

NEW! BATRIK

TAG-IT™ SCOPE REPROCESSING

Batrik Scope Reprocessing Tags are durable and can withstand handling during reprocessing without tearing, ensuring that information remains intact. These tags are vital in recording important information such as date to reprocess on, scope model and serial number, sterilizer type, meeting sterilizer parameter conditions, alcohol flush, and hang date. These tags have been meticulously designed to elevate operational efficiency and contribute to the delivery of the highest standard of patient care.

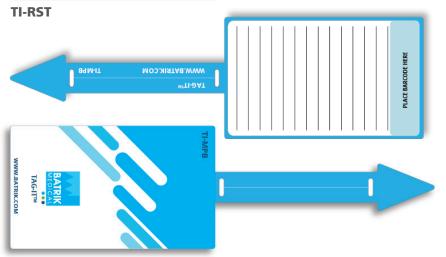

LOGGING IMPORTANT INFORMATION

- Easy for staff to indicate when the scope was processed
- Key scope, technician, and cycle-related information easily reported and identified.

SMART DESIGN

- The self-looping design allows for easy attachment to the scope
- No requirement for extra fastening materials
- Secure fastening as the loop is tightened around the instrument
- Features an integrated barcode area
