recommendations¹

“ Preterm infants should be managed without mechanical ventilation where possible”

“CPAP with early rescue surfactant is considered optimal management for babies with RDS”

“ LISA is the preferred mode of surfactant administration for spontaneously breathing babies on CPAP, provided that clinicians are experienced with this technique”

European Consensus Guidelines on the Management of RDS - 2019

LISA method:

Less Invasive Surfactant Administration

LISA method consists of a surfactant administration through a thin catheter inserted with Magill forceps through the vocal cords while maintaining a non-invasive ventilation.

Clinical Evidence²

Objective: A systematic review of 6 randomized controlled trials, enrolling a total of 895 preterm infants, comparing LISA method with surfactant delivery methods using an endotracheal tube.

Meta-analysis of the clinical outcomes :

Conclusion: “LISA technique for surfactant delivery results in a lesser need for mechanical ventilation in infants with RDS, reduction in the composite outcome of death or BPD at 36 weeks, and BPD₃₆ among survivors

References

A catheter for surfactant administration using the LISA technique

For babies needing treatment for respiratory distress syndrome (RDS), our new **surf^{cath}™** uses the LISA (Less Invasive Surfactant Administration) technique to place the catheter. It was specifically designed to improve manoeuvrability during placement whilst also eliminating the need for the commonly used Magill forceps.

2cm soft distal black tip

- 2cm mark shows when **surf^{cath}™** is in place
- Soft tip minimises risk of tracheal lesions and prevents kinking
- Pre-curved to follow the airway anatomy and eases the passage between the vocal cords

Transparent bendable thermoplastic material

- Transparent material allows visual check on the delivery of surfactant
- Thermosensitive material allows you to curve **surf^{cath}™** prior to use meaning no need for Magill forceps
- Semi-rigid material also allows high manoeuvrability, helping to follow the airway anatomy

Less invasive 6Fr gauge

- No obstruction of the airways allowing spontaneous breathing
- Low dead space (0.2mL)

20cm length with cm markings

- Longer length eases manipulation of the surfactant syringe away from the patient's head
- Centimetre markings indicate the inserted length and check that **surf^{cath}™** stays in place

Scan to watch our video
on how to use **surf^{cath}™**

endotracheal tubes

Single and double lumen tubes in PVC (DEHP-free) for emergency oral or nasal intubation and routine anesthesia. Double lumen tubes have secondary lumen for surfactant administration or airway monitoring.

- Radiopaque
- 15mm adapter
- Markings every half centimeter

Single lumen tubes are also available as a soft tube designed to minimize tracheal damage during long term intubation.

Plain endotracheal tubes

mucus extractors

Mucaid allows for quick and safe suctioning and sampling of the upper respiratory tract in the newborn using mechanical / wall suction. This avoids the dangers of self-contamination inherent in oral suctioning (De Lee method).

Included in the range are Mucaid with a secure threaded cap for safe transportation of sample for testing and Mucaid with a filter to prevent any mucus or amniotic fluid from passing through into the line.

Meconium aspirators allows for suctioning below the vocal cords to clear meconium from the lungs and airways.

- Finger tip control
- Endotracheal tube and endotracheal tube hub
- Rounded, soft tip
- Centimeters every half centimeter

nasal ventilation

Single ventilation tube

Single silicone nasal tubes designed to reduce the stress related to ventilation and to improve the comfort of premature babies and newborns.

- Open tip
- 15mm adapter

Single ventilation tube

Double tube in silicone for nasal neonatal ventilation

Length of tube on 2 branches: 6 cm, except code 2596.30: 7 cm.

Open and rounded distal tips and centimetric markings.

The proximal end has an ISO standard 15 mm adaptor. This tube is specially designed to avoid tracheal intubation which is very traumatic, and to improve the comfort of premature babies and neonates.

4 sizes are available: Ext. Ø 2.7 mm - 3.4 mm - 4.0 mm - 5.0 mm

Manual Resuscitator / Ventilator

SAFE SPOT

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE

(Ventlab)

SafeSpot™
SS3200-Series
Shown with integrated pressure manometer, pop-off valve, inflatable mask and inflatable O₂ reservoir

Safe Spot™

- Single patient use resuscitation/ventilation system designed specifically for infant patients
- Bag features ultra-thin 'spots' to provide an enhanced tactile feel for lung compliance and increased patient safety
- Integrated pressure manometer promotes proper delivery (<20 cm H₂O) to guard against over-pressurization of babies' fragile lungs; the tri-color fields alert to the risk level of delivered pressure
- Accurate pressure delivery helps reduce barotrauma or pneumothoraces
- Pop-off valve (40 cm H₂O and 25 cm H₂O available) enables clinicians to use the pop off level appropriate for a given patient population creating a greater margin of safety for the baby
- Optional Vent Mask in various sizes available
- Select from a variety of components to assemble a custom resuscitation bag to meet your unique patient needs

CUSTOMIZE YOUR MANUAL RESUSCITATOR

Choose from the following components to create a custom resuscitation/ventilation bag to best meet your needs:

SAFETY COMPONENTS

INTEGRATED PRESSURE MANOMETER

Ventlab's innovative color-coded dial clearly denotes pressure delivery:

- Green - Target pressure level <20 cm H₂O
- Yellow - Potentially dangerous pressure level
- Red - Dangerous pressure level

POP-OFF VALVES

40 cm H₂O & 25 cm H₂O

Allows clinician to use an appropriate pop-off level

FILTERS

A bacterial/viral filter provides effective protection for the healthcare provider during expiration

CO₂ INDICATOR

Choose from STAT-Check II or MaxCap for effective assessment of CO₂ exchange

PEEP VALVES

Adjustable PEEP valves; 5-20 cm/H₂O

SafeSpot™, SS3200-Series

Shown with integrated pressure manometer, pop-off valve, inflatable mask and corrugated tubing

OXYGEN RESERVOIRS

INFLATABLE O₂ BAG

Closed system oxygen reservoir delivers higher FDO₂ and provides visual indication of proper airflow

CORRUGATED TUBING

For use with secondary oxygen supply; available in 24" and 48" lengths

CONVENIENCE COMPONENTS

FACE MASKS

Inflatable and non-inflatable face masks available

FLEX NECK

Removable, flexible joint allows corrugated tubing to be joined with the patient valve; also reduces the torque on ET tube

INCA®

Infant Nasal CPAP Assembly

INCA® Infant Nasal CPAP Assembly is the most respected Continuous Positive Airway Pressure (CPAP) device among clinicians. INCA affords all the benefits of CPAP/Bubble CPAP for newborns in your care.

Features enhanced precision fit for neonates:

- Five anatomically proportional nasal cannula sizes for neonates
- Clear, extra-soft tubing provides custom shaping and maximal stability
- Chin strap is available to help prevent air leakage around the mouth
- Available in Complete and Replacement Sets

INCA COMPLETE SET

CA CE

Consists of a nasal cannula, two lengths of Stay-Flex tubing, two tubing adapters, one in-line "T" pressure adapter, a knit cap with hook/loop strap, two foam blocks and a hook/loop chin strap. One INCA Sizing Gauge is included in every box of five sets.

Item # Description

44-2707	Set with 7.5 Fr Cannula (5/Box)
44-2709	Set with 9 Fr Cannula (5/Box)
44-2710	Set with 10.5 Fr Cannula (5/Box)
44-2712	Set with 12 Fr Cannula (5/Box)
44-2715	Set with 15 Fr Cannula (5/Box)

INCA ACCESSORY PACK

CE

Includes five knit caps with hook/loop strap, five chin straps with ten hook fasteners (not attached) and ten foam blocks.

1 Pack = 5 Hats and 10 Foam Blocks

Item # Description

44-2001	X-Small Pack (5 XS Caps, 10 Foam Blocks)
44-2002	Small Pack (5 S Caps, 10 Foam Blocks)
44-2003	Medium Pack (5 M Caps, 10 Foam Blocks)
44-2004	Large Pack (5 L Caps, 10 Foam Blocks)

INCA REPLACEMENT SET

CA CE

Includes the nasal cannula, two lengths of Stay-Flex tubing, two tubing adapters and one in-line pressure "T" adapter.

Item # Description

44-0707	Set with 7.5 Fr Cannula (5/Box)
44-0709	Set with 9 Fr Cannula (5/Box)
44-0710	Set with 10.5 Fr Cannula (5/Box)
44-0712	Set with 12 Fr Cannula (5/Box)
44-0715	Set with 15 Fr Cannula (5/Box)

INCA NASAL SIZING GAUGE

CA CE

For appropriate nasal prong fitting, use the INCA Sizing Gauge. Wipe gauge with sterile 70 percent isopropyl alcohol prior to each use. Hold the gauge up to the nasal area to determine appropriate cannula size.

NEO-fit™

Neonatal Endotracheal Tube Grip 
Facilitates Endotracheal Tube Management

The NEO-fit provides quick, secure endotracheal tube stabilization. Designed to firmly grip a Neonatal endotracheal tube, NEO-fit utilizes metal clips to mechanically grip the soft material of the tube. The device is positioned on baby's face using a hydrocolloid adhesive that is hypoallergenic and Hook / Loop strap that allows for rapid release and readjustment of the tube. MRI Conditional.

Item #	Description
42-2540	NEO-Fit Neonatal Endotracheal Tube Grip Set (20/Box) Each Set includes: (1) plastic tube grip, with hook/loop strap, (2) foam foot pads, (2) foam "lollipop" tapes. Non-sterile.

NEO-prep™

Skin Barrier 

A must-have product for your CPAP patients. Protect their tender tissues during this critical therapy. Neo-prep Skin Barriers are precut and non-sterile.

Item #	Description
44-8000	Precut Hypoallergenic Skin Barrier, non-sterile, small (10/Box)
44-8001	Precut Hypoallergenic Skin Barrier, non-sterile, large (10/Box)

Os Finder™

Cervical Os and Canal Dilator

The Os Finder naturally seeks and gently opens the cervical Os. Made of an extremely smooth and malleable Teflon-like material, this instrument is ideal for use in intracervical dilation or uterine sounding, or for intrauterine procedures.

DEVICE DESCRIPTION

The sterile, single use Os Finder™ naturally seeks and gently opens the cervical Os. It is made of extremely smooth and malleable teflon-like material. The dilator is 21.5 cm long with a taper from 2 to 4 mm. CAUTION: Federal restricts this device to sale by or on the order of physician.

CONTRAINDICATIONS

This instrument should not be used under any of the following conditions:

- Pregnancy or suspicion of pregnancy
- Acute or active inflammation of the cervix, endometrium, fallopian tube, ovary or peritoneum
- In the case of cervicitis, endometritis, tubo-ovarian inflammatory disease or pelvic inflammatory disease
- Invasive cancer that is visible on examination

PRECAUTIONS

Do not use the Os Finder if the package or instrument are damaged.

INDICATIONS FOR USE

This instrument is ideal for use in intracervical dilation, uterine sounding, or for intrauterine procedures.

DIRECTIONS FOR USE

The Os Finder is used to find the external Os by simply pushing the narrow end gently against the cervix until it finds its way. Further insertion of the flexible tip will follow the natural path of the canal until it reaches and goes through the internal Os. Dispose of in accordance with all applicable Federal, State and local Medical/Hazardous waste practices.

Tampa Infusion Catheter

For sonohysterography - the simple, cost-effective choice for ultrasound examination of the uterus.

- Unique introducer sheath (33 cm long) facilitates insertion into cervical Os with minimal trauma
- 7 cm marker provides optimal placement of catheter tip in uterus
- Balloonless configuration is ideal for postmenopausal patients with stenotic cervical canals, as well as for many nulliparous patients
- Small catheter size allows easy placement next to ultrasonography probe

H/S Catheters

For Enhanced Visualization of Uterine Pathology

H/S CATHETER SET

These easy-to-use devices provide enhanced visualization. Designed for use in sonohysterography and hysterosalpingography, the catheter can be used with oil- or saline-based media depending on the procedure requirements.

Features and Benefits

- Available with integrated stylet for easy insertion
- Unique placement sheath eliminates the need for a tenaculum
- Comes in both 5 and 7 French
- Ideal for office use
- Latex-Free construction

Item #	Description
61-5005	H/S Catheter, Kraton, 5 Fr (10/Box)

H/S Elliptosphere™ Catheter Set and Tray

The Safe and Simple Answer for Both
Sonohysterography and Hysterosalpingography

The patented Elliptosphere H/S catheter offers several advantages over the traditional balloon catheters including the ability to gradually inflate the balloon for placement in any size cervical canal, the ability to see the entire lower uterine segment during an SIS procedure, and greater patient comfort.

The Elliptosphere balloon contour and variable size permit secure placement in the cervical canal or uterine cavity for optimal visualization. The balloon's unique design prevents retrograde leakage of distension media, which facilitates peak uterine distention. A small catheter size enables placement next to ultrasound probe for minimal patient discomfort. The H/S Elliptosphere Catheter can be used with oil- or saline-based medium. Available in two versions – with and without an integrated stylet – the H/S Elliptosphere features latex-free construction.

Item #	Description
61-4005	H/S Elliptosphere Catheter, 5 Fr (10/Box)

Comfort Belly Bands

Abdominal Fetal Monitoring Band

A lighter, cooler abdominal fetal monitoring band, Belly Bands will be appreciated by your patients as they hold vital tocos and transducers firmly in place. Belly Bands are available in a wide range of widths to comfortably cover any patient abdomen.

Features and Benefits

- Breathable material helps wick away moisture from the mother's skin
- Lighter and cooler to ensure patient comfort
- Flexible precut lengths cover the belly and secure transducer placement
- Available in 30-foot rolls or individually wrapped packages of precut 14" lengths
- Choose from 10-inch to 18-inch widths
- Economical, easy-to-use product

Item #	Description
13010	10" Width Belly Bands on Roll (10" x 10 yds) (1 Roll)
13014	14" Width Belly Bands on Roll (14" x 10 yds) (1 Roll)

LAMINARIA

MedGyn's Laminaria is all-natural cervical disposable and sterile dilator made from a sea-grown plant containing no synthetic materials. Laminaria provides gentle, gradual dilation.

Features & Benefits

MedGyn's disposable and sterile Laminaria is all-natural cervical dilator made from a sea-grown plant containing no synthetic materials. Safely used for over a century, Laminaria provides gentle, gradual dilation. Once inserted into cervical canal, Laminaria absorbs liquid, swelling several times its initial dried diameter, gently dilating the cervix.

Standard, approx. length 60mm

021003 Laminaria 3mm Small

Indication for use:

Laminaria should be considered whenever cervical dilation and/or softening of the cervix is desired. Some examples are: cervical stenosis, related to dysmenorrhea, considered a possible cause of infertility, resulting from cauterization or conization, placement and removal of intrauterine devices, induction of labor, radium placement, curettage and drainage of uterine cavity, endometrial biopsy, and suction cannula aspiration.

leadercath

Arterial LeaderCath (PE)

Although it can be inserted in a variety of arteries, the most common sites for the placement of this catheter are the radial and the femoral artery.

The Seldinger technique makes arterial puncture easier particularly in hypotensive patients with a weak peripheral pulse and when arteries are atherosclerosed or narrow.

The product is supplied in a rigid blister pack containing:

- 1 introducer needle
- 1 straight guidewire
- 1 transparent and radiopaque catheter in polyethylene with winged hub

lectrospiral®

Coiled extension tube

Lectrospiral® is a flexible coiled extension tube that provides patients with freedom of movement.

Flexible

- Coiled tubing expands and contracts providing patients with greater freedom of movement than straight extension lines.
- Ideal to use with pediatric, home care and oncology patients.

Safe

- Polyethylene material allows for compatibility with commonly infused drugs and reduces adsorption, absorption or permeation that may occur with PVC.
- Extension tubing minimizes potential of trauma at IV site.

Rapid Infusion

INFU-SURG® PRESSURE INFUSION BAG

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE

Ethox

IV THERAPY

Three-way stopcock ensures precise control of pressure while the large oval bulb allows for quick bladder inflation, all with ONE hand

Solution bag hook enables easy bag changing without having to remove the Infu-Surg from the IV pole; keeps fluid bag in proper position while in use

360° view of the color-coded gauge facilitates accurate pressure monitoring while the safety pressure relief valve prevents over-inflation

- Ideal for intravenous and intra-arterial infusion treatment including A-line pressure monitoring
- Pressure relief valve prevents over inflation (330 mm Hg pressure relief)
- Large, oval shaped bulb allows for quick and easy inflation of bladder
- Single-handed inflation and deflation design makes it easy to use and requires minimal training
- Dedicated fluid bag hook enables efficient loading and unloading of the system without having to remove the IV bag from the IV pole
- Reinforced hanging loop allows for quick and easy hanging on IV pole
- Color-coded gauge makes for accurate pressure monitoring (150-300 mm Hg)
- Three-way stopcock ensures precise control of pressure
- Piston-style gauge allows for 360° visibility

Rapid Infusion

INFU-SURG® CLARITY PRESSURE INFUSION BAG

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE

Ethox

Clear panel enables full visibility of solution bag to monitor fluid level and easily scan patient barcode

- Transparent panel for clear visibility of solution bag
- Ideal for intravenous and intra-arterial infusion treatment including A-line pressure monitoring
- Dedicated hook enables quick change of solution bag while providing proper fluid bag positioning in pocket
- Pressure relief valve prevents over-inflation (330 mm Hg)
- Color-coded gauge provides accurate pressure monitoring (150-300 mm Hg)
- Single-handed inflation and deflation with oval-shaped bulb makes it easy to use and requires minimal training
- Welded panel and hook construction are more durable than sewn designs to withstand repeated use
- Reinforced hanging loop allows for quick and easy hanging on IV pole
- Three-way stopcock ensures precise control of pressure
- Piston-style gauge allows for 360° visibility

Three-way stopcock ensures precise control of pressure while the large oval bulb allows for quick bladder inflation, all with ONE hand

Solution bag hook enables easy bag changing without having to remove the Infu-Surg from the IV pole; keeps fluid bag in proper position while in use

Jet-Vac Bottles

Needle-Free Luer Locking Connection

- Removes need for spikes or needles to access the bottle
- Sample fluids aseptically

Shatter-Proof Plastic Design

- Reduces risk for hospital personnel and patients by avoiding glass breaks
- Reduces hazardous waste disposal costs compared to glass containers

Easy to Read Vacuum Indicator

- Provides visual confirmation of the vacuum inside the bottle
- Indicates when a change of the bottle is necessary

ET-VAC 600

- Ideal for thoracentesis procedures
- Compact size is optimal for sample transfer between hospital departments
- Patent pending**

ET-VAC 1000

- Ideal for paracentesis procedures
- Excellent substitute for glass bottles
- Patent pending**

ET-VAC 1500

- Ideal for large volume paracentesis procedures
- Large size increases efficiency of procedure and reduces waste
- Patented design**

Ver.2023-02-02

M7099	Jet-Vac Drainage Line	10/Box

Jet-Vac Centesis Catheters, Jet-Vac Procedure Trays and Jet-Vac Bottles provide a complete drainage system for physicians, nurses, and hospitals. The Jet-Vac drainage bottle is a disposable vacuum device used to aspirate, remove, or sample body fluids.

Jet-Vac Centesis Catheters

Large circular side holes designed to increase fluid drainage

Tapered catheter tip

- Provides a smooth transition
- Helps minimize patient discomfort

HDPE material

- Reduces catheter collapsing
- Promotes a smooth catheter insertion

Clear needle hub with catheter lock

- Increases fluid visibility
- Ergonomic design provides a secure grip
- Prevents needle/catheter separation

Plastic vent plug

- Allows for air to exit
- Provides added safety for physician

Echogenic needle

- Ensures needle visibility during ultrasound placement

ASEPT®

Pleural & Peritoneal Drainage System

ASEPT Catheter and Insertion Kits

The ASEPT Pleural and Peritoneal Drainage Systems are designed for long-term, intermittent drainage of symptomatic, recurrent fluid accumulation.

1. ASEPT Catheter
2. ASEPT Drainage Line
3. 5-in-1 Drain Line Adapter
4. Chloraprep® 10.5mL Vial
5. Synthetic Suture, 2-0 Straight and Synthetic Suture, 3-0 Curved

6. 16G x 1.0" (25.4mm) Needle
7. 25G x 1.0" (25.4mm) Needle
8. 22G x 1.5" (38.1mm) Needle
9. Tegaderm® Self Adhesive Dressing
10. Gauze Pads, 4"x4"
11. Foam Catheter Pad

12. Introducer Needle
13. Tearaway Introducer
14. 8F (2.67mm) Dilator
15. 12F (4.0mm) Dilator
16. 10mL Syringe
17. J-Tip Guidewire

18. Tunneler
19. Forceps
20. Safety Scalpel
21. Fenestrated Drape

The primary component of the ASEPT Drainage system is the catheter, which has an aseptic, self-sealing valve attached that provides a secure and reliable connection. The valve can be connected to an ASEPT vacuum drainage bottle, drainage bag, or a stand-alone drainage line to connect to other fluid collection equipment.

ASEPT Drainage Bottles and Bags

The ASEPT Drainage kit configuration includes a 600mL or 1000mL vacuum bottle set, a 2000mL gravity drainage bag, and the procedure pack with all of the dressing change items needed to complete an at-home drainage procedure. A standalone drain line is available to connect to the ASEPT drainage catheter for drainage with other collection equipment during in-patient procedures.

Bottle Features:

- Convenient vacuum release clamp
- Green vacuum indicator
- Luer-lock connector

Bag Features:

- Large 2000mL volume
- Fluid release valve for ease of bag emptying

Indications for Use

ASEPT Pleural Indications

The ASEPT Pleural Drainage System is intended for long term, intermittent drainage of symptomatic, recurrent, pleural effusions, including malignant pleural effusions and other pleural effusions that do not respond to treatment of the underlying disease.

ASEPT Peritoneal Indications

The ASEPT Peritoneal Drainage System is indicated for periodic drainage of recurrent and symptomatic malignant ascites. The catheter is intended for long term access of the peritoneal cavity in order to relieve symptoms such as dyspnea.

Bronchitrac® "L" Set

There is no need to twist the catheter or patient's body. Simply advance the Bronchitrac® "L" through a properly placed endotracheal or tracheostomy tube. The dual-plane, patented curvature of the catheter ensures consistent entry into the left main-stem bronchus.

The time savings and reduced patient trauma provided by the Bronchitrac® "L" make it the obvious choice when suctioning the left-bronchial airway.

- Ideal for suctioning of post-cardiac surgical, neuro and critical care patients
- Can be used for deep-lobe suctioning
- Completely latex-free

Item # Description

41-7814 21" long, 14 Fr Bronchial Suction Catheter, Slide-cover Connector and (2) Vinyl Gloves, Sterile (20/Box)

TRAKE-fit™ Collar Set

Tracheostomy Tube Holder For Maximum Patient Comfort

- Available in single- or double-collar sets
- Installs in seconds, remains secure
- Maximum comfort with cotton-lined neckband
- No adhesive, no narrow tape
- Completely adjustable
- Narrow tabs available for pediatric and small adult use
- Third-party reimbursable

Item # Description

43-1850 Double Collar Set (25/Box)
Each Set includes: (2) neckbands,
(2) wide hook/loop tabs

43-1851 Single Collar Set (25/Box)
Each Set includes: (1) neckband,
(2) wide hook/loop tabs

43-1862 Double Collar/Narrow Tab Set (25/Box)
Each Set includes: (2) neckbands,
(2) narrow hook/loop tabs

COMFIT™ Endotracheal Tube Holder

The Tapeless Way to Secure an Endotracheal Tube

COMFIT™ is a reliable, tapeless solution used to secure endotracheal tubes and better manage patient airways. Physicians appreciate COMFIT'S compliance with Advanced Cardiac Life Support (ACLS) Guidelines that recommend endotracheal tube stabilization devices as a substitute for tape. For patients, COMFIT™ provides a comfortable fit without the skin irritation that tape can cause.

Features and Benefits

- Significantly decreases the incidence of self-extubation¹
- Wide cotton-lined neckband minimizes skin irritation, providing maximum patient comfort
- No tape on the tube or the patient
- Completely adjustable
- Minimal plastic loop around the endotracheal tube allows access to the oral cavity
- A low-cost device that requires infrequent changing
- Latex-free product
- Complies with American Heart Association's ACLS Guidelines recommending the use of commercially available endotracheal tube holders instead of tape
- Plastic double securing loop, ½- x 19-inch neckband

1 McAndrew J, RR. Reduction of self extubation using Comfit™ tracheal tube holder. Respiratory Care. November 1994; 39 (11).

Item #	Description

Esophageal Balloon Catheter Set

For Intrathoracic Pressure Monitoring

- Ease of Insertion - The catheter comes with a new, easy-to-remove PTFE-coated stylet to aid the insertion procedure
- Comfort - The 5 French catheter is soft and pliable, offering maximum patient comfort over extended time periods
- Ease of Positioning - The new proximal Y-connector allows for precise balloon positioning with the stylet in place
- Depth Markings - The catheter is radio opaque with numerical depth markings to facilitate positioning
- Ease of Connection - The catheter has a standard female Luer connector
- Several Applications - Ideal for monitoring ventilator and sleep apnea patients and calculating lung compliance

Irrijet®

Splatter-Gard™

Simple, one-hand, thumb-controlled pressure provides an appropriately forceful stream (8 psi) directly to the desired area (or a gentler stream if needed). The soft flexible tip has an inside diameter equivalent to an 18-19 gauge needle.

- Splatter-Gard™ prevents contamination from body secretions – new concave design provides maximum splash-back protection
- Soft, flexible plastic tip eliminates needle-stick for user, minimizes trauma to patient
- Irrigant is delivered with force equivalent up to 8 psi
- Latex-free
- Sterile

Item #	Description
55-0004	Irrijet GP (5/Box)
55-0504	Multi-Use Irrijet (5/Box)
55-2004	Single-Use Irrijet Z (5/Box)
55-2104	Single-Use Irrijet (5/Box)

55-6504	Irrijet DS (5/Box)
59-5014	Infuset GP (5/Box)

Irrijet GP**55-0004**

Spring-loaded syringe connected to a double check-valve, through a side arm and 6-ft. length of tubing to a spike for entry into a bag of irrigating solution. Double check-valve prevents retrograde flow. Alternate movement of the syringe plunger delivers irrigating solution as needed. Syringe Capacity: 12cc.

**Multi-Use Irrijet****55-0504**

Same basic assembly as 55-0004, plus one package of five individually sealed jet tips.

**Single-Use Irrijet Z****55-2004**

Same basic assembly as 55-0004, plus one Zerowet Splashshield®.

**Single-Use Irrijet****55-2104**

Same basic assembly as 55-0004, plus includes permanent flexible plastic jet tip and Splatter-Gard™.

55-2134

Same basic assembly as 55-2104, but with 35 cc capacity syringe.

Wound Irrigation

COMBIPORT® + COMBIGUARD II™

LATEX FREE | | STERILE | SINGLE PATIENT USE | DISPOSABLE

Ethox

The Combiguard II™ attaches to a syringe (or Combiport) to assist in wound cleansing

Fluid flows through angled port, directed away from cleansed area and toward the outlet ports

Working together, a saline bag uses a Combiport® attached to a Combiguard II™ to effectively cleanse the wound without splash-back on the caregiver

COMBIPORT®
Wound Irrigation Device

COMBIGUARD II™
Irrigation Splash Guard

COMBIPORT® WOUND IRRIGATION DEVICE

- Attaches to a standard saline bag to administer a high volume of fluid in a short period of time
- Irrigation helps remove foreign bodies, reduce pathogen numbers and moisten wound tissue
- Patented spike attaches to standard 500 mL or 1000 mL saline bag
- For use only with Combiguard Irrigation Splash Guard (not sold separately)
- Removable cap for easy stop/start during cleansing
- Easy to assemble and use

COMBIGUARD II™ IRRIGATION SPLASH GUARD

- Egg-shaped cup covers wound site to prevent irrigation splash-back, helping to protect clinician
- Dual outlet ports enable contaminated fluids to safely escape
- Fluid delivery inlet delivers a stream equivalent to an 18 g needle
- Angled delivery inlet directs fluid away from cleansed area toward outlet ports
- Rounded edges provide a smooth surface against the skin
- Fits on 30-40 cc luer-tipped syringe
- Can be combined with Combiport Wound Irrigation Device

SMOOTH MOVER

PRODUCT DESCRIPTION

An economical ultra-smooth polyethylene patented board especially designed to furnish expert patient transference with minimal trauma to the patient. The Smooth Mover is capable of safely moving extremely large patients with minimal staffing requirements. It is radiotranslucent; it can be left in place during x-ray procedures. Is lightweight yet durable. Perfect for daily patient moving needs: EMS or hospital, nursing home or clinic applications. Easy on ...easy off. Yes, even one person can move a large patient!

Optional Accessory:

Pull Straps... loops straps slip through hand-holes enabling easy board pick-up on hard surfaces tables (x-ray, etc.) and minimize reach required when transferring patients from bed to stretcher to table during routine moving.

PRODUCT ORDERING INFORMATION

Hospital Shifter Model SM3

Is widely used for patient shifting, bed to stretcher to table, etc..

Dimensions: 3/16" x 22" x 72"

Weight: 9 lbs.

Ambulance Patient Shifter Model SM40

Is used as an aid in moving patients from vehicle to stretcher or backboard.

Dimensions: 3/16" x 18" x 48"

Weight: 5½ lbs.

ADJUSTABLE PATIENT POSITIONING DEVICES

Patented, inflatable, adjustable OR Comfort™ Patient Positioning Devices provide patient stability and comfort, as well as optimal surgical positioning. Devices can be adjusted throughout a procedure without having to manually lift or move the patient.

SHOULDER-FLOAT™ ADJUSTABLE AXILLARY SUPPORT DEVICE

- Relieves patient's shoulder discomfort during surgical procedures in the lateral decubitus position. Minimizes pressure on shoulder and head to help reduce post surgical pain.
- Useful during total hip replacement, thoracotomy, shoulder arthroscopy and kidney surgery. It can benefit mildly sedated patients undergoing epidural anesthesia and patients undergoing lengthy procedures.

Shoulder-Float Device			
PART #	PACKAGING DESCRIPTION	PART #	PACKAGING DESCRIPTION
SF05	5 per BX	SF10	10 per BX

PELVIC-TILT™ ADJUSTABLE DISPLACEMENT DEVICE

- Designed to lift a patient's hip between 20-40 degrees during surgical procedures. Includes a non-inflatable flap to place underneath the patient to prevent a lateral shifting of the device.
- Useful in obstetrics to avoid compression of the vena cava and/or aorta during cesarean sections and deliveries in the supine position. Practical during kidney surgery and surgery on the side of the leg or ankle.
